

# Bibliography

Even within the Leonina edition, Aquinas's name is not always rendered in the same way. For the sake of avoiding the interference of this fact, I have skipped the author's name in the following list of the Latin editions of Aquinas's works that I have used during my work on this book. As for those translations of them that I have used too, they are listed in the next section together with the secondary literature and the other texts that were not written by Aquinas. In this second section, also for clarity's sake, all the names of premodern authors are rendered in their traditional English version, independently of their form in the language of the edition that I have used. The websites used are listed in the third section.
