Contents

1 **Morphometric Analysis of the Gas Exchange Region of the Lung**
Peter Gehr and James D. Crapo

43 **Structure of the Gas Exchange Region of the Lungs Determined by Three-Dimensional Reconstruction**
Robert R. Mercer and James D. Crapo

71 **Cell Populations and Structure-Function Relationships of Cells in the Airways**
Judith A. St. George, Jack R. Harkema, Dallas M. Hyde, and Charles G. Plopper

103 **Modeling of the Upper and Lower Respiratory Systems**
Amit L. Patra

117 **Imaging Techniques for Application to Lung Toxicology**
Victor L. Roggli and Arnold R. Brody

147 **Approaches to Lung Function Assessment in Small Mammals**
Daniel L. Costa and Jeffrey S. Tepper

175 **Human Clinical Inhalation Exposures: Experimental Design, Methodology, and Physiological Responses**
Lawrence J. Folinsbee

201 **Antioxidant Defense Mechanisms of the Lung**
Edward J. Massaro, Elaine C. Grose, Gary E. Hatch, and Ralph Slade

219 **Isolation and Culture of Alveolar Type II Cells for Toxicological Studies**
Stephen R. Rannels and D. Eugene Rannels

239 **Use of Bronchoalveolar Lavage to Detect Lung Damage**
Rogene F. Henderson

269 **Effects of Airborne Pollution on Endothelial Cell Metabolism**
Mitchell Friedman

285 **Cell and Organ Culture Models of Respiratory Toxicity**
Gerald L. Fisher and Michael E. Placke

315 **Chemically Induced Toxicity in Cultured Respiratory Tract Epithelium from Animals and Humans**
Vernon E. Steele and Daniel L. Morgan

323 **Effects of Mineral Fibers on the Lung and Surrounding Mesothelium**
Lalita D. Palekar

351 **Activation of Mononuclear Phagocytes by Xenobiotics of Environmental Concern: Analysis and Host Effects**
Dolph O. Adams, James G. Lewis, and Jack H. Dean

375 **Immunological Responses Following Inhalation Exposure to Chemical Hazards**
Linda M. Thurmond and Jack H. Dean

407 **Immune Reactions in the Pulmonary System**
Patrick J. Haley and David E. Bice

427 **Pulmonary Hypersensitivity and Hyperreactivity: Implications for Assessing Allergic Responses**
Meryl H. Karol and Peter S. Thorne

449 **Physiologically Based Approaches for Examining the Pharmacokinetics of Inhaled Vapors**
Michael L. Gargas and Melvin E. Andersen

477 **Absorption of Inhaled Reactive Gases**
John H. Overton and Frederick J. Miller

509 **Subject Index**
