The Impact of Vine Pruning Methods on Physiological Development and Health Condition of *Vitis Vinifera* 9

Optimization of the Nutritional and Phytochemical Composition of Microgreens Through Biofortification 10

Yeasts as a Biotechnological Tool for Wine Acidity Management 11

Effect of Microclimatic Conditions of the Habitat on *Vitis Vinifera* 12

Influence of Arbuscular Mycorrhizal Fungi on Grapevine Vitality 13

Study of Grapevine Cultivar Resistence to the Pathogen *Cadophora Luteo-Olivacea* 14

The Influence of Technological Operations on Selected Parameters of Fruit Wine Quality 15

Horticultural Crops as a Tool for Sustainable Development in Developing Countries 16

Influence of the Modified Soil Environment on Establishment and Vitality of Trees After Planting 17

Condensation of Fermentation Gases 18

Development and Testing of Selective Sorbents for Sulfur Compounds in the Flow of Fermentation Gas Mixture 19

Study of the Microbiome and Polyphenolic Profil of Grape Must and Wine 20

Peri-Urban Landscape in the Planning System 21

Identification, Interpretation and Possibilities of Regeneration of Designed Landscape Vranov, Bítov, Chlumec Nad Cidlinou 22

Influence of *Brettanomyces* Yeast Metabolites Content on the Sensory Perception of Wine 23

Possibilities of Influencing the Production of Biogenic Amines in Red Wines 24

Optimization of Ecological Cultivation of Forced Chicory (*Cichorium Intybus* Var. *Folium*) 25

The Role of Landscape Architecture in Planning and Designing Pedestrian Connections in Cities – Safety and Public Health 26

Study of the Influence of Selected Rootstocks on Infection by ‚Candidatus Phytoplasma Prunorum' in the Tissues of Apricot Trees 27

Parametric Modelling in Landscape Planning: a Data-Driven Approach to the Optimization of Adaptation Measures in the Landscape 28

Evaluation of Aquaculture-Derived Organic Fertilizers for Indoor Basil Production 29

Study and Critical Evaluation of Archival Sources on the Historical Development of the Lednice Chateau Park 30

Nanoparticles Enhance in Vitro Micropropagation of Olive (*Olea Europaea* L.): Preliminary Observations on Cultivars ‚Galega Vulgar' and ‚Frantoio' 31
