

TABLE OF CONTENTS

Dedications	xi
About the Authors	xii
Acknowledgments	xiii
Why This Book?	xiv
Introduction	xvi
Foreword	xix

Chapter 1: Defining the Lens: The Basics

1.1 The Beginning: The Camera	1
1.2 The Beginning: The Lens	3
1.2.1 Lens Markings	4
1.2.2 Manufacturers	5
1.2.3 Lens Names	6
1.2.4 Physical Dimensions	6
1.2.4.1 Front Diameters	7
1.3 The Beginning: Image Formation	8
1.4 Magnification	9
1.5 Focal Length	10
1.5.1 Focal Length Basics	12
1.5.2 Relative Differences in Focal Length	12
1.6 Lens Types	13
1.6.1 Prime Lenses	14
1.6.2 Zoom Lenses	14
1.6.2.1 Why Zooms Matter	15
1.6.3 Other Types of Lenses	15
1.6.3.1 35mm Still Lenses	15
1.6.3.1.1 Modern Still Lenses	15
1.6.3.1.2 Manual Still Lenses	16
1.6.3.1.3 Adapted Still Lenses	17
1.6.3.1.4 Rangefinder Lenses	17
1.6.3.2 Broadcast / ENG / Video Lenses	19
1.6.3.3 Medium Format Lenses	20
1.7 Angle of View and Field of View	20
1.7.1 A Look at "Normal"	22
1.8 Lens Choices and Visual Storytelling	23
1.8.1 Perspective	24
1.8.2 Wide Angle Lenses and Distortion	27
1.8.3 Long Lenses and Background Compression	28
1.8.4 Compression / Distortion and Faces	32
1.8.4.1 Larger Imagers: Perspective and Lens Choice ..	32
1.9 Formats, Aspect Ratios and Image Circles	34
1.9.1 35mm vs. 135	34
1.9.2 Aspect Ratios	35
1.9.3 Image Circles	36

1.9.3.1 The Subjectivity of Image Circle and Illumination Circle	37
1.9.3.2 Image Circle Related to Aperture, Focal Distance and Focal Length	39
1.9.3.3 Crop Factor	39
1.9.3.3.1 A 50 is a 50 is a 50	41
1.9.4 The Digital Revolution	42
1.10 The Aperture Stops Here	43
1.10.1 Intermediate Stops	47
1.10.2 The <i>f</i> -number into T-Stops	47
1.10.3 Lens Speed	49
1.10.4 Ramping Apertures in Zoom Lenses	49
1.10.5 Performance	50
1.10.6 Aperture Ring Position	50
1.11 Focusing	51
1.11.1 Focusing Scale	51
1.11.1.1 Common Focus Scale Markings	52
1.11.2 Infinity and Critical Focus	52
1.11.3 Minimum Focus Distance	53
1.11.4 Gears	54
1.11.5 Internal vs. External Focus	54
1.11.5.1 Rotating External Focusing vs. Non-rotating Lens Designs	55
1.12 Depth of Field	56
1.12.1 Why Is Depth of Field Important?	56
1.12.2 A Warning	58
1.12.3 The Defining Factors of Depth of Field	59
1.12.4 The Circle of Confusion	60
1.12.5 Depth of Field and Imager Size	62
1.12.6 Focal Length and Depth of Field	64
1.12.7 Common Misconceptions	64
1.12.8 How Acceptable is Acceptable?	68
1.12.8.1 Focus Roll Off	69
1.12.9 Division of Depth of Field	69
1.12.10 Depth of Field and Entrance Pupils	71
1.12.11 Depth of Field in the Field - Focus Splits	71
1.13 Hyperfocal	72
1.14 Depth of Focus	74
1.15 Back Focal Length/Distance & Flange Focal Depth/ Distance	75
1.15.1 Retrofocus / Inverse Telephoto Lenses	77
1.16 Lens Mounts	77
1.16.1 The Mount Key	78
1.17 Anamorphic	78
1.17.1 What Makes Anamorphic Special?	79
1.17.2 Anamorphic Depth of Field	81
1.17.3 Anamorphic and Digital	81
1.17.4 Other Anamorphic Compression Factors	83

