

brief contents

PART 1	GETTING STARTED	1
1	■ Introducing Kubernetes	3
2	■ Understanding containers and containerized applications	25
3	■ Deploying your first application on Kubernetes	57
4	■ Navigating the Kubernetes API and object model	89
PART 2	RUNNING APPLICATIONS IN KUBERNETES.....	109
5	■ Running applications with pods	111
6	■ Managing the pod life cycle and container health	150
7	■ Organizing pods and other resources using namespaces and labels	190
PART 3	APPLICATION CONFIGURATION AND STORAGE	223
8	■ Configuring applications with ConfigMaps and Secrets	225
9	■ Adding volumes for storage, configuration, and metadata	256
10	■ Persisting data with PersistentVolumes	300

PART 4	CONNECTING AND EXPOSING APPLICATIONS.....	341
11	■ Exposing pods with services	343
12	■ Using Ingress to route traffic to services	392
13	■ Routing traffic using the Gateway API	421
PART 5	MANAGING APPLICATIONS AT SCALE	463
14	■ Scaling and maintaining pods with ReplicaSets	465
15	■ Automating application updates with Deployments	486
16	■ Handling stateful applications with StatefulSets	521
17	■ Deploying per-node workloads with DaemonSets	564
18	■ Batch processing with Jobs and CronJobs	596

brief contents

PART 1 GETTING STARTED..... 1

1 ■ Introducing Kubernetes 3

2 ■ Understanding containers and containers

applications 25

3 ■ Deploying your first application on Kubernetes 27

4 ■ Navigating the Kubernetes API and object model 49

PART 2 RUNNING APPLICATIONS BY KUBERNETES FOR..... 109

5 ■ Running applications with pods 111
