Book 1: Biography of Nicolaus Steno by Gustav Scherz, Translated by Paul Maquet

1.1	Childhood and Youth in Copenhagen 1638–1659	3
1.1.1	Genealogy and Family	3
1.1.2	Childhood Years	11
1.1.3	At Our Lady's School	25
1.1.4	University Years 1656–1659	42
1.2	Years of Discovery in Holland 1660–1664	65
1.2.1	In Amsterdam	67
1.2.2	Research on Glands in Leiden	72
1.2.3	A Holiday Journey to North Holland	83
1.2.4	Two Fruitful Years of Work	88
1.2.5	Mathematics and Research on Muscles	93
1.2.6	Journey Through Belgium, 1663	107
1.2.7	Departure from Holland	113
1.2.8	Back Home and Disappointments, 1664	121
1.3	In Paris and France 1664–1665	131
1.3.1	On to Paris	131
1.3.2	Participant in the Life of the Learned	138
1.3.3	Stensen and Catholic Paris	152
1.3.4	Journey in France in the Autumn of 1665	156

1.4	The First Year in Italy	163
1.4.1	In the Circle of the Grand Duke Ferdinand, Early 1666	163
1.4.2	First Visit to Rome in May/June 1666	177
1.4.3	Studies on Muscles in Tuscany	182
1.4.4	The Huge Shark, Autumn 1666	193
1.4.5	Annexe to Chapter 1.4. Troels Kardel: Stensen's Myology After Scherz	198
1.5	Researcher and Convert in Italy 1667	205
1.5.1	Embryology and Geology	205
1.5.2	Stensen's Conversion	220
1.6	In Italy 1668. The Geological Dissertation, the <i>Prodromus on a Solid Within a Solid</i>	243
1.6.1	Preliminary Geological Studies	243
1.6.2	On a Solid Within a Solid	250
1.6.3	The Scientific Value of the Treatise	260
1.6.4	Remembrance in Posterity	265
1.6.5	Annexe to Chapter 1.6. Troels Kardel: Stensen's Geology after Scherz	276
1.7	The Great Travel 1668–1670	283
1.7.1	Through Italy	284
1.7.2	The Travelling Geologist in Central Europe	291
1.7.3	Defender of Catholicism in Holland in 1670	298
1.8	Under Cosimo III in Florence	305
1.8.1	Theological Writer	307
1.8.2	Geologist of the Grand Duke	327
1.8.3	Departure, Beginning 1672	337
1.9	The Two Years in Copenhagen 1672–1674	343
1.9.1	Copenhagen 1672	343
1.9.2	Royal Anatomist	349

1.9.3	Amongst Catholics in Denmark	370
1.9.4	Departure from Denmark	380
1.10	Educator and Priest in Florence 1675–1677	387
1.10.1	Teacher to the Prince	387
1.10.2	Priest and Missionary	391
1.10.3	The Former Scientist	402
 Book 2: Steno—Scientific Papers—OPH Numbers		
2.0	Scientific Disputation on the Subject of Hot Springs	411
2.1	On the First Discovery of an External Salivary Duct and on the Experiments of Bils	419
2.2	On the Glands of the Mouth and the New Salivary Ducts Proceeding from Them	425
2.3	Various New Observations in the Eyes and Nose, Etc	465
2.4	Response to Vindications for Rehabilitation of the Liver	469
2.5	Anatomical Observations on the Glands of the Eyes	483
2.6	On Vessels of the Nose	495
2.7	Origin of Sweat from Glands. On the Insertion and Valvula of the Thoracic Duct and of the Lymphatics	501
2.8	Why Tobacco Powder Makes the Eyes Clearer. Observation on a Milky Gelatin	505
2.9	Anatomical Observations in Birds and Rabbits	511
2.10	Observations Concerning Movement of the Heart, the Auricles and Vena Cava, Extracted from Dissections of Various Animals Carried Out Here and There	517

- 2.11 Vesicles in the Lung. Anatomy of a Pregnant Rabbit.
Experiments in Lungs. The Milky Vessels of the Udders.
Observations in a Swan, Etc. 523
- 2.12 Diversity of Lymphatic Ducts 529
- 2.13 Prologue of an Apologia in Which It Is Demonstrated
that the Blaesian Judge Is Ignorant in Anatomy and
a Slave of His Sympathies 533
- 2.14 New Structure of Muscles and Heart 543
- 2.15 Specimen of Observation on Muscles and Glands 549
- 2.16 A Letter on the Anatomy of the Ray 579
- 2.17 On the Passage of Yolk into the Intestines
of the Chick 593
- 2.18 The Discourse on the Anatomy of the Brain 603
- 2.19 Observations on Egg and Chick 631
- 2.20 Dissection of an Embryo Monster for Parisians 641
- 2.21 The Uterus of a Hare Dissolving Its Own Foetus 645
- 2.22 Specimen of Elements of Myology 649
- 2.22.1 Most Serene Grand Duke 649
- 2.22.2 Specimen of Elements of Myology 652
- 2.22.3 Definitions 654
- 2.22.4 Suppositions 664
- 2.22.5 Proposition 670
- 2.22.6 Explanation of the Plates 677
- 2.22.7 On Muscles of the Back 686
- 2.22.8 Most Noble Man [Letter to Thévenot] 690
- 2.23 A Carcharodon-Head Dissected 699
- 2.23.1 Concerning Tongue Stones 717

2.23.2	Historia	718
2.23.3	Conjecture 1–5	719
2.23.4	Conjecture 6	727
2.24	Description of the Dissection of a Dogfish	733
2.25	Anatomical Observations Concerning the Eggs of Viviparous Animals	741
2.26	Observations Concerning the Eggs of Viviparous Animals	751
2.27	The Prodromus to a Dissertation on a Solid Naturally Contained Within a Solid	763
2.27.1	Most Serene Grand Duke	764
2.27.2	Three Propositions	776
2.27.3	Incrustations	783
2.27.4	The Strata of the Earth	784
2.27.5	The Origin of Mountains	788
2.27.6	Concerning Crystal	792
2.27.7	Shells of Molluscs	804
2.27.8	Plants	814
2.27.9	Different Changes that have Occurred in Tuscany	816
2.27.10	Explanations of the Plate	822
2.28	On a Calf with Hydrocephalus	827
2.29	Letter to the Grand Duke Cosimo III on the Grotto Above Gresta	839
2.30	Letter to the Grand Duke Cosimo III on the Grottos of Moncodeno	843
2.31	Invitation to the Preface Lecture	849
2.32	Preface to Anatomical Demonstrations in the Copenhagen Theatre in the Year 1673	853
2.33	“Niels Stensen’s Public Dissection No. XVI of a Female Cadaver in Copenhagen’s Anatomical Theatre 1673” as described by Holger Jakobsen (<i>Jacobæus</i>)	861

2.34	Description of the Muscles of an Eagle	871
2.34.1	On the Muscles of the Head	871
2.34.2	On the Muscles of the Neck	875
2.34.3	On the Muscles Serving to the Common Cavity of Thorax and Abdomen	879
2.34.4	On the Muscles of the Rump	881
2.34.5	On the Muscles Connecting the Bones of the Wings with Each Other and with the Bones of the Trunk	881
2.34.6	On the Muscles Uniting the Bones of the Legs to Each Other and to the Bones of the Trunk	886
2.35	Circular Course of the Blood Made Clearer Through Separation of the Ventricles of the Heart	893
2.36	Ornaments: Monuments, Signs, Arguments	897
	Bibliography	911
	References	913
	Index of Persons	931
