Contributors xi

Preface
Ananda S. Prasad xvii

Acknowledgments xxi

ZINC

Clinical Spectrum and Diagnostic Aspects of Human Zinc Deficiency
Ananda S. Prasad 3

Zinc and the Gastrointestinal System
Craig J. McClain, Linas Adams, and Steve Shedlofsky 55

Zinc Deficiency and the *E. gracilis* Chromatin
Kenneth H. Falchuk 75

COPPER

Regulation of Copper Balance and Its Failure in Humans
George J. Brewer, Vilma A. Yuzbasiyan, Vasantha Iyengar,
Gretchen M. Hill, Robert D. Dick, and Ananda S. Prasad 95

Biochemical Functions of Copper in Animals
Joseph R. Prohaska 105

Copper in Human Serum in Normal and Pathological States
Bibudhendra Sarkar 125

Regulatory Mechanisms for Intestinal Transport of Zinc and Copper
James E. Hoadley and Robert J. Cousins 141

IRON

A Discussion of Body Iron Exchange
Clement A. Finch 159

Cannulated Swine and In Vitro Approaches to Iron Bioavailability
Manju B. Reddy, Elizabeth J. Browder, and George W. Bates 173

CHROMIUM

Recent Advances in the Role of Chromium in Human Health and Diseases
Richard A. Anderson 189

SELENIUM

Clinical, Physiological, and Biochemical Consequences of Human Selenium Deficiency
Harvey J. Cohen, Marilyn Brown, Jane Lyons, Nelly Avissar, David Hamilton, and Patricia Liegey 201

The Relationship of Selenium Biochemistry to Selenium-Responsive Disease in Man
Anthony T. Diplock and Farooq A. Chaudhry 211

FLUORIDE

Fluoride Metabolism in Humans
Juan M. Navia, Luis Aponte-Merced, and Komson Punyasingh 229

MANGANESE

Manganese Homeostasis in Humans and Its Role in Disease States
Murray Korc 253

ULTRATRACE ELEMENTS

Possible Future Implications of Ultratrace Elements in Human Health and Disease
Forrest H. Nielsen 277

TRACE ELEMENTS AND IMMUNITY

Impact of Zinc Deficiency on Immune Function: A Role for the Neuroendocrine System
Pamela J. Fraker, Carmen A. Medina, and Gang Li 295

Impairment of Immune Function in the Elderly: Association With Mild Zinc Deficiency
Joseph Kaplan, Joseph W. Hess, and Ananda S. Prasad 309

The Role of Zinc in the Biological Activity of Thymulin, a Thymic Metallopeptide Hormone
Jean-François Bach, Jean-Marie Pleau, Wilson Savino, Jean-Pierre Laussac, Manh-Thong Cung, Pierre Lefrancier, and Mireille Dardenne 319

Thymulin and Zinc Deficiency
Mireille Dardenne, Salimata Wade, Wilson Savino, Bernadette Nabarra, Ananda S. Prasad, and Jean-François Bach 329

Trace Element Regulation of Immunity and Infection: Quantitative Considerations for Optimum Immunity
Ranjit Kumar Chandra 337

METALLOTHIONEIN

Metallothionein: A Multigene Protein
Peter E. Hunziker and Jeremias H.R. Kägi 349

Metallothionein as an Indicator of Zinc Status
Ian Bremner and James N. Morrison 365

Metallothionein: Structure and Metal Cluster Stability
Dennis R. Winge, Jonathan Byrd, and Abby R. Thrower 381

Metallothionein Structure and Function in Regulating the Trace Element in Humans
Robert Chiu, Richard Imbra, Masayoshi Imagawa, and Michael Karin . . . 393

FREE RADICALS AND TRACE ELEMENTS

Trace Elements and Free Radicals in Health and Disease
Mohamed Abdulla 409

Modulation of Peroxidative Injury by Dietary Trace Elements: Cadmium Cardiotoxicity as a Model
I. Siraj Jamall 415

Selenium, Vitamin E, Free Radicals, and Muscle Disease
M.J. Jackson and R.H.T. Edwards 431

TRACE ELEMENTS AND CANCER CHEMOTHERAPY

Trace Elements as Useful Tools for Cancer Chemotherapy
Nobumasa Imura, Akira Naganuma, Masahiko Satoh, and Jui-Tung Chen 443

TRACE ELEMENTS IN PARENTERAL NUTRITION

Zinc in Total Parenteral Nutrition
Stephen L. Wolman 459

Copper in Parenteral Nutrition: Deficiency Metabolism and Requirements
Moshe Shike 469

Selenium and Chromium Requirements During Intravenous Nutrition
Alan Shenkin, Gordon S. Fell, and David J. Halls 479

MICRONUTRIENT INTERACTIONS

Interactions Among Trace Elements
C.H. Hill 491

The Intestinal Interaction of Zinc and Iron in Humans: Does It Occur With Food?
Peter R. Flanagan and Leslie S. Valberg 501

The Iron: Zinc Interaction in the Human Intestine. Does It Exist? An Affirmative View
Noel W. Solomons 509

TECHNIQUES FOR ASSESSMENT OF TRACE ELEMENT STATUS

Is There a Need for Simultaneous Multi-Element Analytical Techniques in Clinical Chemistry?
G.S. Fell and D.T.B. Lyon 521

Accuracy in Trace Element Analysis
Wayne R. Wolf 533

Trace Element Research with Stable Isotope Tracers
Morteza Janghorbani, Bill T.G. Ting, and Steven H. Zeisel 545

TOXIC ELEMENTS

Cadmium Toxicity in Humans
Lars Friberg and Carl-Gustaf Elinder 559

Health Effects of 6 Years Dietary Cadmium (Cadmium-contaminated Rice) in Monkeys
Kazuo Nomiyama and Hiroko Nomiyama 589

Toxicology of Inorganic Lead
Staffan Skerfving 611

Mercury Toxicity
Thomas W. Clarkson 631

Aluminum Toxicity in Humans
Sivarama S. Krishnan, Donald R. McLachlan, Arthur J. Dalton, Bhuma Krishnan, Stanley S.A. Fenton, Joan E. Harrison, and Theo Kruck 645

Index 661
