Contents

1 Introduction to law and corporate finance
Rolef de Weijs 1

1.1 Relevance of finance for lawyers 1
1.2 Introduction of the limited liability company 2
1.3 Corporate finance inherently a multi-party setting 3
1.4 Structure of this book and contribution to the fields of law and finance 5
1.5 Methods used: financial mindmap, comparative law and expected value analysis 9
1.5.1 Financial mindmap 9
1.5.2 Comparative law analysis, functional approach 11
1.5.3 Expected monetary value analysis 11
1.6 Ambition of this book 14

2 Does leverage create value?
Rolef de Weijs 15

2.1 Leveraged finance 15
2.2 General effects of leveraged finance 15
2.3 Corporate finance theory 18
2.4 Value creation for shareholders by non-interest bearing trade finance 21
2.5 Leveraged finance and value creation for shareholders by tax shield 24
2.6 Hybrid finance: shareholder as creditor 29
2.6.1 From return realised to expected return 32
2.6.2 Increase in ROE by means of hybrid finance 37
2.7 Conclusion 44

3 Corporate finance and company valuation: why cash became king
Joost de Vries and Rolef de Weijs 45

3.1 Introduction: corporate finance and company valuation 46
3.2 Accounting perspective: connection between the balance sheet and the profit and loss statement 47
3.3 From the accountant perspective to corporate finance perspective: the difference between the Enterprise Value and Equity Value 50
3.3.1 The difference between Enterprise Value and Equity Value: Net Debt 50
3.3.2 Difference between an accounting balance sheet and a corporate finance balance sheet: interest bearing vs non-interest bearing instead of duration 52
3.4 EBITDA-multiple as a rough valuation method for the Enterprise Value 54
3.4.1 EBITDA: definition and use 54

3.4.2 Example of an EBITDA-multiple valuation 57
3.4.3 Which EBITDA should be used as a starting point? 59
3.4.4 When to use a high and when to use a low EBITDA-multiple 59
3.4.5 Limitations of using EBITDA-multiples 60
3.4.6 Intermezzo: impact of IFRS 16 on the balance sheet, EBITDA, valuation and banking ratios 61
3.5 Discounted cash flow (DCF) method as a sophisticated valuation method for Enterprise Value 63
3.5.1 Main points of DCF valuation on the basis of a stylised example 63
3.5.2 Differences between an EBITDA-multiple and DCF 67
3.6 Net Debt: concept and corrections 68
3.6.1 Why are non-interest bearing debts not included in Net Debt? 68
3.6.2 Corrections to Net Debt related to aggressive working capital management 70
3.6.3 Working capital corrections and closing mechanism: locked box vs closing accounts 75
3.6.4 Don't suppliers process longer payment terms (longer DPO) into their rates? 75
3.6.5 Effects of increasing prices to compensate for loss of interest 76
3.7 Structuring takeovers: debt pushdown to target 77
3.7.1 Debt pushdown: takeover debt lands at level of target 79
3.7.2 How much bank debt? Banking ratios for (acquisition) financing 84
3.8 Conclusions 88

4 Discounted cash flow valuation and indirect cash flow analyses: retracing the cash
Joost de Vries 90

4.1 Introduction: discounted cash flow method as the most frequently used form of company valuation 91
4.1.1 Company valuation 91
4.1.2 Building blocks of company valuation: Enterprise Value, Equity Value and Net Debt 92
4.1.3 Main features of discounted cash flow valuation 95
4.2 Which cash flow? From indirect cash flow to free cash flow to firm 96
4.2.1 The operational cash flow (step 1 of the indirect cash flow) 102
4.2.2 The investment cash flow: CAPEX (step 2 of the indirect cash flow) 113
4.2.3 The financial cash flow (step 3 of the indirect cash flow) 116
4.2.4 Intermezzo: interpretation of cash movements 119
4.2.5 From indirect cash flow to free cash flow to firm 120
4.3 How to determine the WACC? 126
4.3.1 Weighted average cost of capital 128
4.3.2 WACC component: cost of equity 129
4.3.3 WACC component: cost of debt 131
4.4 How to determine the continuing value? 133
4.4.1 Simple perpetual approach/Gordon growth formula 133
4.4.2 Key Value Driver formula 135
4.5 Valuation based on DCF while identifying limitations and sensitivities 136

