

Contents

1. INTRODUCTION	11
2. PROPERTIES AND FORMS OF POLYPROPYLENE FIBRES	14
2.1 Basic fibre types	14
2.2 Structure of propylene, polypropylene and polypropylene fibres	15
2.2.1 Terminology and definitions	15
2.2.2 Structure of polypropylene molecules	18
2.2.3 Molecular weight	22
2.2.4 Microstructure of polypropylene fibres	23
2.3 Physical and mechanical properties	28
2.3.1 The main physical methods of assessment	28
2.3.2 Determination of polypropylene fibres in blends	49
2.3.3 Important physical and mechanical properties of polypropylene fibres	51
2.3.4 Chemical properties and resistance to chemical agents	59
2.3.5 Biological resistance	60
2.3.6 Electrical properties, friction coefficient and handle	60
2.4 Fibre forms and uses	61
2.4.1 Standard staple fibres	62
2.4.2 Modified staple fibres	63
2.4.3 Bicomponent fibres	70
2.4.4 Textile continuous filament yarns	70
2.4.5 Industrial continuous filament yarns	73
2.4.6 Polypropylene tows for tufted carpets	74
3. STAPLE FIBRES AS BLEND COMPONENTS IN YARNS AND KNITTED AND WOVEN FABRICS	78
3.1 The theory of blending	78
3.1.1 Problems of blending	79
3.1.2 Intimate fibre blends in spun yarns	80
3.1.3 Fibre migration in yarns, yarn architecture	82
3.1.4 Summary of blending theories and concepts	84
3.2 Two-component cotton-type blended yarns from polypropylene, cotton and rayon blends used in knitted fabrics	86
3.2.1 Fibres used	89
3.2.2 The range of two-component blend yarns	89
3.2.3 Knitted fabrics from blend yarns	92
3.2.4 Uses of polypropylene staple fibres in cotton-like yarns and in knitted men's vests	94

3.3	Two-component intimate blends in wool-type yarns (wool-polypropylene and viscose rayon-polypropylene blends) for knitted products	95
3.3.1	Fibres used	96
3.3.2	The range of two-component blend yarns	96
3.3.3	Knitted fabrics	101
3.3.4	Uses of polypropylene staple in wool-type yarns for knitted outerwear	105
3.3.5	Two-component intimate blends in 50/50 wool/polypropylene fibres for knitted outerwear	112
3.4	Conclusions in respect of the use of cotton-type and wool-type yarns containing polypropylene staple in knitted underwear and outerwear	121
3.5	Two- and three-component wool-type blend yarns with polypropylene fibres in woven fabrics	121
3.5.1	Testing and evaluation of fibre blends in woven fabrics	122
3.5.2	Fabric appraisal and mathematical evaluation	123
3.6	Properties of yarns and fabrics containing high-shrink polypropylene fibres	134
3.6.1	Parameters characterizing the shrinking of high bulk yarns and knitted and woven fabrics	134
3.6.2	Testing yarn bulkiness	136
3.6.3	Blend yarns with high-shrink polypropylene fibres and their uses	139
3.6.4	Yarn bulking machines	140
3.6.5	Elastic properties and fatigue of high bulk yarns	143
3.6.6	Physiological properties of textile products containing high-shrink fibres	147
4.	PRODUCTION OF YARNS CONTAINING POLYPROPYLENE FIBRES	152
4.1	Production of wool-type yarns	152
4.1.1	Fibre properties from the viewpoint of wool spinning	153
4.1.2	Production of worsted-spun yarns	154
4.1.3	Production of woollen-spun yarn	162
4.2	Production of cotton-type yarns	167
4.2.1	Properties of polypropylene fibres from the viewpoint of cotton spinning	167
4.2.2	Traditional cotton spinning	169
4.2.3	Open-end spinning	179
4.2.4	Properties of yarns	180
4.3	Uses of cotton-type yarns	183
5.	CONVERSION OF YARNS CONTAINING POLYPROPYLENE FIBRES INTO WOVEN AND KNITTED FABRICS	184
5.1	Weaving	184
5.2	Knitting	190
6.	PROCESSING OF POLYPROPYLENE CONTINUOUS FILAMENT YARNS	192
6.1	Textile polypropylene filament yarns	192
6.1.1	Production and properties of polypropylene sewing threads	192
6.1.2	Texturized polypropylene filament yarns	196
6.2	Industrial polypropylene filament yarns	206
6.2.1	Yarn preparation	206
6.2.2	Weaving	207

