Contents

1 Methodological Problem in Philosophy and Neuroscience 1
1.1 General Introduction 1
1.2 Metaphilosophy: Introduction and Analysis 7
1.3 The Philosophy of Neuroscience: Introduction and Analysis 17
1.3.1 Nature and Structure of Neuroscience 19
1.3.2 Concepts, Principles and Methods of Neuroscience 20
1.3.3 Traditional Issues of Philosophy and Neuroscience 21
1.3.4 Philosophy of Neuroscience, Relationship with Other Areas of Philosophy and New Research Areas 22
1.4 Brief Introduction to Neuroscience 26
References 28

2 Methodological Isolationism 33
2.1 Isolationism Approach 34
2.1.1 Concepts Precede Facts 36
2.1.2 Wittgenstein's Influence 46
2.1.3 Example of an Isolationist Examination: Determinism 47
2.1.4 Several Defences of the Isolationist Approach 56
2.2 Critical Reflection 58
2.2.1 The "Conceptual Invariance" Objection 58
2.2.2 Dennett's Objection 61
2.2.3 Searle's Objection 70

2.2.4 The Objection to "Philosophical Practice and Anti-Exceptionality" 75
2.3 Conclusion 78
References 78

3 Reductive Neurophilosophy 83
3.1 Assumptions of the Reductive Approach 84
3.1.1 Denial of Dualism 84
3.1.2 The Concept of Reductionism 85
3.1.3 Reduction in Patricia Churchland 95
3.1.4 Theory of Folk Psychology 100
3.1.5 Reduction in John Bickle 104
3.1.6 The Theory of Intertheoretical Reduction 108
3.2 Critical Reflection 113
3.2.1 The "Non-Theory" Objection 113
3.2.2 The "Multiple Realizability" Objection 116
3.2.3 The Objection of "Ontological Reduction" 119
3.2.4 The Objection of "Methodological Isolationism" 121
3.2.5 The Metaphilosophical Objection 123
3.3 Conclusion 128
References 129

4 Neurophenomenology 133
4.1 Assumptions of the Neurophenomenology Approach 134
4.1.1 Phenomenology 134
4.1.2 The Importance of the Body and Criticism of the Brain 138
4.1.3 The 4E's and Francisco Varela's Neurophenomenological Approach 141
4.1.4 An Example of Neurophenomenological Research: The Case of "Binocular Rivalry" 150
4.1.5 The Self in Evan Thompson 153
4.1.6 Three Pragmatic Lessons for a Rigorous Neurophenomenology 156
4.2 Critical Reflection 161
4.2.1 The "Explanatory Gap" Objection 161
4.2.2 The "Introspection" Objection 164

4.2.3 The "Reductionist Accusation" Objection 168
4.2.4 The Objection of "Inconclusive Metaphilosophy" 170
4.3 Conclusion 176
References 177

5 Non-Reductive Neurophilosophy 181
5.1 Assumptions of the Non-Reductive Approach 182
5.1.1 Methodological Balance 182
5.1.2 Methodological Strategies of Neurophilosophy 183
5.1.3 The Nature and Metaphilosophy of the Neurophilosophical Hypothesis 194
5.2 Critical Reflection 213
5.2.1 Objection of the "Category and Modality Error" 213
5.2.2 Objection of "Methodological Irrelevance" 215
5.2.3 Objection of "Inaccurate Metaphilosophy" 218
5.3 Conclusion 227
References 227

6 *Qualia* and Information in Philosophy and Neuroscience 233
*6.1 Concept of "*Qualia*"* 233
6.1.1 The Isolationist Approach and Qualia 237
6.1.2 The Reductionist Approach and Qualia 244
6.1.3 The Neurophenomenology Approach and Qualia 252
6.1.4 The Non-Reductive Neurophilosophy Approach and Qualia 257
6.2 Concept of "Information" and the Various Approaches 265
6.3 Conclusion 271
References 272

Conclusion 277