4.6 Summary of DCF valuation as performed and reflection 137
4.7 Conclusion 139

5 Secured credit and its use: distinguishing between productive and non-productive credit
Rolef de Weijs 140

5.1 Introduction 140
5.2 The role of secured credit in leveraged finance 142
5.2.1 General effects of leveraged finance 142
5.2.2 Corporate finance theory: Modigliani and Miller 145
5.3 Discussions on secured credit: the puzzle and pleas for partial priority 147
5.3.1 MM applied to secured credit: (dis)solving the puzzle 147
5.3.2 Partial priority as a response to *non-adjusting creditors* 149
5.3.3 Praise for secured credit and full priority 152
5.4 Productive vs unproductive secured credit 155
5.4.1 Productive credit: facilitating investments and economic growth 155
5.4.2 Non-productive credit: credit facilitating leveraged finance 157
5.4.3 Macro-economic counterproductive high debt levels 164
5.5 Positive effects of partial priority 164
5.5.1 Preventing empty estates 165
5.5.2 Creditor protection 166
5.5.3 Trade creditors' specialisation in line with basic capitalism 169
5.5.4 Protection against too reorganisation friendly insolvency laws 170
5.6 Conclusion 172

6 Hybrid finance by means of shareholder loans
Rolef de Weijs 174

6.1 Introduction 174
6.2 Shareholder loans and shifts in expected monetary value 175
6.2.1 Baseline scenario and its expected monetary value assessment 176
6.2.2 Secured shareholder loan financed combined assessment 181
6.2.3 Secured shareholder loan financed broken down into two parts 185
6.3 Comparative overview of treatment of shareholder loans 187
6.3.1 Systems with a subordination rule 187
6.3.2 Systems without subordination rules 189
6.4 Arguments in favour of subordination of shareholder loans 191
6.4.1 At odds with corporate law and creating poor corporate governance 191
6.4.2 Undermining insolvency law 193
6.4.3 Unfair to non-adjusting creditors and at odds with contracting practice 196
6.5 Arguments against general subordination 199
6.5.1 Freedom of contract 199
6.5.2 Alignment of interest by means of shareholder loans 200
6.5.3 At odds with relaxed capital requirements 205
6.5.4 Risk of underinvestment: preventing desirable rescue attempts 206
6.5.5 Subordination superfluous in light of tort law? 222

6.6 The trade-off 223
6.7 Conclusion 226

7 Financing through shareholder guarantees
Aart Jonkers 228

7.1 Introduction 228
7.2 Two types of shareholder guarantees 230
7.3 The economics of shareholder guarantees 231
7.4 Problematic aspects (1): opaque priority structures 233
7.4.1 Opaque seniority through guarantees 234
7.4.2 Justification for selective perforation of limited liability? 239
7.4.3 Justification for priority analogous to real security rights? 250
7.4.4 Justification for strong-form double proof and deficiency double proof? 252
7.4.5 The shareholder guarantee as an indirect shareholder loan 255
7.4.6 Summary 257
7.5 Problematic aspects (2): covert insider dealing 257
7.5.1 Preferences in the twilight zone 258
7.5.2 Subtler forms of opportunism: feeding the lien, inefficient investment attitudes, inefficient bankruptcy filing 260
7.5.3 The inefficiency of creditor control through guarantees 262
7.5.4 Control through guarantees is more problematic than through real security rights 264
7.5.5 Regulation in German law 265
7.5.6 Regulation in US law 267
7.5.7 Regulation in English law 269
7.5.8 Summary 270
7.6 Conclusion 271

8 Reorganisation procedures
Aart Jonkers and Rolef de Weijs 272

8.1 Introduction 272
8.2 Different legal responses to insolvency: from liquidation to reorganisation 273
8.3 Benefits and risks associated with reorganisation procedures 277
8.3.1 Upside of forced reorganisation procedures: capture the 'going concern value' by overcoming hold-out behaviour 277
8.3.2 Downsides and risks related to reorganisation procedures 279
8.4 Reorganising the capital structure under different priority rules 281
8.4.1 Priority Rule issues and creditor democracy 281
8.4.2 Cross-class cram-down by court order: protection by means of APR 282
8.4.3 Deviations from absolute priority 285
8.4.4 Alternative Priority Rule: EU RPR 287
8.4.5 The relevance of the Priority Rule 289
8.5 Relation of rules on plan content and initiative rights: who submits a plan? 294
8.6 Different rules for (S)SME? 295
8.7 Conclusion 296