1.18 Specialty Optics..... 84
 1.18.1 Fisheye Lenses 85
 1.18.2 Rectilinear Lenses 86
 1.18.3 Macro Lenses 87
 1.18.3.1 Macro Lenses and Aperture Compensation 88
 1.18.3.2 Macro Lenses and Depth of Field..... 89
 1.18.3.3 Extension Tubes 89
 1.18.3.4 Reversing Lens Mounts 90
 1.18.3.5 Zoom Lenses with Macro Functions..... 91
 1.18.4 Relay System Lenses 92
 1.18.4.1 Probe (Borescope) / Periscope Lenses 92
 1.18.4.2 Pitching Lenses 92
 1.18.4.3 Multi-Axis Relay Lens Systems..... 92
 1.18.5 Adjustable Axes Lenses 93
 1.18.5.1 Perspective Control / Shift Lenses..... 93
 1.18.5.2 Tilt / Slant Lenses 94
 1.18.5.3 Tilt & Shift Lenses 97
 1.18.6 Front Converters 97
 1.18.6.1 Front Tele- and Wide-angle Converters..... 98
 1.18.6.2 Focal Front Converters 99
 1.18.7 Rear Converters, Expanders, Extenders and Adapters.. 99
 1.18.7.1 Rear Teleconverters, Range Extenders or Rear-Mount Adapters 99
 1.18.7.2 Focal Length Reducers / Speed Boosters 100
 1.18.7.3 Image Circle Expanders 101
 1.18.7.4 Depth of Field and Teleconverters 102
 1.18.7.5 Rear Anamorphic Teleconverters..... 102
 1.18.8 Close-Up Filters / Diopters / Proxars 102
 1.18.8.1 Split-Field Close Up Supplementary Lenses (Diopters) 105
 1.18.9 Low-Angle / Inclining Prism 107
 1.18.10 Image Intensifier (Night Vision)..... 107

Chapter 2: Defining the Lens: Optical Concepts

2.1 Light 109
 2.1.1 Reflection and Absorption of Light..... 110
 2.1.2 Refraction of Light 112
 2.1.3 Internal Reflection 114
2.2 Glass..... 115
 2.2.1 The History of Optical Glass 116
 2.2.2 Crown Glass 117
 2.2.3 Flint Glass 118
2.3 Basic Lens Shapes 118
 2.3.1 Convex Simple Lenses 119
 2.3.2 Concave Simple Lenses 120
 2.3.3 What is Spherical? 121
 2.3.3.1 What is a Diopter - Lens Curvature/Power 121
 2.3.4 Prisms 123
2.4 How A Simple Lens Element is Made 124
 2.4.1 Glass Annealing..... 127
 2.4.2 Optical Design in the Digital Age 127
2.5 Optical Ray Tracing 128
 2.5.1 The Relative Optical Normal with Spherical Elements.. 128
 2.5.2 Other Shapes of Light Rays: Pencils and Cones..... 129

