Contents

Contributors *xxi*
Preface *xxix*

PART 1 **AN ARCHITECTURE FOR PHYSIOLOGICAL FUNCTION** **VOLUME 1** PAGES 1–874

1 ***Structure and Function*** *3*
Alfred P. Fishman

2 ***Design and Structure of the Human Lung*** *11*
Ewald R. Weibel and C. Richard Taylor

3 ***Development and Regeneration of the Lung*** *61*
Peter H. Burri

4 ***The Lungs in Later Life*** *79*
Allan I. Pack and Richard P. Millman

5 ***The Upper Respiratory Tract*** *91*
Lars Malm and Nils Gunnar Toremalm

6 ***Stabilization and Closure of the Upper Airways*** *105*
Donald F. Proctor

7 ***Production and Control of Airway Secretions*** *113*
Michael J. Welsh

8 ***Airway Smooth Muscle*** *119*
Michael I. Kotlikoff

PART 2 **PHYSIOLOGICAL PRINCIPLES**

9 ***Control of Ventilation*** *131*
Neil S. Cherniack and Allan I. Pack

10 ***Control of Respiration during Sleep*** *145*
Allan I. Pack, Lewis R. Kline, Joan C. Hendricks, and Adrian R. Morrison

11 ***Drugs and Mediators in Respiratory Control*** *161*
Norman H. Edelman

12 ***Pulmonary Mechanics*** *171*
Murray D. Altose

13 *Ventilation, Pulmonary Blood Flow, and Gas Exchange* 185
Robert A. Klocke

14 *Diffusion, Diffusing Capacity, and Chemical Reactions* 199
Peter D. Wagner

15 *The Nonrespiratory Functions of the Lungs* 205
Alfred P. Fishman

16 *Blood-Gas Transport* 221
Michael P. Hlastala

PART 3 **INTEGRATIONS AND ADAPTATIONS**

17 *Homeostasis, Adaptation, and Disease* 227
Alfred P. Fishman

18 *Physiological Basis of Exercise Testing* 235
Norman L. Jones

19 *Lessons from High Altitude* 251
Donald Heath

20 *Diving and Gas Embolism* 261
James M. Clark

21 *Adaptation to Oxygen Limitation* 269
Peter W. Hochachka

22 *Regulation of Ventilation in Metabolic Acidosis and Alkalosis* 281
Roberta M. Goldring and Homayoun Kazemi

23 *Adaptation to Respiratory Acidosis and Alkalosis* 289
Nicolaos E. Madias and Jordan J. Cohen

24 *Alveolar Ventilation and Its Disorders* 299
Alfred P. Fishman

25 *Abnormal Breathing Patterns* 303
Neil S. Cherniack

PART 4 **APPROACH TO THE PATIENT WITH RESPIRATORY SIGNS OR SYMPTOMS**

26 *Approach to the Pulmonary Patient with Respiratory Signs and Symptoms* 313
J. Peter Szidon and Alfred P. Fishman

27 *Pulmonary Cutaneous Disorders* 367
Brian V. Jegasothy and Elizabeth F. Sherertz

28 *Systemic Manifestations of Pulmonary Disease* 391
Alfred P. Fishman

PART 5 **DIAGNOSTIC PROCEDURES**

29 *Diagnostic Reasoning* 399
Randall D. Cebul

30 *Sputum Examination* 411
Sanford Chodosh

31 *Pulmonary Cytology* 427
Muhammad B. Zaman and Myron R. Melamed

32 *Bronchoscopy and Related Procedures* 437
Edward F. Haponik, Paul Kvale, and Ko-Pen Wang

33 *Pulmonary Biopsy and Aspiration Procedures* 465
Milton D. Rossman

34 *The Electrocardiogram in Pulmonary Disease* 471
Fred D. Holford

35 *Radiographic Evaluation of the Chest* 479
Wallace T. Miller

36 *Computed Tomography and Magnetic Resonance of the Chest* 529
David M. Epstein, Warren B. Gefter, and Alfred P. Fishman

37 *Disability Evaluation* 567
Gary R. Epler

PART 6 **IMMUNOLOGIC DISORDERS (INCLUDING CERTAIN INTERSTITIAL DISEASES)**

38 *Cellular Communication in Respiratory Immunity* 579
John Bienenstock, Ralph Scicchitano, and Jack Gauldie

39 *Immune Defenses of the Lung* 589
Ronald P. Daniele

40 *The Eosinophil* 599
A. B. Kay

41 *Immune Mechanisms in Lung Injury* 607
Peter A. Ward and Daniel G. Remick

42 *Sarcoidosis* 619
Carol Johnson Johns

43 *Pulmonary Manifestations of Collagen-Vascular Diseases* 645
Burton F. Dickey and Allen R. Myers

44 *Hypersensitivity Pneumonitis (Extrinsic Allergic Alveolitis)* 667
Hal B. Richerson

45 *Immunologic Diseases of the Lung and Kidney (Goodpasture's Syndrome)* 675
Curtis B. Wilson

46 *The Eosinophilic Pneumonias* 683
Robert L. Mayock and Renato V. Iozzo

PART 7 **INTERSTITIAL DISEASES**

47 *Nonimmunologic Defense Mechanisms* 701
Joseph D. Brain

48 *Reactions of the Interstitial Space to Injury* 711
Ronald G. Crystal and Victor J. Ferrans

49 *Structural-Functional Features of the Interstitial Lung Diseases* 739
Larry K. Jackson and Jack D. Fulmer

50 *Widespread Pulmonary Fibrosis* 755
Margaret Turner-Warwick

51 *Radiation Fibrosis* 773
Theodore L. Phillips

52 *Pulmonary Disease Induced by Drugs* 793
William J. Fulkerson, Jr., and Jon P. Gockerman

53 *Primary Pulmonary Histiocytosis X* 813
Edward C. Rosenow III

54 *Occupational Pulmonary Diseases* 819
Hans Weill and Robert N. Jones

55 *The Lungs in Some Inborn Errors of Metabolism* 861
Masazumi Adachi and Bruno W. Volk

APPENDIXES

Appendix A ***Respiratory Questionnaire*** *A1*
Appendix B ***Normal Values*** *B1*
Appendix C ***Prophylaxis for Influenza and Pneumococcal Pneumonia*** *C1*
Appendix D ***Terms and Symbols in Respiratory Physiology*** *D1*

Index *I1*

PART 8 NONINFECTIOUS DISORDERS OF THE PULMONARY PARENCHYMA

VOLUME 2
PAGES 875–1792

56 Aspiration Diseases of the Lungs *877*
Paul E. Epstein

57 Pulmonary Alveolar Proteinosis *893*
William D. Claypool

58 The Pulmonary Lymphatic System *901*
Chuzo Nagaishi and Yoshio Okada

59 Lung Lymph Composition and Flow in Normal and Abnormal States *909*
Kenneth L. Brigham and James R. Snapper

60 Pulmonary Edema *919*
Alfred P. Fishman

61 Depositional Diseases of the Lung *953*
Richard H. Ochs

62 Tuberous Sclerosis and Lymphangiomyomatosis *965*
Alfred P. Fishman

PART 9 PULMONARY CIRCULATORY DISORDERS

63 The Normal Pulmonary Circulation *975*
Alfred P. Fishman

64 Pulmonary Hypertension and Cor Pulmonale *999*
Alfred P. Fishman

65 Prophylaxis and Treatment of Thromboembolism Based on Pathophysiology of Clotting Mechanisms *1049*
Robert W. Colman and Ronald N. Rubin
