

Contents

Chapter 1

<i>PHYSIOLOGY OF THE MICROCIRCULATION</i>	1
1.1. Control of the Peripheral Vasculature	1
1.1.1. Sympathetic Innervation	1
1.1.2. Humoral Agents and Local Tissue Metabolites	3
1.2. Physiological Requirements Imposed by Orthostasis	4
1.3. Orthostatic Circulatory Adjustments: Neurohumoral Mechanisms ..	5
1.3.1. Catecholamine Responses	5
1.3.2. Changes in the Renin-Angiotensin-Aldosterone System	8
1.3.3. Other Physiological Changes in the Erect Posture	9
1.4. Disorders of the Peripheral Circulation	10
1.5. Orthostatic Disorders of the Circulation	11
1.6. Summary	11

Chapter 2

<i>ORTHOSTATIC EDEMA: DEFINITION AND PATHOGENESIS</i>	13
2.1. Definition of Orthostatic Edema	13
2.2. General Mechanisms of Edema Formation	14
2.2.1. Increased Capillary Hydrostatic Pressure	14
2.2.2. Reduced Plasma Protein Oncotic Pressure	16
2.2.3. Pathologically Leaky Capillaries	16
2.2.4. Tissue Pressure Changes	16
2.2.5. Lymphatic Obstruction	16
2.3. Pathogenesis of Orthostatic Edema	16
2.3.1. Role of Posture in the Pathogenesis of Edema	16
2.3.2. Mechanisms of Orthostasis-Induced Fluid Retention	22

2.3.3. Summary of Pathogenesis	41
2.3.4. How Does Orthostasis Trigger the Abnormal Responses in Patients with Orthostatic Sodium Retention?	42
2.3.5. Cause of Excessive Orthostatic Intravascular Pooling	49
2.4. Summary	56

Chapter 3

<i>ORTHOSTATIC EDEMA: CLINICAL FEATURES</i>	59
---	----

3.1. Gender, Age, and Prevalence	59
3.1.1. In Women	59
3.1.2. In Men	59
3.1.3. Age of Onset	60
3.1.4. Distribution and Prevalence	61
3.2. Symptoms and Signs	61
3.2.1. Evidence of Fluid Accumulation	61
3.2.2. Nocturia	65
3.2.3. Symptoms Resulting from the Edema	66
3.2.4. Intracranial Symptoms	67
3.2.5. Cardiovascular Features	69
3.2.6. Other Clinical Features	72
3.3. Factors That Aggravate Orthostatic Edema	73
3.3.1. Menstruation	73
3.3.2. Oral Estrogen Therapy	74
3.3.3. Pregnancy	74
3.3.4. Environmental Heat	74
3.4. Laboratory Findings	75
3.5. Summary	75

Chapter 4

<i>ORTHOSTATIC EDEMA: DIAGNOSIS</i>	77
---	----

4.1. Exclusion of Known Types of Edema	77
4.1.1. Congestive Heart Failure	77
4.1.2. Renal Edema	78
4.1.3. Hepatic Disease	79
4.1.4. Other Generalized Disorders	79
4.1.5. Local Causes of Edema	83
4.1.6. Capillary Leak Syndrome	83

4.2. Positive Diagnosis of Orthostatic Edema	83
4.2.1. History	83
4.2.2. Screening Test	84
4.2.3. Definitive Tests	84
4.3. Summary	88
 Chapter 5	
<i>ORTHOSTATIC EDEMA: TREATMENT AND PROGNOSIS</i>	91
5.1. General Aspects	91
5.2. Control of Posture	92
5.3. Dietary and Fluid Restrictions	92
5.4. Conventional Diuretics	93
5.5. Treatment of Potassium Depletion	93
5.5.1. Potassium-Sparing Diuretics	94
5.5.2. Potassium Supplements	96
5.6. Elastic Garments and Stockings	97
5.7. Dopamine Agonists	98
5.8. Converting Enzyme Inhibitors: Captopril	98
5.9. Vasoconstrictors	99
5.9.1. Ephedrine	99
5.9.2. Amphetamines	101
5.9.3. Midodrine	101
5.9.4. Mechanism of Action of Vasoconstrictors in Orthostatic Edema	105
5.9.5. Side Effects of Sympathomimetic Amines	106
5.9.6. Long-Term Administration of Sympathomimetic Agents	108
5.10. Summary of Therapeutic Program	108
5.11. Summary	109
 Chapter 6	
<i>ORTHOSTATIC DISORDERS OF BLOOD PRESSURE CONTROL: DEFINITIONS AND CLASSIFICATION</i>	111
6.1. Technique of Blood Pressure Measurement in the Upright Posture	111
6.2. Orthostatic Blood Pressure and Heart Rate Changes: Normal Limits	116
6.3. Definable Disorders of Blood Pressure and Heart Rate Control	118
6.3.1. Orthostatic Arterial Anemia	119
6.3.2. Neurocirculatory Asthenia	120