2.6 Optical Infinity and Afocal Elements..... 130
2.7 Dispersion 132
2.8 Entrance and Exit Pupils 135
 2.8.1 Lenses with Double Inversion Points 137
 2.8.2 The Effect of an Iris Inserted into the Optical Path.. 138
2.9 Diffraction 139
 2.9.1 The Airy Disk..... 141
 2.9.2 Diffraction Starbursts/Spikes 141
2.10 Lens Character or Personality 143
2.11 Aberrations and Problems 143
 2.11.1 Point Spread Function..... 144
 2.11.2 Spherical Aberration (SA)..... 145
 2.11.3 Chromatic Aberration (CA)..... 147
 2.11.4 Coma 149
 2.11.5 Astigmatism..... 149
 2.11.6 Field Curvature..... 151
 2.11.6.1 Non-Uniform Plane of Focus..... 151
 2.11.7 Geometric Distortion 152
 2.11.8 Field Illumination Falloff / Vignetting..... 153
 2.11.9 Breathing..... 156
Chart of Major Aberrations 157
 2.11.10 The Combined Effects of Aberrations in the Real World 158
 2.11.10.1 Higher-Order Aberrations 158
 2.11.10.1.1 Secondary Spectrum 159
 2.11.10.1.2 Spherochromatism (SCA) 159
 2.11.11 Aberrations Over Focal Distances 160
 2.11.11.1 Exposure Attenuation Over the Focusing Range 160
 2.11.12 Aberrations and Digital Imagers..... 160
 2.11.12.1 Under-Corrected Aberrations for Digital Sensors 162
 2.11.12.2 Falloff with Digital Sensors 162
2.12 Lens Color Cast..... 163
2.13 Lens Flare..... 164
 2.13.1 Veiling Flare / Glare 165
 2.13.2 Ghost Flare..... 166
 2.13.2.1 Narcissism..... 167
 2.13.2.2 Hot Spots..... 169
 2.13.3 Spot Flare..... 170
 2.13.4 Anamorphic Flare 170
 2.13.5 Other Flare Anomalies..... 171
 2.13.6 Additional Glass..... 172
2.14 Lens Attributes 172
 2.14.1 Lens Speed 172
 2.14.1.1 Lens Speed and the Relationship to B.F.D. and Mount Restrictions..... 174
 2.14.1.2 Specialty Extreme Fast Lenses 175
 2.14.2 Bokeh 175
 2.14.2.1 What Exactly is Focus? 178
 2.14.2.1.1 Light Behavior in the Out of Focus Image 181
 2.14.2.1.2 Crafting the Nature of the Out of Focus Image 183
 2.14.2.2 Inverted Bokeh 183
 2.14.2.3 Anamorphic Bokeh..... 185
 2.14.2.4 Other Variations in Bokeh..... 186
 2.14.3 Sharpness & Resolution..... 189
 2.14.3.1 Otto Schade and Erich Heynacher 189

