## INTRODUCTION

### A View from the Past **xiv**

## PART ONE

### EXERCISE PHYSIOLOGY **1**

#### SECTION 1 **Nutrition: The Base for Human Performance **3****

#### CHAPTER 1 **Carbohydrates, Lipids, and Proteins **4****

##### PART 1 • CARBOHYDRATES **6**

- Carbohydrate Kinds and Sources 6
- Recommended Carbohydrate Intake 11
- Carbohydrates' Role in the Body 11
- Carbohydrate Dynamics During Physical Activity 12

##### PART 2 • LIPIDS **15**

- Lipid Characteristics 15
- Lipid Kinds and Sources 15
- Recommended Lipid Intake 22
- Lipid Dynamics in Physical Activity 25

##### PART 3 • PROTEINS **28**

- About Protein 28
- Protein Categories 29
- Recommended Protein Intake 30
- Protein's Role in the Body 32
- Protein Metabolism Dynamics 32
- Nitrogen Balance 33
- Protein Dynamics During Physical Activity 35

#### CHAPTER 2 **Vitamins, Minerals, and Water **42****

##### PART 1 • VITAMINS **44**

- About Vitamins 44
- Vitamin Types 44
- Vitamins' Role in the Body 45
- Defining Nutrient Needs: Dietary Reference Intakes 46
- Vitamin Antioxidant Role 47
- Vitamin-Rich Food Sources 48
- Physical Activity, Free Radicals, and Antioxidants 49
- Does Vitamin Supplementation Provide a Competitive Edge? 50

##### PART 2 • MINERALS **52**

- Mineral Essentials 52
- Mineral Functions 52
- Calcium 53
- Female Athlete Triad 59
- Male Athlete Triad 61
- Phosphorus 62
- Magnesium 62
- Iron 62
- Sodium, Potassium, and Chlorine 66
- Minerals and Exercise Performance 67

##### PART 3 • WATER **69**

- The Body's Water Content 69
- Water's Functions 69

- Water Balance: Intake Versus Output 70
- Physical Activity and Water Requirements 72

## CHAPTER 3

### Optimal Nutrition for Physical Activity **86**

- Nutrient Intake Among the Physically Active 88
- Good Nutrition Essentials 93
- Dietary Guidelines for Americans 93
- Physical Activity and Food Intake 98
- Precompetition Meal 103
- Liquid Meals and Prepackaged Nutrition Bars, Powders, and Drinks 104
- Carbohydrate Feedings Prior to, During, and in Recovery from Physical Activity 106
- High-Glycemic Foods' Possible Role in Obesity 110
- Foods' Insulin Index 111
- Glucose Feedings, Electrolytes, and Water Uptake 112

#### SECTION 2 **Energy for Physical Activity **119****

## CHAPTER 4

### Food's Energy Value **120**

- Measuring Food's Energy Content 122
- Food's Gross Energy Value 124
- Food's Net Energy Value 126
- Calculating a Meal's Energy Value 127

## CHAPTER 5

### Introduction to Energy Transfer **134**

- Energy: The Capacity for Work 136
- Energy Interconversions 137
- Biologic Work in Humans 139
- Enzymes and Coenzymes: Energy Release Rate Alteration 139
- Hydrolysis and Condensation: The Basis for Digestion and Synthesis 143

## CHAPTER 6

### Energy Transfer in the Body **150**

#### PART 1 • PHOSPHATE BOND ENERGY **152**

- Adenosine Triphosphate: The Energy Currency 152
- Phosphocreatine: The Energy Reservoir 154
- Cellular Oxidation 155
- Oxygen's Role in Energy Metabolism 157

#### PART 2 • ENERGY RELEASE FROM MACRONUTRIENTS **158**

- Energy Release from Carbohydrate 160
- Energy Release from Lipid 168
- Energy Release from Protein 172
- The Metabolic Mill: Interrelationships Among Carbohydrate, Lipid, and Protein Metabolism 173

## CHAPTER 7

### Energy Transfer During Physical Activity **178**

- Immediate Energy: The Adenosine Triphosphate-Phosphocreatine System 180
- Short-Term Energy: The Glycolytic (Lactate-Forming) System 180
- Long-Term Energy: The Aerobic System 182

Physical Activity Energy Spectrum	185
Recovery Oxygen Uptake	187

## **CHAPTER 8** **Measuring Energy Expenditure** **194**

Measuring the Body's Heat Production	196
Doubly Labeled Water Technique	202
Respiratory Quotient	202
Respiratory Exchange Ratio	205

## **CHAPTER 9** **Energy Expenditure During Rest and Physical Activity** **210**

### **PART 1 • ENERGY EXPENDITURE AT REST** **212**

Basal and Resting Metabolic Rate	212
Metabolic Size Concept	212
Metabolic Rate: Age and Sex Comparisons	214
Five Factors That Affect TDEE	216

