PART A

THEORIES, MODELS, REGULATION AS A SYSTEM

1. What is Regulation?.....	3
What is the Purpose of (and Justification for) Regulation?.....	4
Predictability, Stability, Social and Economic Goals.....	5
Areas Subject to Regulation.....	8
Safety Regulation – And Risk.....	11
Markets, Competition and Economic Regulation.....	13
Some Definitions of Regulation.....	16
Structure and Hierarchy of Regulations.....	17
The Landscape of Regulatory Authorities.....	18
The Legal Model: Rules and Enforcement.....	19
The Economic Model: Rational Profit Maximisation and Deterrence.....	21
Rules, Procedures and Systems.....	22
Problems with the Legal and Economic Models.....	23
Public and Private Modes of Regulation.....	26
Standards, Conformity Assessment, Certification and Accreditation.....	27
Advantages and Drawbacks of Private Regulation.....	31
Achieving Both Protection and Freedom.....	32
Precautionary or Proportionate Risk?.....	33
What is a Regulatory System for?	35

2.	Scientific Evidence on How Humans Behave.....	39
	Factors Affecting Human Actions	40
	The Power of Internal Motivation	41
	Morality, Ethics and Values	41
	The Power of Social Influence, Culture and Ethics	43
	The Causes of Disasters.....	45
	Inquiries into Disasters.....	45
	Systemic and Behavioural Risk Factors	46
	Scientific Research into Accidents.....	48
	The Psychological Basis of Actions: Self-Determination	
	Theory	50
	Business Research into Good Management Practice.....	52
	Psychological Safety	53
	Cooperation and Trust.....	53
	Why and How do We Comply with Rules?	55
	Make Rules Simple to Assist Compliance.....	57
	Social Punishment and Maintaining Group Cohesion.....	57
	Authoritarian Punishment and Maintaining the	
	Commons.....	58
	What do People Want When Things Go Wrong?.....	59
	Conclusions: Differentiating a Supportive Fair Cooperative	
	Culture from Enforcement.....	60
3.	A Regulatory System and its Functions	74
	Regulation as a Coordinated Means of Delivering Protections.....	74
	Regulation as a System	76
	The Concept of a 'Regulatory Space'	78
	The Core Functions of the Regulatory Space: The Regulatory	
	Functions Model.....	79
	Achieving Outcomes.....	81
	Delivering the Functions	82
	Key Elements of the Regulatory Functions Model.....	86
	A Collaborative System.....	86
	Actors	86
	Scope of the Ecosystem.....	89
	Accountability.....	89
	Trustworthiness	89
	Data	90
	Risk and Responding	91
	The Basic Operational Challenges Around Risk and Harms.....	91

Bespoke Regulatory Spaces.....	93
Governance of a Regulatory System.....	94
Coordinating Multiple Systems.....	96
4. New Models.....	98
From Theories to Science, and Rules to Outcomes.....	99
A Modern Regulatory Authority: The Regulatory Delivery Model.....	100
RDM Prerequisites.....	101
RDM Practices.....	103
The Significance of Transformation under the RDM.....	106
Outcomes.....	106
Intervention Choices.....	108
A Systemic Behavioural Approach: Open and Just Culture.....	111
The Outcome-Based Collaborative Regulation (OBCR) Model....	112
Trust and Ethics.....	113
The Potential for Consistency between the Goals of Regulatees and Regulation.....	114
Combining Two Different Universes.....	115
Conclusion: A Time for Reform.....	117
5. How to do Outcome-Based Collaborative Regulation.....	121
The Value of Collaborating.....	121
How People Collaborate.....	123
The Mechanism of Trust.....	123
Values.....	124
Trust Structures.....	125
Evidence of Trustworthiness.....	125
Evidence List for Trust in Organisations.....	127
Evidence of Ethical Organisational Culture.....	129
Creating an OBC System.....	131
The Stakeholders: Who has to be Involved?.....	131
Identifying the Outcomes.....	131
Achieving the Outcomes.....	131
Monitoring.....	131
System Architecture.....	132
Building Collaboration Through Trust.....	132
Comments on the Creation Process.....	132
Data.....	134

Aspects of the OBC Approach	134
Motivation	134
Commitment.....	135
Responsibility and Accountability.....	135
Examples of Outcome-Based Cooperative Systems	137
Open and Just Culture in Aviation Safety	137
OBCR Case Studies	139