2.14.3.2 Acutance and Contrast	189	3.2.4 Cooke Triplet (1893)	232
2.14.3.2.1 Micro Contrast	191	3.2.5 Zeiss Protar (1890) and Tessar (1902).....	234
2.14.3.3 Resolution.....	191	3.2.6 Zeiss Planar (1896)	235
2.14.3.3.1 Resolving Power or Limiting Resolution...	193	3.2.6.1 The "Kubrick" Planar 50mm <i>f</i> /0.7	237
2.14.3.4 Sharpness and Aberrations	193	3.2.7 Cooke Series O Opic (1920) and Ultra Speed Panchros (1927)	240
2.14.3.5 Modulation Transfer Function.....	193	3.2.8 Schneider Xenon (1925).....	242
2.14.3.5.1 Resolution and Digital Sensors: The War of the K's	196	3.2.9 Zeiss Biotar (1930)	242
2.14.3.5.2 Format Size and Resolution	198	3.2.10 Zeiss Sonnar (1932)	244
2.14.3.6 The Delicate Interplay Between Resolution and Contrast	198	3.2.11 Zeiss Distagon (1953)	245
2.15 Lens Coatings.....	198	3.3 Additional Fundamental Optical Designs	246
2.15.1 Light Attitude - How Coatings Work.....	199	3.3.1 Telephoto	246
2.15.2 Multi-layer Coating Technology	202	3.3.2 Inverse Telephoto / Retrofocus	247
2.15.3 Early Cinematographic Lens Coatings	203	3.3.3 Macro Lens Design.....	249
2.15.4 Anti-reflection Coatings and Digital Sensors	204	3.3.4 Fisheye Lens Design.....	251
2.15.5 Coatings and Infrared Photography	205	3.3.4.1 Lens Projections.....	252
2.15.6 Additional Methods of Flare Control.....	205	3.4 Spherical Lens Focusing Methodologies.....	258
2.15.7 Lack of Coatings	205	3.4.1 Unit Focusing.....	258
2.16 Air/Glass Transitions and Lens Element Spacings ...	206	3.4.2 Front Cell Focusing.....	259
2.17 Cementing Lens Elements	206	3.4.2.1 Variable Diopters.....	259
2.17.1 Types of Optical Cements	207	3.4.3 Internal Focusing and Floating Elements.....	260
2.17.2 History of Optical Cements	208	3.4.3.1 Dynamic "Floating" Elements	260
2.17.3 Cement Failures.....	208	3.4.4 Minimum Focus	261
2.18 Low Dispersion Glass	209	3.4.5 Focus Shift	262
2.18.1 Fluorite	210	3.4.6 Focus Accuracy	263
2.19 Radioactive Lenses	210	3.4.7 Thermal Considerations.....	263
2.19.1 Thoriated Lenses	211	3.5 Zoom Lens Designs.....	264
2.19.1.1 Thorium Yellowing - UV Light	211	3.5.1 Parfocal and Varifocal.....	266
2.19.2 Lanthanum Lenses.....	212	3.5.2 Optical or Mechanical Compensation in Zoom Lenses...	267
2.20 Aspherics	212	3.5.3 Exposure Ramping in Zoom Lenses	268
2.20.1 Aspherical History	213	3.5.4 Chromatic Aberration Correction in Zoom Lenses ..	268
2.20.2 Ground Aspheric Lenses	214	3.5.5 Lateral Image Shift or Mis-tracking in Zoom Lenses ..	268
2.20.3 MRF Polishing.....	214	3.6 Anamorphic Lens Designs	269
2.20.4 Molded Aspheric Lenses.....	215	3.6.1 Compressing Elements	272
2.20.4.1 Precision Annealing Molding	215	3.6.1.1 Cylindrical Elements.....	272
2.20.4.2 Hybrid Molding.....	216	3.6.1.2 Prism Elements	274
2.20.5 Aspheric Bokeh and Flare	216	3.6.1.2.1 Brewster's Prism.....	275
2.21 Field Flatteners	216	3.6.2 Anamorphic Compression Methodologies.....	276
		3.6.3 First Anamorphic Lens Designs.....	276
		3.6.3.1 Anamorphot Adapter Units.....	277
		3.6.3.2 Monobloc Anamorphic Lenses.....	279
		3.6.4 Front vs. Rear Anamorphic Lens Design Differences ..	279
		3.6.4.1 Front/Rear Anamorphics and Focal Length ...	280
		3.6.4.2 Influence on Bokeh and Depth of Field	281
		3.6.4.3 Front Anamorphic Zooms.....	282
		3.6.5 Anamorphic Focusing Solutions.....	282
		3.6.5.1 Panavision's Counter-Rotating Astigmatizers...	283
		3.6.5.2 Axially-Adjusted, Compression-Compensating Middle Cylinders	287
		3.6.5.3 Front-Positioned, Variable Diopter Focusing ..	288
		3.6.5.3.1 ISCO's Integrated Variable Diopter	289
		3.6.6 Combined Compression & Expansion Strategies.....	290
		3.6.6.1 Jacobsen's Multi-Axis Compression/Expansion Approach.....	290
		3.6.6.2 Shiga Front-Anamorphot Assemblies	290
		3.6.6.3 Dr. Lisiewicz's Take on Compression/Expansion...	292
		3.6.6.4 Arri/Zeiss Master Anamorphics	292
		3.6.6.5 A New Spin on Rear Anamorphic: Servicevision Scorpiolens	293
		3.6.6.6 Cooke Anamorphic /i Expansion/Compression...	294
Chapter 3: Crafting the Lens: Optical Designs in Action			
3.1 Optical Design Solutions - Solving Problems	219		
3.1.1 Optical Designs and Digital Sensors	220		
3.1.2 The Anastigmat	220		
3.1.3 The Achromat	221		
3.1.3.1 Types of Achromatic Doublets	222		
3.1.3.2 Apochromatic Lenses	223		
3.1.4 Telecentricity.....	223		
3.1.4.1 Telecentric Lenses and Depth of Field.....	225		
3.1.4.2 Telecentricity in ENG Lenses	225		
3.2 The History and Evolution of Photographic Lens Designs ..	226		
3.2.1 Petzval Portrait (1840)	227		
3.2.2 The Dallmeyer Rapid Rectilinear and Symmetrical Lens Designs (1866).....	227		
3.2.3 Double Gauss (1888/1895).....	230		

