Contributors xi
Foreword: *A. D. Bangham* xxi
Preface xxv

Interaction of liposomes with the biological milieu

1 Fate of injected liposomes: observations on entrapped solute retention, vesicle clearance and tissue distribution *in vivo*
Gregory Gregoriadis 3
2 Disposition of liposomes *in vivo*
Karl J. Hwang and Paul L. Beaumier 19
3 Interactions of liposomes and other drug carriers with the mononuclear phagocyte system
T. M. Allen 37
4 Fate of liposomes in the lymphatics
Harish M. Patel 51
5 On the mechanism of electron-dense liposome internalization by macrophages *in vitro*
Vladimir P. Torchilin, N. N. Ivanov, A. L. Klibanov, M. I. Papisov and S. M. Chebanov 63
6 Cell interactions with solid and fluid liposomes *in vitro*: lessons for 'liposomologists' and cell biologists.
Leonid B. Margolis 75
7 Interactions of liposomes with lipoproteins: relevance to drug delivery systems and to the treatment of atherosclerosis
Kevin Jon Williams and Alan R. Tall 93

Liposomes in immunomodulation/vaccines

8 Systemic macrophage activation with liposome-entrapped immunomodulators
Isaiah J. Fidler, Rajiv Nayar and Alan J. Schroit 115

9 *In vivo* elimination of macrophages in spleen and liver, using liposome-encapsulated drugs: methods and applications
N. van Rooijen and E. Claassen 131
10 Liposomes: binary antigen/drug carriers for immunomodulation
P. N. Shek and R. F. Barber 145
11 Liposomes as immunological adjuvants: recent developments
N. van Rooijen 159
12 *In vivo* use of liposome-incorporated membrane antigens
G. Hedlund, B. Jansson, T. Brodin and H. O. Sjögren 167
13 Oligosaccharide-haptenated liposomes used as a vaccine to *Streptococcus pneumoniae*
H. Snippe, G. J. W. J. Zigterman, J. E. G. van Dam, J. P. Kamerling 183
14 Further studies of liposomes as carriers of purified protein vaccines
Howard Six, Charles Anderson and Julius A. Kasel 197
15 Induction of high titer antisera by liposome-incorporated spermatozoal antigens and reversible immunosuppression of fertility
L. Mettler and A. B. Czuppon 207
16 Liposomal vaccine against influenza virus
V. P. Torchilin, S. A. Burkhanov, L. A. Mazhul and O. N. Ageeva 229
17 Development of liposomes as carriers for a human malaria peptide vaccine
Roberta A. Richards, Robert A. Wirtz, Wayne T. Hockmeyer and Carl R. Alving 235
18 Muramyl peptides and liposomes
N. C. Phillips and L. Chedid 243
19 Liposomes as immunological adjuvants for *Streptococcus mutans* antigens
J. P. Klein, D. Wachsmann and M. Schöller 261
20 Liposome-facilitated human colon cancer immunity: a proposed *in vitro* model
Baldwin H. Tom 267
21 The immunoadjuvant action of liposomes: nature of immune responses and influence of liposomal characteristics
Gregory Gregoriadis, Nathalie Garcon, Judith Senior and David Davis 279

Liposomes in antimicrobial therapy

22 Applications of liposome formulations for antimicrobial/antiviral therapy
Deborah A. Eppstein and Philip L. Felgner 311

23 Drug targeting in antimicrobial chemotherapy by means of liposomes
Irma A. J. M. Bakker-Woudenberg, F. H. Roerdink and G. L. Scherphof 325
24 Liposome-encapsulated lymphokine for the treatment of experimental visceral leishmaniasis
Steven G. Reed 337
25 Liposomal amphotericin B in antimicrobial therapy
Gabriel Lopez-Berestein 345

Liposomes in cancer therapy

26 Chemotherapy with anthracycline-liposomes
Eric A. Forssen 355
27 Adriamycin-containing liposomes in cancer chemotherapy
Alberto A. Gabizon and Yechezkel Barenholz 365
28 Use of liposomes in cancer chemotherapy
Aquilur Rahman and Philip S. Schein 381
29 Development of lipophilic cisplatin analogs encapsulated in liposomes
R. Perez-Soler, Abdul R. Khokhar and Gabriel Lopez-Berestein . 401
30 Phospholipase A_2 substrates: a novel approach to cancer chemotherapy
Marti Jett and Carl R. Alving 419
31 Tumour cytotoxicity of macrophages induced by uptake of liposome-encapsulated immunomodulators with special reference to Kupffer cells
Toos Daemen, Aletta Veninga, Frits H. Roerdink and Gerrit L. Scherphof 431
32 Liposomes in macrophage activation by C-reactive protein (CRP): potential for cancer therapy
Sharad D. Deodhar 447

