Contents

Alikova V., Chernova A., Shormanov V., Korotkova E.: *Determination of 2-methoxyphenol in model solutions by spectrophotometry* 1
Böhm D., Matysik F.-M.: *The effects of linearly assembled capillaries with various inner diameters on capillary electrophoresis* 6
Porada R., Baś B.: *Voltammetric determination of vitamins* 13
Baluchová S., Klouda J., Barek J., Schwarzová-Pecková K., Wong D.K.Y.: *Dopamine detection at antifouling conical-tip carbon electrodes* 19
Tvorynska S., Barek J., Josypčuk B.: *A comparative study of covalent glucose oxidase and laccase immobilization techniques at powdered supports for biosensors fabrication* 25
Heigl N., Matysik F.-M.: *Capillary flow injection analysis with electrochemical detection for carbohydrate analysis* 31
Kravchenko A.V., Kolobova E.A., Kartsova L.A.: *Application of covalent coatings based on imidazolium cations for separation and on-line preconcentration of basic and neutral analytes in capillary electrophoresis* 35
Efremenko E., Chernova A., Bastrygina O.: *Determination of vanillin in smoking mixtures by spectrophotometry* 41
Pietrzak K., Wardak C.: *Uranyl ion-selective electrode with solid contact* 45
Plotnikova K., Dubenska L., Zeleny I.: *Polarographic determination of metronidazole and oxytetracycline hydrochloride in veterinary drug for honey bees* 51
Deev V., Bessonova E., Kartsova L.: *Application of microextraction techniques combined with chromatographic methods for the analysis of complex objects* 57
Král M., Dendisová M., Matějka P.: *The development of reference probe system for tip-enhanced Raman spectroscopy* 63
Choińska M., Hrdlička V., Redondo B.R., Barek J., Navrátil T.: *Determination of heavy metal poisoning antidote 2,3-dimercapto-1-propanesulfonic acid using silver solid amalgam electrode* 70
Vymyslický F., Křížek T., Heřt J.: *Canagliflozin oxidation study using electrochemical flow cell and comparison with hydrogen peroxide oxidation* 76
Augustín M., Vyskočil V.: *Novel hybrid electrochemical DNA biosensor for monitoring oxidative DNA damage via oxidation/reduction signals of low molecular weight double-stranded DNA* 83
Sagapova L., Kodríková B., Svoboda M., Musil S., Kratzer J.: *Chemical vapor generation of cadmium for analytical atomic spectrometry* 90
Štádlerová B., Vyhnanovský J., Dědina J., Musil S.: *Photochemical vapour generation of bismuth coupled with atomic fluorescence spectrometry* 97
Čokrtová K., Křížek T.: *Separation of liquid crystals using non-aqueous capillary electrokinetic chromatography* 104
Ondráčková A., Stiborová M., Havran L., Schwarzová-Pecková K., Fojta M.: *Electrochemistry of Sudan I and its derivates in aqueous media* 110
Burkin K., Galvidis I., Burkin M.: *Group detection of aminoglycosides using ELISA for control of food contamination* 116
Vyhnanovský J., Musil S.: *Photochemical vapor generation of cobalt for detection by inductively coupled plasma mass spectrometry* 123
Lipińska J., Madej M., Baś B., Tyczkowski J.: *Optimization of condition for cold plasma deposition of thin layers for surface modification of working electrodes* 129
Korban A.: *Advanced GC-MS method for quality and safety control of alcoholic beverages* 135
Baroch M., Dejmková H., Sládková Š.: *Utilization of a carbon felt as a material for working electrodes* 141
Benešová L., Zárybnická A., Klouda J., Schwarzová-Pecková K.: *Electroanalytical methods for determination of 7-dehydrocholesterol in artificial serum* 146