3.7 Observing Entrance and Exit Pupils in Various Optical Designs	295
3.8 Iris Placement in Optical Designs	296
3.9 The Future of Lens Designs?	296
3.9.1 Freeform Lenses.....	296
3.9.2 3D Printed Lenses.....	296
3.9.3 Metasurface Lenses.....	297
3.9.4 Liquid Lenses.....	297

Chapter 4: Crafting the Lens: Mechanical Designs

4.1 Introduction to Optomechanical Design	299
4.1.1 The Daunting Task.....	299
4.1.2 Mechanical Design Considerations.....	300
4.1.3 Designing for Maintenance.....	300
4.1.4 Mechanical Tolerances.....	301
4.1.5 Manufacturing Copy Variation and/or Changes Over Time.....	301
4.2 Lens Barrel Design Considerations	302
4.2.1 Barrel Shape/Dimensions.....	302
4.2.1.1 Barrel Diameter.....	302
4.2.1.2 Lens Barrel Length.....	303
4.2.2 Interior vs Exterior Barrels.....	304
4.2.3 Materials.....	304
4.2.4 Gears.....	304
4.2.5 Finishes.....	306
4.2.5.1 Anodizing.....	306
4.2.5.2 Powder Coating.....	307
4.2.6 Methodologies and Materials of Lens Markings.....	307
4.2.6.1 Resolution/Precision of Focus Scales.....	308
4.3 Securing Optical Elements	309
4.3.1 The Main Lens Chassis.....	309
4.3.2 The Optical Cell.....	310
4.3.3 Diameter of Individual Lens Elements.....	310
4.3.4 Methods of Securing Lens Elements.....	311
4.3.4.1 Seats and Threaded Retaining Rings.....	311
4.3.4.2 Burnished Mounting.....	313
4.3.4.3 Glued Mountings.....	313
4.3.4.4 Snap-Fit Rings.....	313
4.3.4.5 Lens Potting.....	313
4.3.4.6 Axial Centering.....	314
4.3.4.7 Spacers.....	314
4.3.4.7.1 Internal Shims.....	315
4.3.4.8 Loctite.....	315
4.3.5 Isolation/Damping/Sealing.....	315
4.3.5.1 Weight Control/Distribution.....	315
4.3.5.2 Sound Damping/Noise Reduction.....	316
4.3.5.3 Weather Sealing.....	317
4.3.6 Thermal Compensation.....	317
4.3.6.1 Passive Thermal Compensation.....	318
4.3.6.2 Active Thermal Compensation.....	319
4.4 Moving Optical Elements	320
4.4.1 Focusing Mechanism Designs and Considerations.....	320
4.4.1.1 Mechanical Focusing Solutions.....	320
4.4.1.2 External vs. Internal Focus Construction	

