CONTENTS

Contributing Authors vii
Preface John M. Tew, Jr. ix
Acknowledgments xi
Introduction xiii

I. BACKGROUND 1

1. The History of Lasers in Neurosurgery 3
John M. Tew, Jr., William D. Tobler

2. Laser Types 9
Robert E. Breeze, Michael L. J. Apuzzo

3. Fundamentals of Laser Physics 17
W. Craig Clark

4. The Interaction of Laser Light with Neural Tissue 29
James E. Boggan

II. INTRACRANIAL APPLICATIONS 53

5. Benign Supratentorial Tumors 55
W. Craig Clark, Jon H. Robertson

6. Laser Surgery for Intracranial Glial Tumors 75
Michael Salcman

7. Tumors of the Posterior Fossa and Skull Base in Adults 85
Jon H. Robertson, W. Craig Clark

8. Using Lasers in Pediatric Neurosurgery 101
Marion L. Walker

9. Stereotactic Laser Resection of Deep-Seated Tumors 115
Patrick J. Kelly, B. A. Kall, S. J. Goerss

III. SPINAL APPLICATIONS 123

10. The Use of the Laser in the Operative Management of Intraspinal Tumors 125
W. Craig Clark, Jon H. Robertson

11. Laser in Pain Management 137
Clark Watts, Walter J. Levy

IV. OTHER USES 143

12. Laser Surgery in Congenital Abnormalities 145
Hector E. James

13. Neurosurgical Applications of the Nd:YAG Laser for Vascular Lesions 159
Robert E. Wharen, Jr., Robert E. Anderson, Thoralf M. Sundt, Jr.

V. EXPERIMENTAL TECHNIQUES 173

14. Investigational Applications 175
W. Craig Clark