### **PART 2 • ENERGY EXPENDITURE DURING PHYSICAL ACTIVITY** **220**

Energy Expenditure Classification for Physical Activities	220
The MET	221
Average Daily Energy Expenditure Rates	221
Energy Cost of Household, Industrial, and Recreational Activities	222
Body Mass Influence	222
Heart Rate to Estimate Energy Expenditure	222

## **CHAPTER 10** **Energy Expenditure During Walking, Jogging, Running, and Swimming** **226**

Human Movement Efficiency and Economy	228
Human Movement Efficiency	228
Human Movement Economy	230
Running Energy Expenditure	233
Swimming	239

## **CHAPTER 11** **Individual Differences and Measuring Energy Capacities** **248**

Metabolic Capacity and Exercise Performance: Specificity Versus Generality	250
Overview: Exercise Energy Transfer Capacity	250
Anaerobic Function Physiologic and Performance Tests	250
Anaerobic Energy Transfer: The Immediate and Short-Term Energy Systems	251
Anaerobic Energy Transfer: The Short-Term Glycolytic (Lactate-Forming) Energy System	253
Aerobic Energy Transfer: The Long-Term Energy System	258

## **SECTION 3** **Aerobic Energy Delivery and Use** **273**

## **CHAPTER 12** **Pulmonary Structure and Function** **274**

Ventilation Anatomy	276
Ventilation Mechanics	278
Inspiratory and Expiratory Dynamics	279
Lung Volumes and Capacities	281
Lung Function, Aerobic Fitness, and Physical Performance	283
Pulmonary Ventilation	284
Variations from Normal Breathing Patterns	287
The Respiratory Tract During Cold-Weather Physical Activity	289

## **CHAPTER 13** **Gas Exchange and Transport** **292**

### **PART 1 • GAS PARTIAL PRESSURE, MOVEMENT, AND EXCHANGE** **294**

Respired Gas Concentrations and Partial Pressures	294
Gas Movement in Air and Fluids	295
Gas Exchange in the Lungs and Tissues	297

### **PART 2 • OXYGEN TRANSPORT IN BLOOD** **299**

Oxygen Transport in Physical Solution	299
Oxygen Transport in Hemoglobin	299
Po <sub>2</sub> in the Lungs	300
Po <sub>2</sub> in the Tissues	303

### **PART 3 • CARBON DIOXIDE TRANSPORT IN BLOOD** **305**

Carbon Dioxide Transport in Physical Solution	305
Carbon Dioxide Transport as Bicarbonate	305
Carbon Dioxide Transport in Hb	306

## **CHAPTER 14** **Pulmonary Ventilation Dynamics** **310**

### **PART 1 • PULMONARY VENTILATION** **310**

Ventilatory Control	310
Ventilatory Regulation During Physical Activity	312

### **PART 2 • PULMONARY VENTILATION DURING PHYSICAL ACTIVITY** **314**

Ventilation and Energy Demands During Physical Activity	314
Oxygen Cost of Breathing	317
Does Ventilation Limit Aerobic Power and Endurance Performance?	320

### **PART 3 • ACID-BASE REGULATION** **321**

Buffering	321
Intense Physical Activity Effects	323

## **CHAPTER 15** **The Cardiovascular System** **326**

Cardiovascular System Components	328
Hypertension	338
Blood Pressure Response to Physical Activity	341
Heart's Blood Supply	345
Myocardial Metabolism	347

## **CHAPTER 16** **Cardiovascular Regulation and Integration** **352**

Intrinsic Heart Rate Regulation	354
Extrinsic Regulation of Heart Rate and Circulation	360
Blood Redistribution	365
Integrative Responses During Physical Activity	367
Physical Activity After Cardiac Transplantation	369

## **CHAPTER 17** **Cardiovascular Dynamics During Physical Activity** **372**

Measuring Cardiac Output	374
Cardiac Output at Rest	375
Cardiac Output During Physical Activity	376
Cardiac Output Distribution	378
Cardiac Output and Oxygen Transport	380
Cardiovascular Adjustments to Upper-Body Exercise	382

## **CHAPTER 18** **Skeletal Muscle Structure and Function** **388**

Skeletal Muscle Gross Structure	390
Skeletal Muscle Ultrastructure	396
Chemical and Mechanical Events During Muscle Action and Relaxation	403
Muscle Fiber Type	409

**CHAPTER 19****Neural Control and Human Movement 420**

- Neuromotor System Organization 422
- Nerve Supply to Muscle 430
- Proprioceptors: Specialized Receptors in Muscles, Tendons, and Joints 439

**CHAPTER 20****The Endocrine System: Organization and Acute and Chronic Responses to Physical Activity 448**

- Endocrine System Overview 450
- Endocrine System Organization 450
- Resting and Exercise-Induced Endocrine Secretions 455
- Exercise Training and Endocrine Function 479
- Resistance Training and Endocrine Function 485
- Opioid Peptides and Physical Activity 486
- Physical Activity and Immune Function 487

