Table of Contents

Foreword to the Series vii

Preface ix

List of Contributors xi

1. Immunologic approaches to the classification of lymphomas and lymphoid leukemias
K.A. FOON, R.P. GALE, and R.F. TODD III 1

2. Immunologic approaches to the classification of non-Hodgkin's lymphomas
T.M. GROGAN, C.M. SPIER, L.C. RICHTER, and C.S. RANGEL 31

3. Detection of central nervous system involvement in patients with leukemia or non-Hodgkin's lymphoma by immunological marker analysis of cerebrospinal fluid cells
H. HOOIJKAAS, H.J. ADRIAANSEN, and J.J.M. VAN DONGEN 149

4. Detection of residual disease in acute leukemia using immunological markers
D.H. RYAN and J.J.M. VAN DONGEN 173

5. Radioimmunoscintigraphy of lymphoma with monoclonal antibodies
J.A. CARRASQUILLO and S.M. LARSON 209

6. Radiolabeled antibodies in Hodgkin's disease
S.E. ORDER 223

7. Interferon therapy for lymphoproliferative disorders
M.S. ROTH, P.A. BUNN, and K.A. FOON 231

8. Monoclonal antibody therapy of lymphomas and leukemia
M.S. KAMINSKI and K.A. FOON 253

9. Autologous bone marrow transplantation in acute leukemia and lymphoma following ex vivo treatment with monoclonal antibodies and complement
A.S. FREEDMAN, T. TAKVORIAN, L.M. NADLER, K.C. ANDERSON, S.E. SALLAN, and J. RITZ 265