6.4. Classification of Orthostatic Disorders of Blood Pressure Control ..	121
6.4.1. Role of the Autonomic Nervous System	121
6.4.2. Heart Rate Changes	122
6.4.3. Effects of Adrenocortical Insufficiency	123
6.4.4. Excessive Orthostatic Rise in Diastolic Blood Pressure	123
6.4.5. Types of Orthostatic Blood Pressure Disorders	124
6.5. Summary	125

Chapter 7

<i>ORTHOSTATIC DISORDERS OF BLOOD PRESSURE CONTROL: PATHOGENESIS</i>	127
7.1. Orthostatic Hypotension	127
7.1.1. Autonomic Insufficiency	128
7.1.2. Hyperadrenergic Postural Hypotension	130
7.2. Orthostatic Hypertension and Other Types of Orthostatic Blood Pressure Disorders	131
7.3. Causes of Orthostatic Blood Pressure Disorders	132
7.4. Pathogenesis of Orthostatic Blood Pressure Disorders Associated with Intact Autonomic Function	135
7.4.1. Effects of Changes in Blood Volume Induced by Venesection	135
7.4.2. Evidence of Excessive Gravitational Pooling of Blood	143
7.4.3. Effects of Posture on Cardiac Filling	155
7.4.4. Effects of Posture on Cardiac Output	157
7.4.5. Postural Changes in Plasma Norepinephrine Concentration ...	159
7.4.6. Blood Kinin Concentration	161
7.4.7. Potential Role of Insulin	166
7.5. Conclusions	166
7.6. Summary	171

Chapter 8

<i>ORTHOSTATIC DISORDERS OF BLOOD PRESSURE CONTROL: CLINICAL FEATURES</i>	173
8.1. Frequency of Main Symptoms	173
8.2. Intracranial Features	173
8.2.1. Lightheadedness and Blurred Vision	173
8.2.2. Syncope	177
8.2.3. Convulsive Seizures	177
8.2.4. Orthostatic Hemiplegia	177

8.2.5. Headaches	179
8.2.6. Symptoms of Carotid or Basilar Artery Insufficiency	179
8.3. Other Clinical Features	180
8.3.1. Fatigue and Weakness	180
8.3.2. Nausea	180
8.3.3. Palpitations, Flushing Spells, and Excessive Sweating	180
8.3.4. Nocturia	181
8.3.5. Aggravation by Heat	181
8.3.6. Edema	181
8.3.7. Cyanosis of the Legs	182
8.3.8. Changes in Blood Pressure and Heart Rate	182
8.3.9. Cardiac Disorders	185
8.3.10. Plasma Volume Changes	186
8.3.11. Other Features of Autonomic Failure	187
8.4. Summary	187

Chapter 9

<i>ORTHOSTATIC DISORDERS OF BLOOD PRESSURE CONTROL: PREVALENCE AND DIAGNOSIS</i>	189
--	-----

9.1. Prevalence	189
9.2. Sex Incidence and Age of Onset	191
9.3. Hereditary Factor	192
9.4. Diagnosis of Orthostatic Blood Pressure Derangements	192
9.4.1. Orthostatic Hypotension	193
9.4.2. Differentiation of Central from Peripheral Autonomic Failure	194
9.4.3. Venous Pooling Syndrome	196
9.5. Summary	197

Chapter 10

<i>ORTHOSTATIC DISORDERS OF BLOOD PRESSURE CONTROL: TREATMENT AND PROGNOSIS</i>	199
---	-----

10.1. Treatment	199
10.1.1. Physical Compression of the Lower Limbs and Abdomen	200
10.1.2. Vasoconstricting Drugs	200
10.1.3. β -Adrenergic Antagonists	204
10.1.4. Fludrocortisone and Other Volume Expanders	206
10.1.5. Prostaglandin Synthetase Antagonists	208
10.1.6. Vasopressin	208

10.1.7. Atrial Pacemakers 208
10.1.8. Other Measures 209
10.1.9. Treatment of Orthostatic Hypertension 210
10.2. Prognosis 211
10.3. Summary 212

Appendix I

*CLINICAL AND LABORATORY DATA OBTAINED IN 169 PATIENTS
WITH ORTHOSTATIC AND NONORTHOSTATIC EDEMA* 213

Appendix II

*CLINICAL AND LABORATORY DATA OBTAINED IN 159 PATIENTS
WITH ORTHOSTATIC BLOOD PRESSURE DISORDERS* 225