**PART TWO****APPLIED EXERCISE PHYSIOLOGY 499****SECTION 4 Enhancing Energy Transfer Capacity 501****CHAPTER 21****Training for Anaerobic and Aerobic Power 502**

- Exercise Training Principles 504
- How Training Impacts the Anaerobic Energy Systems 506
- Anaerobic System Changes with Training 506
- How Training Impacts the Aerobic System 507
- Seven Factors Affecting Aerobic Training Responses 518
- Tracking Aerobic Fitness Improvements 525
- Maintaining Aerobic Fitness Gains 526
- Training Methods 527
- Overtraining Considerations 531
- Physical Activity and Exercise Training During Pregnancy 533

**CHAPTER 22****Muscular Strength: Training Muscles to Become Stronger 542****PART 1 • STRENGTH MEASUREMENT AND RESISTANCE TRAINING 544**

- Muscular Strength Development Roots in Antiquity 544
- Resistance Training Objectives 548
- Muscle Strength Measurement 548
- Gender Differences in Muscle Strength 552
- Training Muscles to Become Stronger 556

**PART 2 • RESISTANCE TRAINING: STRUCTURAL AND FUNCTIONAL ADAPTATIONS 569**

- Neural and Muscular Adaptations Impact Strength Improvements 569
- Comparative Male and Female Training Responses 576
- Detraining Effects on Muscle 577
- Resistance Training and Metabolic Stress 578
- Circuit Resistance Training 578
- Muscle Soreness and Stiffness 579

**CHAPTER 23****Special Aids to Exercise Training and Performance 592**

- An Increasing Challenge to Fair Competition 594
- On the Horizon 595

**PART 1 • PHARMACOLOGIC AGENTS FOR ERGOGENIC EFFECTS 596**

- Anabolic Steroids 596
- Structure and Action 596
- Clenbuterol and Other  $\beta_2$ -Adrenergic Agonists 603
- Other Adrenergic Agonists 605
- Growth Hormone: Genetic Engineering Now Common in Sports 605
- Dehydroepiandrosterone 606
- Androstenedione: Benign Prohormone Nutritional Supplement or Potentially Harmful Drug? 608
- Amino Acid Supplementation 609
- Amphetamines 613
- Caffeine 613
- Ginseng and Ephedrine 616
- Buffering Solutions 618
- Anticortisol Compounds: Glutamine and Phosphatidylserine 619
- $\beta$ -Hydroxy- $\beta$ -Methylbutyrate 620

**PART 2 • NONPHARMACOLOGIC APPROACHES FOR ERGOGENIC EFFECTS 621**

- Red Blood Cell Reinfusion—Blood Doping 621
- Hormonal Blood Boosting (EPO) 622
- Warm-Up (Preliminary Exercise) 623
- Oxygen Inhalation (Hyperoxia) 625
- Modifying Carbohydrate Intake 627
- Chromium 630
- Creatine 632
- Medium-Chain Triacylglycerols 636
- Pyruvate 637

**SECTION 5 Exercise Performance and Environmental Stress 645****CHAPTER 24****Physical Activity at Medium and High Altitude 646**

- Altitude Stressors 648
- Oxygen Loading at Altitude 649
- Acclimatization 650
- Metabolic, Physiologic, and Exercise Capacity at Altitude 658
- Altitude Training and Sea-Level Performance 661
- Combined Altitude Stay with Low-Altitude Training 662

**CHAPTER 25****Exercise and Thermal Stress 668**

- Weather Versus Climate: Time as a Factor 670

**PART 1 • THERMOREGULATION MECHANISMS 670**

- Thermal Balance 670
- Hypothalamic Temperature Regulation 671
- Thermoregulation in Cold Stress 672
- Thermoregulation During Heat Loss 672
- How Clothing Impacts Thermoregulation 675

**PART 2 • THERMOREGULATION AND ENVIRONMENTAL HEAT STRESS DURING PHYSICAL ACTIVITY 678**

- Physical Activity in the Heat 678
- Rehydration and Hyperhydration to Maintain Fluid Balance 683
- Factors That Modify Heat Tolerance 686
- Complications from Excessive Heat Stress 689

**PART 3 • THERMOREGULATION AND ENVIRONMENTAL COLD STRESS DURING PHYSICAL ACTIVITY 691**

- Physical Activity in the Cold 691
- Cold Acclimatization 693
- How Cold Is Too Cold? 694

## CHAPTER 26 Sport Diving 702

- Diving History: Antiquity to the Present 704
- Pressure-Volume Relationships and Diving Depth 712
- Snorkeling and Breath-Hold Diving 712
- Scuba Diving 717
- Special Problems Breathing Gases at High Pressures 720
- Dives to Exceptional Depths: Mixed-Gas Diving 725
- Underwater Swimming Energy Cost 728

