Parazitolog Robert Desowitz napsal několik známých knih o parazitech, a to z poněkud odbornějšího hlediska, než z jakého je napsána tato kniha (viz Desowitz, 1983; Desowitz, 1991; Desowitz, 1997). Pokud hledáte čtivou podrobnou parazitologickou příručku (podobnou té, jaká se objevuje v epitafu od Huntera Thompsona), přečtěte si knihu, kterou napsali Roberts a Janovy (2000). Stručný přehled evoluce a ekologie parazitů najdete v knize Poulina (1998). Mark Ridley mluví o účincích pohlavního výběru, včetně červené královny, v knize stejného jména (Ridley, 1993).