PART B

OPERATING A REGULATORY SYSTEM APPROACH

6. Transformation of Practice on Interventions and Enforcement....	149
The Traditional Legal Enforcement Architecture.....	150
Categorisations and Differences between Criminal/ Administrative/Civil/Private Law	150
Sanctions.....	153
Purposes and Justifications of Enforcement of Rules.....	156
Traditional Principles Justifying Regulatory Action	156
Principles of Fair Enforcement.....	157
Proportionality: Mitigating and Aggravating Factors in Calibrating Sanctions.....	158
The Relevance of Harm.....	160
Competence.....	161
Compliance Programmes	161
Regulating Discretion and Flexibility	163
OECD's Best Practice Principles for Enforcement and Inspections	164
An Example of an Enforcement Policy	166
Applying the Science	169
The Sociological Function of Enforcement.....	169
Philosophy of Punishment and Democracy	170
Evolution in Understanding of Enforcement and Intervention	171
Moves Towards Classification of Behavioural Motivations	173
Better Regulation and Regulatory Delivery	174
Adding Behavioural Science: Evolution from Enforcement to Supportive Interventions	174
Restatement of Policy on Regulatory Intervention	177

7. Tools for a Regulatory System	184
The Purpose of Tools in a Regulatory System: From Compliance to Outcomes	185
A. Before: Pre-Marketing.....	186
Objectives of Regulation before Marketing or Undertaking Activities	186
Licensing, Approval, Permits, Registration, Notification	187
Private Assurance Schemes.....	188
Professional Competence.....	189
Authorised Competent Persons	190
Economic Regulation	191
Safety Regulation in General.....	191
Products	192
Testing	193
Sandboxes	194
Information and Disclosure	194
Financial Products and Services	195
Principles for Businesses.....	195
Senior Managers and Certification Regime (SM&CR)	197
Culture	199
Limitations in Harnessing Culture as a Regulatory Tool	203
Open and Just Culture in Aviation Safety.....	204
Regulatory Culture.....	204
Using Trust as a Regulatory Tool.....	205
B. During: Monitoring and Surveillance	207
The Objectives of Monitoring and Surveillance.....	207
Data Collection	209
Some Examples of New Approaches	210
Ombuds	210
Safe Food Production Queensland.....	211
UK Food Standards Authority.....	212
Future Opportunities	213
Markets and Economic Regulation	213
C. After: Responding to Problems.....	215
The Objectives of Regulatory Interventions.....	215
Comments on the Objectives.....	216
Markets and Economic Regulation	217
Distinguishing between Actors: Two Modes.....	217
Supportive Intervention Mode	217
Protection Mode	218

Private Regulatory Schemes	219
Ensuring that Change Occurs	219
An Inadequate Feedback System	221
Redress.....	222

PART C
PROBLEMS, CRITICISMS, CHALLENGES
AND FUTURE SOLUTIONS

8. Problems and Criticisms of Regulation	231
Too Much Regulation?	231
Too Many Rules and Procedures	232
Cumulative Effects.....	233
Resource Problems for Regulators	234
Regulatory Creep	234
Gaps and Silos – Inconsistency between Regulators	235
Specific Issues Arising with Economic Regulation	236
Impeding Growth and Investment.....	238
The Underlying Issues	239
Proportionality.....	239
Risk Perception	240
Risk: Attitudes and Appetite	241
Many Decisions are Political.....	243
Attempts to Control Regulation.....	245
Reduction Techniques.....	246
Better Regulation Techniques	252
Make Better Regulations.....	252
Regulatory Reform Principles.....	252
Regulation of Regulators.....	253
Codes, Duties and Steers	254
‘Performance’ of Regulators	255
Regulatory Relationships: Enforcement or Support?.....	256
Consistency, Networking.....	256
Regulatory Delivery: Do it Better.....	257
How Much does Regulation Cost?	258
Challenges of Globalism	259

How to do Regulation Better.....	261
Remember Why.....	261
How to Address the Real Problems.....	262
9. New Regulatory Systems to Support Innovation.....	269
Challenges in Regulating Innovation.....	269
Principles.....	271
Precautionary and Other Principles.....	271
Principles and Responses in Regulating Innovation.....	272
Stages of Maturity.....	274
Tools.....	276
Building Pathways: Standards and Private Accreditation	
Mechanisms.....	276
The PAGIT Framework.....	277
Responsible Innovation.....	280
Risk Appetites and Competing Values.....	281
An Ecosystem for Identifying and Responding to Harm.....	282
Agility.....	283
New Tools for Examining Risks.....	284
Opportunities from Collaboration.....	285
10. The Future of Regulation (and What We Need to do).....	290
A Time of Transformations.....	290
Background: Failures in the Traditional Models.....	290
A More Sophisticated Model: Adding Behavioural Science	
to Legal and Economic Assumptions.....	290
Duties or Outcomes?.....	292
Solutions and the Way Forward.....	293
Solutions from Human Science.....	293
The Power of Outcomes.....	294
The Power of a Regulatory <i>System</i>	295
A Quick Checklist.....	297
Refreshment.....	298
A Systemic Solution to Risk.....	298
The Power of Collaboration.....	298
<i>Index</i>	301