## CHAPTER 27 Microgravity: The Last Frontier 734

- The Weightless Environment 736
- The International Space Station's 20th Anniversary 738
- Aerospace Physiology and Medicine Historical Overview 740
- Spaceflight Physiology 748
- Countermeasure Strategies 759
- Overview of Physiologic Responses to Spaceflight 767
- NASA's Ambitious Vision for Future Space Exploration 767
- Practical Benefits from Space Biology Research 774
- Final Words 774

## SECTION 6 Body Composition, Energy Balance, and Weight Control 793

### CHAPTER 28 Body Composition Assessment 794

- Four Limitations in Using the Weight-for-Height Tables 796
- Overweight, Overfat, and Obesity Prevalence 796
- The Body Mass Index: A Popular but Imprecise Clinical Standard 797
- Modeling Human Body Composition 801
- Common Techniques to Assess Body Composition 808
- Average Percentage Body Fat 829
- How to Determine Goal Body Mass 830
- Looking to a Brighter Future 830

### CHAPTER 29 Physique, Performance, and Physical Activity 836

- Physique Status in Champion Athletes 838
- Body Composition in 100-Year-Old Males and Females 855

### CHAPTER 30 Overweight, Overfatness (Obesity), and Weight Control 862

- PART 1 • OBESITY 864**
- Historical Perspective 864
  - Obesity Remains a Global Epidemic 864
  - Increased Body Fat: A Progressive Long-Term Process 867
  - Physical Inactivity: A Crucial Component for Excessive Fat Accumulation 871
  - Excessive Body Fat's Health Risks 872
  - Criteria for Excessive Body Fat: How Fat Is Too Fat? 874
- PART 2 • WEIGHT CONTROL PRIMARY PRINCIPLES INVOLVE DIET AND PHYSICAL ACTIVITY 882**
- Energy Balance: Input Versus Output 882
  - DiETING for Weight Control 883
  - Factors That Impact Weight Loss 889
  - Increase Physical Activity for Weight Control 890
  - Regular Physical Activity's Effectiveness 893
  - Weight Loss Recommendations for Wrestlers and Power Athletes 897
  - Gaining Weight: The Competitive Athlete's Dilemma 898

## SECTION 7 Exercise, Successful Aging, and Disease Prevention 907

### CHAPTER 31 Physical Activity, Health, and Aging 908

- The Graying of America 910
- The New Gerontology 910
- PART 1 • PHYSICAL ACTIVITY IN THE POPULATION 913**
- Physical Activity Epidemiology 913
- PART 2 • AGING AND PHYSIOLOGIC FUNCTION 921**
- Age Trends 921
- Trainability and Age 930
- PART 3 • PHYSICAL ACTIVITY, HEALTH, AND LONGEVITY 931**
- Physical Activity, Health, and Longevity 931
- Regular Moderate Physical Activity Benefits 932
- PART 4 • CARDIOVASCULAR DISEASES 934**
- CHD Links to Cellular Level Alterations 935
- CHD Risk Factors 937

### CHAPTER 32 Clinical Exercise Physiology for Cancer, Cardiovascular, and Pulmonary Rehabilitation 952

- The Exercise Physiologist in the Clinical Setting 954
- Training and Certification Programs for Professional Exercise Physiologists 954
- Clinical Applications of Exercise Physiology to Diverse Diseases and Disorders 956
- Oncology 956
- Cardiovascular Diseases 960
- Cardiac Disease Assessment 964
- Stress Test Protocols 974
- Cardiovascular Disease and Exercise Capacity 976
- Prescribing PA and Exercise 977
- Cardiac Rehabilitation 979
- Pulmonary Diseases 980
- PA and Asthma 986
- Neuromuscular Diseases, Disabilities, and Disorders 987
- Renal Disease 988
- Cognitive/Emotional Diseases and Disorders 989

## SECTION 8 On the Horizon 1007

### CHAPTER 33 Molecular Biology: New Vista for Exercise Physiology in Health, Disease, and Performance 1008

- PART 1 • MOLECULAR BIOLOGY HISTORICAL TOUR 1012**
- Revolution in the Biologic Sciences 1014
  - The Human Genome 1015
  - Nucleic Acids 1017
  - How DNA Replicates 1025
  - Protein Synthesis: Transcription and Translation 1028
  - Mutations 1041
- PART 2 • NEW HORIZONS IN MOLECULAR BIOLOGY 1047**
- Medically Related Research 1047
  - Electrophoresis and Gel Transfer Methods 1054
  - Gene Editing 1065
- PART 3 • HUMAN PERFORMANCE RESEARCH 1070**
- The Future Is Now 1075

Index 1087
