Preface **1**

1. Offshore versus Onshore Oil Drilling **3**

1.1 The Differences between Offshore and Onshore Oil Drilling 3

1.2 Key Differences 6

1.3 How Oil Forms 12

1.4 Basics of Offshore Oil Drilling 17

1.5 Basics of Onshore Oil Drilling 17

1.6. Equipment Differences 18

1.6.1 Fixed platforms 19

1.6.2 Semi - Sub Platforms 21

1.6.3 FPSO Platforms 22

1.6.4 Tension-Leg Platforms 23

1.6.5 SPAR Platforms 24

1.7 Time Frame 29

1.8 Storage and Transport Methods 29

1.9 Cost Differences 30

1.10 Productivity 31

1.11 Susceptibility to price changes 32

2. Mooring Systems **32**

2.1 Introduction 32

2.2 Requirements 36

2.3 Fundamentals 36

2.3.1 Catenary Lines 36

2.3.2 Synthetic Lines 41

2.4 How do Mooring Systems Work? 44

2.4.1 Anchors 45

2.4.2 Mooring systems 46

3. **Risers Introduction** **57**

3.1 General overview 57

3.2 Riser function 57

3.3 Riser configurations 58

3.3.1 Free - standing risers 59

3.3.2 Top-tensioned risers 59

3.3.2.1 Riser tensioner systems 60

3.3.2.2 Buoyancy modules 60

3.3.3 Catenary risers 61

3.3.3.1 Simple catenary risers 61

3.3.3.2 Lazy-wave risers 61

3.3.3.3 Steep-wave risers 62

3.3.4 Hybrid risers 63

3.4 Common riser types 64

3.4.1 Drilling risers 65

3.4.1.1 Floating MODU "low-pressure" drilling risers 69

3.4.1.2 Floating production platform drilling risers 71

3.4.1.3 Floating MODU "high-pressure" drilling risers 72

3.4.2 Completion / workover risers 72

3.4.3 Production / flowline risers 72

3.4.3.1 Free-standing production risers 73

3.4.3.2 Top-tensioned production risers 74

3.4.3.3 Catenary production risers 76

3.4.3.4 Hybrid production risers 76

4. **Directional Drilling** **78**

4.1 Introduction 78

4.2 History of directional drilling 79

4.3 Advantages of directional drilling 82

4.4 Disadvantages of directional drilling 83

4.5 Definition of directional drilling 84

4.6 Applications of directional drilling 85

4.7 Horizontal wells 88

4.8 Characteristics, configurations and planning of a directional or horizontal well 90
4.8.1 Configurations of a directional well 91
4.8.2 Configurations of a horizontal well 95
4.9 Planning of a directional well: general features 98
4.10 Determination of the horizontal and vertical projections and choice of the well configuration 100
4.11 The casing design 103
4.12 The choice of the mud 104
4.13 Methods for assessing and surveying the deviation 104
4.14 Methods of surveying the inclination and direction of a directional well 115
4.15 Conclusions 121

5. Horizontal Wells 122

5.1 Introduction 122
5.2 Drilling methods for petroleum extraction 124
5.2.1 Vertical drilling 124
5.2.2 Directional drilling 125
5.2.3 Horizontal drilling 127
5.3 Drilling technology development 130
5.3.1 Directional technique development 130
5.3.1.1 The first generation of directional technique 130
5.3.1.2 The second generation of directional technique 131
5.3.1.3 The third generation of directional technique 132
5.3.1.4 The fourth generation of directional technique 133
5.3.2 Directional tools 135
5.3.2.1 Deflection tools 135
5.3.2.1.1 The removable whipstock 135
5.3.2.1.2 The permanent whipstock 136
5.3.2.2 Down-hole motor 136
5.3.2.2.1 PDM tools 137
5.3.2.2.2 Turbo – drills 138

5.3.2.2.3 Orientation sub and bent sub 140
5.3.2.3 Rotary steerable drilling system (RSDS) 142
5.3.2.3.1 The "push-the-bit" system 144
5.3.2.3.2 The "point-the-bit" system 145
5.3.2.3.3 The hybrid "push- and point-the-bit" system 146
5.3.2.4 Vertical drilling system (VDS) 147
5.3.3 Directional survey technique 148
5.3.3.1 Measuring technique 149
5.3.3.1.1 Directional information 149
5.3.3.1.2 Drilling engineering information 150
5.3.3.1.3 Formation information 150
5.3.3.2 Transmission technique 151
5.3.3.2.1 Mud-pulse telemetry 151
5.3.3.2.2 Electromagnetic telemetry 154
5.3.3.2.3 Wired drill pipe 155
5.3.4 Drill bits 156
5.3.4.1 The roller cone bits 157
5.3.4.2 The fixed cutter bits 158
5.3.4.3 The hybrid bits 160
5.3.5 Drilling fluids 161
5.4 Achievements of deep well drilling and challenges 164
5.4.1 Top 15+ deepest wells and challenges 164
5.4.2 Top 20+ longest extended reach wells and challenges 167
5.5 Conclusion 173

6 Oil and Gas Offshore Production 175

6.1 Introduction 175
6.2 Host Facilities 175
6.2.1 Resisting Environmental Forces 175
6.3 Bottom Supported Platforms 176
6.3.1 Gravel Islands 176
6.3.2 Steel Jacket 176
6.3.3 Gravity-Based Structures 176

6.3.4 Compliant Towers 177
6.4 Floating Rigs 177
6.4.1 Tension Leg Platforms (TLPs) 177
6.4.2 Semi-Submersibles 178
6.4.3 Spars 178
6.4.4 FPSO"s 179
6.4.5 Mobile Offshore Drilling Units 180
6.4.6 Subsea Production Systems 180
6.5 Drilling 180
6.5.1 Production Wells 180
6.5.2 Drilling 181
6.5.3 Directional Drilling 181
6.5.4 Derrick and Hoisting 182
6.5.5 Casing 183
6.5.6 Well Completion 185
6.5.7 Drilling Safely 185
6.5.8 Petroleum Varieties and Products 185
6.6 Production 186
6.7 Subsea production 190
6.7.1 Subsea Facilities 190
6.8 Extraction 197
6.9 Processing 197
6.10 Safe Operations / Living and Working Offshore 197

Summary **201**
