"I think this is the best poker book ever written. Every poker player should buy this book."

Brandon Adams, Professional Poker Player and Harvard lecturer

MODERN POKER THEORY

A ground-breaking work – essential reference for serious poker players.

Modern Poker Theory is a comprehensive, rigorous guide to the most important aspects of No-Limit Hold'em. It is based around an in-depth examination of what is meant by game theory optimal play (GTO) and how it can be applied at the table. Understanding GTO is fundamental to being able to make accurate poker decisions and being able to exploit players who don't.

Modern Poker Theory uses modern poker tools to develop a systematic approach to the analysis of GTO. It organizes the ideas and concepts in an intuitive manner that is totally focused to practical applications.

Next time you are at a table some of the players will have studied *Modern Poker Theory* and some won't. The players who have studied *Modern Poker Theory* will, without doubt, have a better theoretical and practical understanding of No-Limit Hold'em. They will be the favourites in the game. Make sure you are one of them.

Michael Acevedo, one of the world's leading poker theorists, is a game theory expert who is renowned for creating cutting-edge content for the world's leading players. The production of *Modern Poker Theory* is the culmination of many thousands of hours of his research work with the most advanced poker software tools available. It is poker theory for the 21st century.

Contents

Acknowledgments 8
Foreword by Jon Van Fleet (Apestyles) 10
Introduction 13

Part One
The Elements of Poker Theory

01 **Poker Fundamentals** 16
The Basic Concepts 16
The Key Metrics 31

02 **The Elements of Game Theory** 60
The Core Concepts 60
Maximally Exploitative Strategy (MES) 61
Counter Exploitation 63
The Nash Equilibrium 66
The Indifference Principle 69
The Clairvoyance Toy Game 70
Minimum Defense Frequency (MDF) 80
Exploitative Play Versus GTO 85
GTO in Multi-way Situations 94

03 **Modern Poker Software** 98
Equity Calculators 98
Range Analysis Tools 99
EV Decision Trees 100
Preflop Nash Calculators 100
GTO Solvers and Artificial Intelligence (AI) 101
Commercial Artificial Intelligence Software 103
GTO Solvers 103
PioSOLVER 105
MonkerSolver 106
GTO Poker Training Web Apps 107

Part Two
Pre-flop: Theory and Practice

04 **The Theory of Pre-flop Play** 109
Blinds and Antes 109
Complex Strategies 114
Playing First In 119
Limping 127
Open Push 129
General Guidelines for Pre-flop Bet-sizing 130
General Pre-flop Play Heuristics 131

05 **6-max Cash Game Equilibrium Strategies (100bb)** 134
Recommended Bet-sizings 135
GTO Raise First In Strategies 135
Playing vs 3-bets: General Heuristics 146
General Guidelines for Playing Versus Open Raises 150
Specific Ranges for Playing Versus Open Raises 153

06 **The Theory of Tournament Play** 169
Variance 169
Poker Tournament Metrics 174
Decreasing Variance and Increasing Profitability in MTTs 176

Understanding Tournament Metrics and Results 179
MTT Bankroll Management 182
Game Selection 183
The Mental Game 186
Tournament Life 187

07 **MTT Equilibrium Strategies: Playing First In** 203
Bet-sizing 204
Short Stack Push/Fold Charts 206
Small Blind PFI Strategy 209
Button PFI Strategy 214
Cutoff PFI Strategy 218
Hijack PFI Strategy 220
Lojack PFI Strategy 222
UTG+2 PFI Strategy 224
UTG+1 PFI Strategy 226
UTG PFI Strategy 227

08 **MTT Equilibrium Strategies: Defense** 230
Theoretical Considerations 230
Big Blind Versus Small Blind 232
Defending the Big Blind Versus IP Player 239
Defending the Small Blind 249
Defending the Button 259
Defending the Cutoff 266
Defending the Hijack 271
Defending UTG+1 277

09 **MTT Equilibrium Strategies: Playing Versus 3-bets** 280
The Key Factors 280
Short Stack 2x Open Versus Rejam (10-25bbs) 281
Mid Stack Open Versus Non-all-in 3-bet (25-40bbs) 290
Big Stack Open Versus Non-all-in 3-bet (60-80bbs) 299

Part Three
Post-flop: Theory and Practice

10 The Theory of Post-flop Play 304
The Theory of Betting 305
Equity Buckets (EQB) 311
Post-flop Bet-sizing 313
Bet-sizing and Modern Solvers 330

11 The Theory of Flop Play 333
Suit Isomorphism 333
Dynamic and Static Boards 334
Flop Classification Scheme 335
The Flop Donk Bet (DK) 340
The Value of Donk Betting 354
The Power of Position 355

12 The Flop Continuation-bet (c-bet) 360
Overall Flop Metrics 361
Developing IP C-betting Strategies 374
Developing OOP C-betting Strategies 394
C-betting in 3-bet Pots 404
C-bet Defense 410

13 GTO Turn Strategies 428
Key Strategy Lines 429
Turn Play After Flop Check Back (x/x) 430
Turn Play After Flop C-bet and Call (x/b/c) 434
Turn Categories 438

14 GTO River Strategies 453
Setting up a River Abstract Model 454
River Abstract Models 457
Linear Distributions 467
Practical Applications 476

Final Word 479
