Foreword ix

Preface xi

PART I: HISTORICAL BACKGROUND AND THEORY

1. Basics 3
- 1.1 Historical Background 3
- 1.2 Basic Principles of Laser Generation 5
- 1.3 Light and Laser 11
- 1.4 Delivery Systems 13
- 1.5 Laser/Tissue Interaction 14
- 1.6 Beginnings of Photobioactivation 18

2. Laser Parameters and the Power Concept 19
- 2.1 Inherent Parameters 19
- 2.2 User-controlled Parameters 23
- 2.3 Quantification of Parameters 25
- 2.4 Reversible and Irreversible Photobioreactions 25
- 2.5 Photoactivation and the Arndt–Schultz Law 27

3. Photobioactivation 32
- 3.1 LLLT Photobiology: Mechanisms and Pathways 33
- 3.2 Basic *In Vivo* Research in LLLT 37

4. Contact and Non-contact Techniques in LLLT 63
- 4.1 History of LLLT 63
- 4.2 Non-contact Technique 64
- 4.3 Contact Technique 64
- 4.4 Combination Technique 65

PART II: CLINICAL APPLICATIONS OF NON-CONTACT LLLT

5. Theoretical Considerations of the Non-contact Technique 69
- 5.1 Static Technique 69
- 5.2 Scanning Technique 69

6. Practical Applications of Non-contact LLLT in Various Fields 71
- 6.1 Laser Acupuncture Anaesthesia 71
- 6.2 Low Level Laser Therapy in Veterinary Practice on Standardbred Horses 77

STÁTNÍ LÉKAŘSKÁ KNIHOVNA PRAHA

PART III: CLINICAL APPLICATIONS OF CONTACT LLLT

7. Theoretical Considerations of the Contact Technique 83

8. Practical Applications of the Contact Technique 86
8.1 Objective Evaluation of the Diode Laser in the Revitalization of Failing Grafts and Flaps 86
8.2 Colour Abnormality 91
8.3 Configurational Abnormalities 104
8.4 Allergies 109
8.5 Pain 110

PART IV: LASER SAFETY AND INSTRUMENTATION IN LLLT

9. Safety with LLLT 119
9.1 Potential Hazards 120

10. LLLT: Current Instrumentation 123

11. LLLT: What the Future Holds 127
11.1 LLLT and Cancer Pain 127
11.2 LLLT and Autoimmunology 127
11.3 LLLT and Selective Photochemotherapy 128
11.4 LLLT and Dentistry 128
11.5 LLLT and Cosmetic Surgery 128
11.6 LLLT and Senile Dementia 128
11.7 Conclusions 129

References and Bibliography 131
