introduction **Why Study Biomechanics?** 1

What Is Biomechanics? 3 • What Are the Goals of Sport and Exercise Biomechanics? 3 • The History of Sport Biomechanics 11 • The Organization of Mechanics 12 • Basic Dimensions and Units of Measurement Used in Mechanics 13 • Summary 15

part I **External Biomechanics**

External Forces and Their Effects on the Body and Its Movement

chapter 1 **Forces** 19

Maintaining Equilibrium or Changing Motion

What Are Forces? 20 • Classifying Forces 21 • Friction 23 • Addition of Forces: Force Composition 27 • Resolution of Forces 34 • Static Equilibrium 38 • Summary 47

chapter 2 **Linear Kinematics** 49

Describing Objects in Linear Motion

Motion 50 • Linear Kinematics 51 • Uniform Acceleration and Projectile Motion 66 • Summary 78

chapter 3 **Linear Kinetics** 79

Explaining the Causes of Linear Motion

Newton's First Law of Motion: Law of Inertia 80 • Conservation of Momentum 82 • Newton's Second Law of Motion: Law of Acceleration 90 • Impulse and Momentum 95 • Newton's Third Law of Motion: Law of Action-Reaction 102 • Newton's Law of Universal Gravitation 103 • Summary 104

chapter 4 **Work, Power, and Energy** 105

Explaining the Causes of Motion Without Newton

Work 106 • Energy 109 • The Work–Energy Principle 111 • Power 120 • Summary 122

chapter 5 **Torques and Moments of Force** 123

Maintaining Equilibrium or Changing Angular Motion

What Are Torques? 124 • Forces and Torques in Equilibrium 131 • What Is the Center of Gravity? 136 • Summary 150

<u>chapter 6</u>	Angular Kinematics	153
	Describing Objects in Angular Motion	
	Angular Position and Displacement 154 • Angular and Linear Displacement 157 • Angular Velocity 158 • Angular and Linear Velocity 159 • Angular Acceleration 161 • Angular and Linear Acceleration 162 • Anatomical System for Describing Limb Movements 166 • Summary 177	
<u>chapter 7</u>	Angular Kinetics	179
	Explaining the Causes of Angular Motion	
	Angular Inertia 180 • Angular Momentum 186 • Angular Interpretation of Newton's First Law of Motion 189 • Angular Interpretation of Newton's Second Law of Motion 191 • Angular Impulse and Angular Momentum 192 • Angular Interpretation of Newton's Third Law of Motion 194 • Summary 197	
<u>chapter 8</u>	Fluid Mechanics	199
	The Effects of Water and Air	
	Buoyant Force: Force Due to Immersion 200 • Dynamic Fluid Force: Force Due to Relative Motion 203 • Summary 216	
part II	Internal Biomechanics	
	Internal Forces and Their Effects on the Body and Its Movement	
<u>chapter 9</u>	Mechanics of Biological Materials	219
	Stresses and Strains on the Body	
	Stress 220 • Strain 230 • Mechanical Properties of Materials: The Stress–Strain Relationship 232 • Mechanical Properties of the Musculoskeletal System 236 • Summary 241	
<u>chapter 10</u>	The Skeletal System	243
	The Rigid Framework of the Body	
	Bones 245 • Joints 248 • Summary 254	
<u>chapter 11</u>	The Muscular System	257
	The Motors of the Body	
	The Structure of Skeletal Muscle 258 • Muscle Action 261 • Muscle Contraction Force 266 • Summary 277	
<u>chapter 12</u>	The Nervous System	279
	Control of the Musculoskeletal System	
	The Nervous System and the Neuron 280 • The Motor Unit 281 • Receptors and Reflexes 284 • Summary 288	

part III **Applying Biomechanical Principles**

chapter 13 Qualitative Biomechanical Analysis to Improve Technique 293

Types of Biomechanical Analysis 294 • Steps of a Qualitative Biomechanical Analysis 295 • Sample Analyses 304 • Summary 317

chapter 14 Qualitative Biomechanical Analysis to Improve Training 319

Biomechanics and Training 320 • Qualitative Anatomical Analysis Method 321 • Sample Analyses 324 • Summary 336

chapter 15 Qualitative Biomechanical Analysis to Understand Injury Development 339

Mechanical Stress and Injury 340 • Tissue Response to Stress 342 • Mechanism of Overuse Injury 344 • Individual Differences in Tissue Threshold 345 • Intrinsic and Extrinsic Factors Affecting Injury 346 • Sample Analysis: Overuse Injuries in Running 349 • Summary 357

chapter 16 Technology in Biomechanics 359

Quantitative Biomechanical Analysis 360 • Measurement Issues 360 • Tools for Measuring Biomechanical Variables 363 • Summary 370

appendix: Units of Measurement and Conversions 371