Differences.....	321
4.4.1.3 Degrees of Focus Rotation (Resolution/Precision of Focus Scales).....	322
4.4.2 Axial Motion Components.....	322
4.4.2.1 Helical Focus Mechanisms.....	324
4.4.2.1.1 Helical Thread Shapes.....	326
4.4.2.1.2 Multiple Helical Thread "Starts".....	327
4.4.2.2 Cam Driven Systems.....	327
4.4.2.3 The Mechanical Means for Floating Elements.....	332
4.4.2.4 Bearings, Guides and Rails.....	332
4.4.2.4.1 Bearings.....	333
4.4.2.4.2 Rods.....	334
4.4.2.5 Van Diemen Wireform System.....	334
4.4.3 Motion-Arresting, Friction-Reduction and Movement-Assisting Components.....	334
4.4.3.1 Eliminating Rotational Movement.....	335
4.4.3.1.1 Keys.....	335
4.4.3.2 Friction-Control Methods.....	335
4.4.3.2.1 Grease.....	335
4.4.3.2.2 Springs.....	336
4.4.3.2.3 Low-Friction Washers and Contact Pads.....	337
4.4.3.3 Function Stops.....	337
4.4.4 Anamorphic-Specific Movement.....	338
4.4.4.1 Anamorphics Interlocked/Coordinated with the Spherical Focusing Action.....	338
4.4.4.1.1 Axial Focusing-Cylinders and Power Compensation Mechanics.....	338
4.4.4.1.2 Counter-Rotating Astigmatizers.....	338
4.5 Light Control	339
4.5.1 Lens Element Edge Blackening/Varnishing.....	339
4.5.2 Black Coating and Flocking.....	340
4.5.3 Mechanical Vignetting/Baffling.....	340
4.5.4 Rilling.....	341
4.6 Iris/Diaphragm Design and Mechanics	341
4.6.1 Single-End Pinned Iris Designs and Mechanisms.....	343
4.6.1.1 Dual Sets of Iris Blades.....	344
4.6.2 Opposite-End Pins.....	346
4.6.3 Blade Construction.....	349
4.6.3.1 Limitation of Maximum Pupil by the Physical Lens Size.....	349
4.6.4 Iris Actuating Mechanism.....	349
4.7 Lens Mounts	350
4.7.1 Motion Picture Mounts.....	350
4.7.1.1 35mm Lens Mounts.....	351
4.7.1.2 16mm Mounts.....	364
4.7.1.3 65mm Lens Mounts.....	368
4.7.2 Still-Camera/HDSLR Mounts.....	371
4.7.3 Sub-mounts.....	372
4.8 Electronics Integration	372
4.8.1 Intelligent Lens Communication.....	373
4.8.1.1 Metadata.....	375
4.8.2 Image Stabilizers.....	377
4.8.2.1 Still and ENG Lens Stabilizers.....	377
4.8.3 Internal Focus Motors.....	377

Chapter 5: Capturing the Lens: The History and Evolution of Cinematographic Formats

5.1 Early Film Formats and the Adoption of the 35mm Standard	379
5.1.1 Finding a 35mm Standard.....	379
5.2 16mm	380
5.2.1 The Creation of Super 16mm.....	380
5.2.2 Is 16mm Still Relevant?.....	383
5.3 The History of Widescreen Processes	383
5.3.1 Early Widescreen Processes.....	384
5.3.2 The Widescreen Wars of the 1950s.....	385
5.3.2.1 CinemaScope is Born.....	385
5.3.2.1.1 A Panoply of Anamorphic 35mm Widescreen Formats.....	388
5.3.2.2 "Flat" Widescreen Processes to the Rescue... ..	388
5.3.2.2.1 VistaVision (1954).....	389
5.3.2.2.2 Superscope / Super 35.....	390
5.3.2.2.2.1 Superscope Resurrected.....	392
5.3.2.2.3 Techniscope.....	394
5.3.2.3 Technirama.....	395
5.4 Larger-Format and Special-Venue Process	397
5.4.1 The Golden Age of "Roadshow" Presentations.....	397
5.4.1.1 Todd-AO 65mm (1953).....	399
5.4.1.2 Panavision's Spherical and Anamorphic 65mm Processes (1956).....	400
5.4.1.3 Sovscope 70 (1961).....	402
5.4.2 IMAX (1967).....	403
5.4.3 Blown-Up Roadshow Presentations.....	403
5.5 Digital Formats	406
5.5.1 Broadcast/ENG 3-Chip.....	407
5.5.2 Super 35 Digital.....	407
5.5.3 Larger than Super 35 Digital.....	408
5.5.4 Full Frame/VistaVision Digital.....	408
5.5.5 65mm Digital.....	409