7. POLYPROPYLENE TAPES	208
7.1 Tapes as textile yarns	208
7.1.1 Production of polypropylene tapes	210
7.1.2 Full-width drawing of films	221
7.1.3 Fibrillation of tapes and films	222
7.1.4 Splitting of tapes into continuous filaments	225
7.1.5 Heterocomponent tapes	230
7.1.6 Polypropylene in tape making	231
7.2 Types of tapes made from polymeric films	234
7.3 Properties of polypropylene tapes	235
7.3.1 Appearance	235
7.3.2 Strength and elongation	235
7.3.3 Shrinkage	236
7.3.4 Resistance to light and weathering	237
7.3.5 Resistance to chemicals and biological degradation	238
7.4 Textile products from polypropylene tapes	238
7.5 Textile processing of polypropylene tapes	239
7.5.1 Winding	239
7.5.2 Twisting and after-twisting	239
7.5.3 Weft winding	239
7.5.4 Warping	240
7.5.5 Weaving	240
7.5.6 Knitting	241
7.5.7 Finishing	241
8. DYEING OF POLYPROPYLENE FIBRES	243
8.1 Dope pigmentation	243
8.1.1 Dyestuffs	243
8.1.2 Dyeing methods	244
8.1.3 Conclusions	245
8.2 Surface dyeing	245
8.2.1 Dyeing of standard polypropylene fibres	245
8.2.2 Dyeing of modified polypropylene fibres	247
8.3 Conclusions	258
9. FINISHING OF TEXTILES CONTAINING POLYPROPYLENE FIBRES	261
9.1 Chemical finishes	261
9.1.1 Modification of polypropylene fibres by graft polymerization	261
9.1.2 Other chemical finishes	265
9.2 Mechanical and thermal finishes	272
9.2.1 Wool-type fabrics	272
9.2.2 Cotton-type fabrics	275
10. POLYPROPYLENE FIBRES IN THE PRODUCTION OF NONWOVENS	278
10.1 Conditions for the use of polypropylene fibres in nonwoven fabrics	279
10.2 High-shrink polypropylene fibres	280
10.3 Fibrous webs made directly from polymers	282
10.4 Prospective uses of polypropylene fibres in nonwovens	283
10.5 Examples of industrial applications of polypropylene fibres in nonwoven fabrics	283
10.5.1 Use as the face layer in needle-punched floorcoverings	283
10.5.2 Uses of polypropylene fibres in poromeric synthetic leathers	289

11. POLYPROPYLENE FIBRES IN HOUSEHOLD TEXTILES	309
11.1 Types of polypropylene fibres used in household textiles	309
11.1.1 Polypropylene staple	309
11.1.2 Fine tows	310
11.1.3 Fibres and yarns from films	310
11.2 Types, production and properties of yarns	311
11.2.1 Woollen spun yarns	312
11.2.2 Semiworsted types of yarns	312
11.2.3 Worsted types of yarns	313
11.3 Production and properties of woven and knitted household fabrics	314
11.3.1 Products from woollen spun yarns	314
11.3.2 Products from semiworsted types of yarns	315
11.3.3 Products from worsted types of yarns	315
11.3.4 Products from mechanically texturized low-denier tows	316
11.3.5 Products from jet texturized low-denier tows	317
11.3.6 Products from polypropylene tapes	318
11.3.7 Products from shrinkable and bicomponent fibres	320
11.3.8 Products containing filament yarns	321
11.4 Examples of uses of polypropylene fibres in the production of household textiles	322
11.4.1 Woven upholstery fabric	322
11.4.2 Woven upholstery fabric containing low-denier tow	322
11.4.3 Tufted carpet	324
11.4.4 Woven carpets	325
11.4.5 Woven and tufted blankets	331
 12. USES OF POLYPROPYLENE FIBRES IN INDUSTRIAL TEXTILES	 333
12.1 Felt-like fabrics	333
12.1.1 Woven papermaker felts	333
12.1.2 Needled papermaker felts	336
12.1.3 Woven industrial and filtration fabrics	339
12.1.4 Needled industrial and filtration fabrics	339
12.1.5 Industrial felts	339
12.1.6 Needled industrial felts	340
12.1.7 Finishing of needled felts	341
12.2 Other types of industrial fabrics	342
12.2.1 Wool-type fabrics	342
12.2.2 Cotton-type fabrics	342
12.2.3 Linen-type fabrics	343
12.2.4 Cables, nets, cords and other cordage goods	346
 13. USES OF POLYPROPYLENE FIBRES IN OUTERWEAR AND BEDDING	 349
13.1 Wool-type woven fabrics	349
13.1.1 Woven fabrics for outerwear	350
13.2 Cotton-type fabrics	352
13.2.1 Woven fabrics for outerwear	354
13.2.2 Other woven cotton-type fabrics	356
13.3 Knitted fabrics	356
13.3.1 Blends containing polypropylene staple fibres	356
13.3.2 Polypropylene filament yarns	357

14. THE USE OF POLYPROPYLENE FIBRES AND TAPES IN NARROW FABRICS, NETS AND BANDAGES	360
14.1 Webbing	360
14.2 Ribbons	361
14.3 Ruches	361
14.4 Nets	362
14.5 Bandages	364
15. MAKING-UP WOVEN AND KNITTED FABRICS	368
15.1 Properties of polypropylene fibres and production of apparel	368
15.2 Trimmings and sewing threads	369
15.3 Making-up woven fabrics	370
15.4 Making-up knitted fabrics	372
16. MAINTENANCE OF FABRICS WITH POLYPROPYLENE FIBRES	373
16.1 Dry-cleaning	373
16.1.1 Technology of dry-cleaning	373
16.1.2 Dry-cleaning with fluorochlorinated solvents	374
16.2 Laundering	375
16.2.1 Machine laundering	375
16.2.2 Hand washing	376
16.3 Maintenance of household textiles-shampooing	376
16.3.1 Shampooing of upholstered furniture	377
16.3.2 Shampooing of loose furniture covers	377
16.3.3 Shampooing of carpets and floor coverings	377
17. SURVEY OF APPLICATIONS OF POLYPROPYLENE FIBRES	379
18. CONCLUDING REMARKS	381
INDEX	383
