<b>Section I. Spherical Correction by Radial Keratotomy—Single Depth Incisions</b>	<b>1</b>
<b>1. Four-Incision Radial Keratotomy for Low to Moderate Myopia and Eight-Incision Radial Keratotomy for High Myopia</b>	<b>3</b>
<i>James J. Salz, MD</i>	
Four-Incision Radial Keratotomy for Low to Moderate Myopia	5
Eight-Incision Radial Keratotomy for High Myopia	21
Summary	25
<b>2. Standard Surgical Technique for Single Pass Four- and Eight-Incision Radial Keratotomy</b>	<b>35</b>
<i>Robert F. Hofmann, MD</i>	
<i>Richard L. Lindstrom, MD</i>	
Patient Motivation and Selection	37
Pathophysiological Principles	38
Guides for Surgical Planning	40
Preparation for Surgery	43
Marking the Visual Axis	51
Surgical Procedures	53
Complications	56
Postoperative Management	58
Conclusion	61

**Section II. Spherical Correction** **65**  
**by Radial Keratotomy —**  
**Multiple Depth Incisions**

**3. Modified Fyodorov Technique: Limbus to Optical Zone Cutting** **67**

*Albert C. Neuman, MD*

*George C. McCarty, PhD*

Introduction	69
Presurgical Preparation	69
Preoperative Examination	69
Informed Consent	70
Surgery	72
Conclusions	87

**4. Centrifugally Placed Stepped Incisions for Correction** **89**  
**of Idiopathic Astigmatism**

*George W. Tate, Jr., MD, FACS*

Peripheral Deepening Versus Classical Redeepening	93
Influence of Technique on Complications	93
Characteristics of Desirable Techniques	94
Technique	94
Summary	96

<b>Section III. Incisional Approaches to Correction of Astigmatism</b>	<b>99</b>
<b>5. Graded Non-Intersecting Transverse Incisions for Correction of Idiopathic Astigmatism</b>	<b>101</b>
<i>Spencer P. Thornton, MD, FACS</i>	
Evolution of Non-Intersecting Transverse Incisions	104
Effects of Transverse Incisions	108
When Should Astigmatism be Corrected	109
Recommended Method of Correction	110
Incision Length	112
Recommendations for Astigmatic Correction	113
Summary	115
<b>6. Astigmatic Keratotomy</b>	<b>115</b>
<i>Thomas D. Lindquist, MD, PhD</i>	
<i>Jonathan B. Rubenstein, MD</i>	
<i>Robert F. Hofmann, MD</i>