Chapter 6: Utilizing the Lens: The Origination and Evolution of Cine Lens Designs

6.1 Purpose-Built 35mm Cinema Prime Lenses (1930 - Present)	411
6.1.1 Cooke Motion Picture Prime Lenses.....	412
6.1.1.1 Cooke Speed Panchros (1930) and the Deep Field Panchro 100mm (1946).....	412
6.1.1.2 Cooke Speed Panchro Series II (1953-58) and Telepanchros (1959).....	416
6.1.1.3 Cooke Speed Panchro Series III (1959).....	418
6.1.1.4 Cooke S4 (1998) and S4/i (2005).....	419
6.1.1.4.1 miniS4/i Primes (2009).....	422
6.1.1.5 Cooke 5/i (2009).....	422
6.1.1.6 Cooke Panchro/i Classic (2017).....	424

6.1.2 Bausch & Lomb.....	425
6.1.2.1 Baltars (1939).....	426
6.1.2.2 Super Baltars (1960).....	427
6.1.3 Arri Cine Lenses.....	429
6.1.3.1 Arriflex/Zeiss Standard Lenses (1960).....	430
6.1.3.2 The Evolution of Arriflex/Zeiss "Super Speed" Prime Lenses (1975-2004).....	431
6.1.3.3 Arri/Zeiss Ultra Primes (1998).....	437

7.5.6.2.6.1 Richard Gale Optics	694
7.5.6.2.6.2 Iron Glass (2019)	696
7.6 Modifying the Image Quality of Existing Cine Lenses 696	
7.6.1 Modifying Flare Quality	696
7.6.1.1 Altering Coatings	696
7.6.1.1.1 Backwards Progress: Stripping Coatings ...	697
7.6.1.1.2 Going Old School: <i>Recoating</i> Lenses with Vintage Coatings	697
7.6.1.2 Removing Blacking	698

7.6.1.3 Manufacturing New Vintage Lenses	699
7.6.2 Custom "Tuning" Adjustment of Lenses	699
7.6.2.1 Panavision's Tuning Process	699
7.6.2.2 Manufacturers Offering "Flexible" Customizable Lenses	701

Chapter 8: Evaluating the Lens: Testing and Qualifying Lenses

8.1 Evaluating Lenses	703
8.1.1 What Makes a Lens Good or Bad?	703
8.1.2 Visual Inspection	703
8.1.3 Evaluating Optomechanical Issues	704
8.2 Methods of Evaluating Lenses	704
8.2.1 Design Zones	705
8.2.2 Modern vs. Vintage Lenses	705
8.3 General Testing Methodologies	705
8.4 On-Camera Tests	706
8.4.1 Isolated On-Camera Tests	707
8.4.1.1 Exposure Compensation Methodology	707
8.4.1.2 Isolated Flare Test	708
8.4.1.2.1 Evaluating Isolated Flare Test	709
8.4.1.3 Isolated Bokeh Test	710
8.4.1.3.1 Evaluating Bokeh Test	710
8.4.1.4 Isolated Falloff / Vignetting Testing	710
8.4.1.4.1 Evaluating Falloff / Vignetting Testing	711
8.4.1.5 Isolated Color Bias Test	711
8.4.1.5.1 Evaluating Color Bias	712
8.4.2 Types of Charts and Tests and Utilizing Them	712
8.4.2.1 Different Types of Charts	712
8.4.2.1.1 Framing Charts	712
8.4.2.1.2 Color Charts	713
8.4.2.1.3 Siemens Star	713
8.4.2.1.4 Distortion Grid/Checkerboard Chart	714
8.4.2.1.4.1 Mapping Lenses for Visual Effects ..	714
8.4.2.1.5 Resolution Chart	714
8.4.2.1.5.1 Testing Focus Marks for Accuracy ..	717
8.4.2.1.5.2 Testing for a Non-Uniform Field of Curvature	718
8.4.2.1.5.3 Testing Bokeh with a Resolution Chart	719
8.4.2.1.5.4 Breathing Test	719
8.4.2.1.5.5 Zoom Lateral Shift/Zoom Tracking Testing	719
8.4.2.2 Evaluating Chart Tests	719
8.4.3 Photographing Subjects	723
8.4.3.1 Lab Subjects	723
8.4.3.2 Real World People	724
8.4.3.3 Evaluating On-Camera Subjects	725
8.4.4 Lens Depth Perspective and 3 Dimensionality	726
8.4.5 Finding Your Lens' Entrance Pupil	726
8.5 Metrology, or Off-Camera Lens Tests	727
8.5.1 Lens Projection	727
8.5.1.1 Limitations of Lens Projection	728

