

Literatura

- [1] ITU-T G.691: Optical interfaces for single-channel SDH systems with Optical Amplifiers, and STM-64 systems. ITU-T, Geneva 2000
- [2] ITU-T G.692: Optical interfaces for multichannel systems with optical amplifiers. ITU-T, Geneva 1998
- [3] ITU-T G.703: Physical/electrical characteristics of hierarchical digital interfaces. ITU-T, Geneva 1998
- [4] ITU-T G.707: Network node interface for the Synchronous Digital Hierarchy (SDH). ITU-T, Geneva 2000
- [5] ITU-T G.708: Sub STM-0 network node interface for SDH. ITU-T, Geneva 1999
- [6] ITU-T G.709: OTN - Network node interface. ITU-T, Geneva 2000
- [7] ITU-T G.783: Characteristics of Synchronous Digital Hierarchy (SDH) equipment functional blocks. ITU-T, Geneva 2000
- [8] ITU-T G.803: Architectures of transport networks based on the Synchronous Digital Hierarchy (SDH). ITU-T, Geneva 2000
- [9] ITU-T G.805: Generic functional architecture of transport networks. ITU-T, Geneva 1995
- [10] ITU-T G.811: Timing requirements at the outputs of primary reference clocks suitable for plesiochronous operation of international digital links. ITU-T, Geneva 1988
- [11] ITU-T G.812: Timing requirements at the outputs of slave clocks suitable for plesiochronous operation of international digital links. ITU-T, Geneva 1988
- [12] ITU-T G.813: Timing characteristics of SDH equipment slave clocks (SEC). ITU-T, Geneva 1996
- [13] ITU-T G.823: The control of jitter and wander within digital networks which are based on the 2048 kbit/s hierarchy. ITU-T, Geneva 1993
- [14] ITU-T G.825: The control of jitter and wander within digital networks which are based on the synchronous digital hierarchy (SDH). ITU-T, Geneva 1998
- [15] ITU-T G.831: Management capabilities of transport networks based on Synchronous Digital Hierarchy (SDH). ITU-T, Geneva 2000
- [16] ITU-T G.841: Types and characteristics of SDH network protection architectures. ITU-T, Geneva 1998
- [17] ITU-T G.871: Framework for optical transport networks. ITU-T, Geneva 2000
- [18] ITU-T G.872: Architecture of optical transport networks. ITU-T, Geneva 1999

- [19] ITU-T G.957: Optical interfaces for equipments and systems relating to the synchronous digital hierarchy. ITU-T, Geneva 1999
- [20] ITU-T X.224: Information technology – Open Systems Interconnection – Protocol for providing the connection-mode transport service. ITU-T, Geneva 1999
- [21] ITU-T X.721: Information technology – Open Systems Interconnection – Structure of Management Information - Definition of Management Information. ITU-T, Geneva 1999
- [22] ITU-R F.750: Architectures and functional aspects of radio-relay systems for SDH based networks. ITU-R, Geneva
- [23] International Standard 8473: Information Systems Processing - Data Communications - Protocol for providing the connection-less mode network service. ISO, Geneva 1988
- [24] RFC 1052: IAB Recommendations for the Development of Internet Network Management Standards. NRI IETF 1988
- [25] RFC 1155: Structure and Identification of Management Information for TCP/IP-based Internets. NWG IETF 1990
- [26] RFC 1156: Management Information Base for Network Management of TCP/IP-based internets. NWG IETF 1990
- [27] RFC 1157: A Simple Network Management Protocol (SNMP). NWG IETF 1990
