INTERNATIONAL COMMITTEE 2

CONTENT 3

ABSTRACTS 4

Catalytic decomposition of N_2O – from laboratory experiments to industrial application 5
Modified minerals as new catalysts for selective reduction of NO_x with ammonia 6
The possibility of increasing the production of methane in biogas station Pustějov 7
Method for destruction of selected halogenated chemicals 9
Organochlorine pesticides and polychlorinated biphenyls in air and soil across Azerbaijan 10
Catalytic filters for soot combustion 11
Identification of nanomaterials in ambient air 12
Methods for measurement of endocrine disruption chemicals in biotic and environmental samples 13
Strategy for application of passive sampling techniques for water and ambient air monitoring 14
A protocol for complex environmental data analysis using R-project™ 15
Robust approach for environmental and health practice: novel paradigm for data treatment and analysis 16
Addition of platelet concentrate to Dermo-Epidermal Skin Graft in deep burn trauma reduces scarring and need for revision surgeries. 17
Liposomes as a transport system of encapsulated drugs 18
Issues of development and production of active pharmaceutical ingredients and finished dosage forms from the point of view of safety assurance, with particular attention to import from third countries 19
Problem of counterfeit medicines: Causes of existence and possible ways of solving 20
Dissolution testing as a tool in quality assurance of pharmaceuticals 21
An evaluation of concentration variability of selected heavy metals in dandelion (Taraxacum officinale) growing in the areas of different anthropopressure 22
The device for the waste utilization using a new pyrolytic-plasma method 23
New method of cleaning high-temperature gases 24
Is there perfect detector for HPLC/MS/MS system ? 25
General unknown screening and targeted approach in LC/MS/MS measurements 26
Application of pyrolysis process in processing of selected food wastes 27
Fish as bioindicator of environmental pollution: using GC-MS/MS technique as an efficient tool for control 28
N_2O decomposition over catalysts prepared by accreting of active phase on the support 29
Effect of silver doping on the TiO_2 for photocatalytic reduction of CO_2 30
The balancing of VOC concentration fluctuations by adsorption/desorption process on activated carbon 31
Results and key aspects of environmental impact assessment process of wind farms 32
ALKALI METALS AS PROMOTERS IN Co-Mn-Al MIXED OXIDE FOR N_2O DECOMPOSITION 33
Ibuprofen analysis by flow injection metod 34
The developement of qualitative and quantitative analysis for determination of phenolics compounds 35
Photocatalytic decomposition of N_2O on Ag-TiO_2 catalysts 36
Evaluation of reduction thermal processing of tire and waste car wrecks parts by the pyrolysis and by the gasification process 37
High-resolution accurate mass (HRAM) liquid chromatography-mass spectrometry (LCMS) for life science applications: 38
High Resolution Mass Spectrometry Screening for Pesticides and Toxicology Compounds 39

NANOMATERIALS AND ENVIRONMENT 40

Nanomaterials for environmental applications 41
Evaluation of nanomaterials risks 42
The Role of Genotoxicity Assessment in the Production of Nanomaterials 43
Perspectives of nanoparticles in pharmacy 44
