

I.	Introduction	9
I.1	Definition of public realm and public space	12
II.	Objective, nature and application of the document	15
III.	Current state of the public realm	17
IV.	Starting points and objectives of designing public space	23
IV.1	Starting points of the public space design process	23
IV.2	Role of the public realm and public space in the city as a whole	25
IV.3	Target public space quality criteria	26
IV.4	Basic public space quality framework	27
IV.5	Examples of the key attributes of high-quality public space	28
IV.6	Basic theses of quality of the public realm and public space	30
IV.7	Basic theses of the tools for achieving quality in the public space design process	31
V.	Process of designing, managing and using public space	35
V.1	Stakeholders in the process	36
V.2	Specific levels of the process	38
V.2.1	Public space development strategy and planning	38
V.2.2	Management and maintenance	42
V.2.3	Economy of public space	44
V.2.4	Data collection, systematic evaluation and implementation of experience into practice	45
V.2.5	Procedural support of "bottom-up" activities in using public space	46
VI.	Annex	49
VI.1	City creation processes / Investment in construction and development	51
VI.2	Investment in construction and development	52
VI.3	Overview of legislation protecting public interests / Overview of the most important administrative bodies concerned	54
VI.4	Basic diagram showing the investment process with public law implications	56
VI.5	Levels of public involvement and influence (according to Patterson Kirk Wallace)	57
VI.6	Bodies involved in the city/town creation process (urban planning)	58
VI.7	Tools for forming (public) interest in connection with the city/town creation process (urban planning) by group	59
VI.8	Application of interests and tools	60
