

Contents

1	An introduction to biochemistry and cell biology	1
2	Biochemical investigations in clinical medicine.....	11
3	Water, sodium and potassium	24
4	Hydrogen ion homoeostasis and blood gases	53
5	The kidneys	74
6	The liver.....	99
7	The gastrointestinal tract.....	120
8	Clinical nutrition.....	133
9	The hypothalamus and the pituitary gland.....	149
10	The adrenal glands	168
11	The thyroid gland	186
12	The gonads	200
13	Disorders of carbohydrate metabolism.....	213
14	Calcium, phosphate and magnesium	240
15	Bones and joints	257
16	Plasma proteins and enzymes	269
17	Lipids, lipoproteins and cardiovascular disease.....	285
18	Muscles, nerves and psychiatric disorders.....	306
19	Inherited metabolic diseases.....	315
20	Metabolic aspects of malignant disease	329
21	Biochemical aspects of therapeutic drug monitoring and toxicology.....	341
22	Clinical chemistry in children	357

Appendix

Adult reference ranges.....	364
Index.....	366

Colorectal tumours	20: Metabolic aspects of malignant disease	337
Crystal arthropathy	15: Bones and joints	263, 268
Cushing syndrome	10: The adrenal glands	174
Cystic fibrosis	19: Inherited metabolic diseases	3, 20, 376
Dehydration	3: Water, sodium and potassium	29, 24, 85