8.5.1.2 Evaluating Optomechanical Issues on a Lens Projector.....	729
8.5.2 Autocollimators	729
8.5.1.2 Evaluating Lens Projection	730
8.5.3 T-Stop Calibration Bench	732
8.5.3.1 Procedure for Testing/Evaluating T-Stop on Bench	732
8.5.4 Modulation Transfer Function (MTF) Testing	733
8.5.4.1 Types of MTF Tests	733
8.5.5 Flange Depth Measuring Tools	733
8.6 Selected Test Results	734

Bibliography	772
Film & TV Titles and Lenses	782
Index	798

Chapter 9: Maintaining the Lens: Service and Care

9.1 General Handling of Lenses	747
9.1.1 Storage of Lenses.....	747
9.1.2 Dust and Moisture	749
9.1.3 Transporting/Shipping Lenses	749
9.1.4 Lens Caps	749
9.1.4.1 Front Lens Caps	750
9.1.4.2 Rear Lens Caps	750
9.2 Servicing Lenses.....	751
9.2.1 Lens Cleaning	751
9.2.2 Servicing Tools	752
9.2.2.1 Bench Bases.....	753
9.2.2.2 Lens Spanners.....	753
9.2.2.3 Rubber Friction Spanners	754
9.2.2.4 Vacuum/Suction Cup Lens Wands.....	755
9.2.2.5 Types of Screws/Drivers.....	755
9.2.2.6 Spherometer, or Lens Clock.....	756
9.2.3 Optical alignment/Maintenance Issues	756
9.2.3.1 Built-in Serviceability.....	756
9.2.3.2 Collimating Lenses.....	757
9.2.3.2.1 Shimming Lenses	757
9.2.3.2.1.1 Types of Shims and their Various Thicknesses	758
9.2.3.3 Integrated Mechanical Back Focus Adjustment ..	759
9.2.3.4 Centering Issues	760
9.2.3.5 Problems in Focus Mechanisms	760
9.2.3.5.1 Lost Motion	761
9.2.3.5.2 Image Shift.....	761
9.2.3.5.3 Grinding.....	762
9.2.3.6 Zoom Lateral Shift/Tracking Correction	762
9.2.3.7 Anamorphic Cylinder Alignment.....	762
9.2.4 Methods of Adjusting Focus Scales	763
9.2.4.1 Interchangeable Focus-scale Rings	763
9.3 What to do When Disaster Strikes	764
9.3.1 Working in Extreme Weather	764
9.3.2 Water Invasion	765
9.3.3 Smoke Damage.....	765
9.3.4 Lens Fungus.....	766
9.3.5 Impact Damage	767
9.3.6 Foreign Object Strikes with Glass Elements	768
9.3.7 Removing Stuck-on Filters	768
9.4 Cosmetic Repairs.....	769
