Preface xi
Acknowledgments xiii

PART I SETTING THE STAGE

1 Talkin' Bout a Revolution: A Paradigm Shift 3
2 Defining Prediction 12
3 The Good, the Bad, and the Ugly: Assessing a Theory 18

PART II PSYCHOLOGICAL THEORIES

4 Mind Reading: Introduction to Psychological Theories 31
5 Reinforcing and Connecting: Prediction Involves Associative Learning 35
6 Accessing the Remainders of Mental Representations and Filling in the Gaps: Prediction Involves Preactivation and Pattern Completion 46
7 Implicit Priming and Active Forecasting: Prediction Involves Two Systems 60
8 Mental Shortcuts: Prediction Involves Simple Heuristics 74
9 Inferences about Others and Their Mental States: Prediction Involves Social Theories 86

10 Continuous Cycles of Perceiving, Acting, and Adjusting: Prediction Involves Perception–Action Loops 98

11 Event Representations of How the World Works: Prediction Involves Mental Models of Events 112

12 Moving Pictures in the Head: Prediction Involves Mental Simulation 125

PART III MATHEMATICAL THEORIES

13 Number Crunching: Introduction to Mathematical Theories 139

14 Learned Activation Patterns of Simple Connected Processing Units: Prediction Involves Connectionist Neural Networks 146

15 Reducing Surprisal and Entropy: Prediction Involves Information Theory 163

16 Probabilistic Beliefs about the State of the World: Prediction Involves Bayesian Inference 174

17 Quantum Probabilities: Prediction Involves the Mathematical Formalisms of Quantum Theory 188

PART IV NEUROBIOLOGICAL THEORIES

18 Wetware: Introduction to Neurobiological Theories 201

19 Neuronal Overlap during Observation and Action: Prediction Involves Mirror Neurons 208

20 Forward Models in the Brain: Prediction Involves the Cerebellum as a Predictive Engine 220

21 Minimization of Prediction Errors by Self-Organizing Biological Systems: Prediction Involves Hierarchical Predictive Coding and Free Energy Neuroscience 231

22 Information Processing Facilitated by Neural Rhythms: Prediction Involves Neural Oscillations 249

PART V THE FUTURE OF PREDICTION

23 Lumping and Splitting 265

24 A Look Ahead for Prediction Research 278

Notes 292
