Yan Tang, *Yanqin Huang*: On the structural monotone inclusion of continuous second-order dynamics combining dry friction and Hessian-driven damping ... 299

Yanjun Chen, *Xinhan Zhang*, *Hong Luo*: Boundary layer separation and local behavior of the steady Prandtl equation with magnetic damping 327

Dorota Bród, *Anetta Szynal-Liana*: On one-parameter generalization of Fibonacci and Leonardo elliptic quaternions 353

El-Hassan Benkhira, *Ilham El Ouardy*, *Youssef Mandyly*, *Rachid Fakhar*: Bounded penalty method for the modified Signorini contact problem with nonlocal Coulomb's friction in electro-elasticity 365

Jae-Myoung Kim: Regularity criteria for weak solutions to 3D non-Newtonian fluid equations of MHD type 393

Yanjun Ma: Stability estimates for polyharmonic operator from partial boundary measurements 409

Aurelien Fouetio: Homogenization of stochastic convective Brinkman-Forchheimer equations 427

Jafar Ahmadi, *Massoumeh Fashandi*: Symmetry-based characterizations of the exponential distribution 455