Liposomes in enzyme therapy

33 Liposomes as a carrier for tyrosine phenol-lyase
Gary G. Meadows and Herbert F. Pierson 461
34 Liposome-entrapped superoxide dismutase: *in vitro* and *in vivo* effects
Peter C. Panus and Bruce A. Freeman 473

Liposomes in metal detoxification

35 Use of liposomes in metal poisonings and metal storage diseases
Y. E. Rahman 485
36 Use of liposomal DTPA in heavy metal detoxification
Merle L. Blank, Billy L. Byrd, Edgar A. Cress, Lee C. Washburn and Fred Snyder 497

Liposomes in diagnostics

37 Liposomes in diagnostic imaging
Steven E. Seltzer 509
38 Immunoliposome assays: perspectives, progress and potential
Rodney J. Y. Ho and Leaf Huang 527

Liposomes as a blood surrogate

39 Liposomes as carriers of hemoglobin
Ljubomir Djordjevich and Anthony D. Ivankovich 551
40 Liposome/heme as a totally synthetic oxygen transporter
Eishun Tsuchida and Hiroyuki Nishide 569
41 Liposomes as a carrier for hemoglobin
Tamotsu Kondo 585

Liposomes for the oral administration of drugs

42 Gastrointestinal uptake of liposomes
Norman Weiner and Chia-Ming Chiang 599
43 Liposomal heparin by the oral route
Masaharu Ueno 609
44 Oral administration of vitamin K via liposomes
Toshihisa Yotsuyanagi, Mariko Nagata and Ken Ikeda 621
45 Transmucosal passage of liposomal drugs
Toshikiro Kimura 635
46 Liposomes as carriers of cysteamine by the oral route.
Vincent Roman and François Berleur 649

Topical application of liposomes

47 Liposomes in the topical application of drugs: a review
Michael Mezei 663
48 Liposomes: a pulmonary perspective
P. J. Mihalko, H. Schreier and R. M. Abra 679

Targeting of liposomes

49 Antibody-aided liposomal drug delivery
T. Ghose, M. Singh, G. Faulkner, A. Goundalkar and M. Mezei 697
50 Liposome dependent drugs
Timothy D. Heath 709
51 Side chains and magic bullets: Paul Ehrlich revisited
Lee Leserman 719

52 Interaction of Con A-liposomes with cells: binding to normal and transformed mouse fibroblasts
Leonid Margolis, Alexei A. Bogdanov, Jr., Larisa V. Gordeeva and Vladimir P. Torchilin 727
53 Liposome–hepatocyte interaction: targeted liposome transport to liver cells by varying phospholipid and ganglioside composition of the liposomal membrane
S. A. Burkhanov and Vladimir P. Torchilin 737
54 Critical factors in hepatic-specific delivery of insulin via liposomes
Ronald S. Spangler, Michael S. McCracken and Robert C. Lijana 749
55 Liposomes as carriers for antitumour and antiviral drugs: pH-sensitive immunoliposomes and sustained release immunoliposomes
David Collins, Stephen Norley, Barry Rouse and Leaf Huang ... 761
56 Potential applications of pH-sensitive liposomes as drug delivery systems
Rajiv Nayar, Isaiah J. Fidler and Alan J. Schroit 771
57 Phototoxic liposomes for selective destruction of T lymphocytes: experiments under physiological conditions
Janet Teltscher, Shrishailam Yemul, Alison Estabrook, Carole Berger, Richard Edelson and Hagan Bayley 783

Clinical application of liposomes

58 Liposomes: parenteral administration to man
Geerdien M. Zonneveld and Daan J. A. Crommelin 795

Novel technology and industrial aspects of liposomes

59 Polymerizable liposomes: applications in biology and medicine
Fiona J. Freeman and Dennis Chapman 821
60 Novel procedures for generating and loading liposomal systems
Marcel B. Bally, Michael J. Hope, Lawrence D. Mayer, Thomas D. Madden and Pieter R. Cullis 841
61 Industrial application of liposomes: what does that mean?
Marc J. Ostro 855

Index 863
