1	Introduction	1
1.1	Emotional Meaning	1
1.2	Motivation	2
1.3	Objectives	3
1.4	Roadmap	4
1.5	Typographical Conventions	5
2	Theoretical Background	7
2.1	Linguistic Approaches	7
2.1.1	Pragmatics	7
2.1.2	Lexicon and Grammar	10
2.1.3	Stylistics	12
2.1.4	Crosslinguistic Comparison	13
2.1.5	Integration Approach	13
2.2	Computational Approaches	14
2.2.1	Subjectivity Lexicons	14
2.2.2	Morphosyntax	15
2.2.3	Neural Networks	15
2.2.4	Other Studies	16
2.3	Data Resources	16
I	Linguistic Structure	19
3	Lexical Aspects	21
3.1	Inherently Emotional Lexical Forms	22
3.1.1	Augmentatives	22
3.1.2	Diminutives	23

3.1.3	Vulgarisms	24
3.1.4	Other Inherently Emotional Lexemes	26
3.2	Adherently Emotional Lexical Forms	27
3.2.1	Expressions with Twofold Polarity	27
3.2.2	Euphemisms	28
3.2.3	Idioms and Phrasemes	29
3.3	Alternative Ways to Express Opinion	30
3.4	Named Entites	31
4	Morphosyntactic Aspects	33
4.1	Part of Speech Influence on Emotional Structure	33
4.2	Emotional Meaning Expressed by Particular Grammatical Categories	36
4.3	Syntactic Patterns of Basic Emotional Structures	37
4.4	Compound Emotional Sentences	39
4.4.1	But-clauses and And-clauses	39
4.4.2	Concessive Clauses	40
4.4.3	Conditional clauses	41
4.5	Text-level	41
4.6	Negation and Evaluation	42
5	Semantic Aspects	47
5.1	Emotional Verbs	47
5.1.1	Semantic Patterns of Emotional Verbs	48
5.1.2	Semantic Classes of Emotional Verbs	53
5.2	Emotional Meaning and Discourse Structure	54
5.2.1	Discourse Connectives	55
5.2.2	Attitude Markers	57
5.2.3	Coreference Relations	57
6	Pragmatic Aspects	59
6.1	Context	59
6.2	Irony and Sarcasm	60
6.3	Speech Acts	61
6.4	Conversational Maxims	63

7	Formal Representations of Emotional Structures	65
7.1	Prague Dependency Treebank	65
7.1.1	Annotating Emotional Structures in Prague Dependency Treebank .	66
7.2	Construction Grammar	70
II	Computational Applications	73
8	Creating Evaluative Resources	75
8.1	Czech Subjectivity Lexicon	75
8.1.1	Building the Original Version	75
8.1.2	Refining the Lexicon	76
8.2	Manually Annotated Data	77
8.2.1	Annotation Practice	77
8.2.2	Datasets	78
8.3	Other	84
8.4	Annotation Evaluation and Results	85
9	Sentiment Analysis	87
9.1	Related Work	88
9.2	Sentence Level Polarity Detection in Czech	89
9.2.1	Naive Bayes Classifier	91
9.2.2	Lexicon-based Classifier	92
9.2.3	SubLex-based Classifier	95
9.3	Opinion Target Identification	106
9.3.1	Target Identification in English	106
9.3.2	Target Identification in Czech	112
9.3.3	Target Identification Using Recurrent Neural Networks	113
III	Conclusion	119
10	Summary	121
11	Future Work	123

IV	Appendices	125
A	Data Overview	127
B	Annotation Guidelines	129
B.1	Aktualne.cz	129
B.1.1	First Round	129
B.1.2	Second Round	130
B.2	CSFD.cz	131
B.3	Mall.cz	133
B.4	Facebook.com	133
B.5	SemEval2014	133
B.6	Alza.cz	133
B.7	SemEval2016	134
C	Computational Basics	135
C.1	Cohen's kappa	135
C.2	Accuracy, Precision and Recall	135
C.3	F-score	136
C.4	Naive Bayes Classifier	136
C.5	Maximum Entropy Classifier	137
C.6	Conditional Random Fields	137
C.7	Cross-validation	138
D	TrEd Extension	139
	List of Figures	141
	List of Tables	143
	List of Abbreviations	145
	Bibliography	147
