

CONTENTS

Introduction	9
1 Development of Concepts of Computer Science Education	13
1.1 IT Terminology	15
1.2 Concepts of Computer Science Education in the 1990s	18
1.2.1 Subject Practical Activities and Thematic Unit Working with a Computer	19
1.2.2 Elective subject Computer Science	20
1.3 The Concept of Teaching Computer Science Between 2005 and 2021	22
1.3.1 FEP PE for the 1st Stage of Primary School	25
1.3.2 FEP PE for the 2nd Stage of Elementary School	26
1.4 The Current Concept of Teaching Computer Science	28
1.4.1 FEP PE and its Amendments	30
1.4.2 Information Technology in the FEP PE	33
1.5 Summary	36
2 Computational Thinking and its Development	37
2.1 Components of Computational Thinking	40
2.2 Current Level of Implementation of Computational Thinking	42
2.2.1 Integration of Computational Thinking into the Education System in Czechia	44
2.3 The Development of Computational Thinking in Applied Teaching	48
2.3.1 Methods for Implementing Computational Thinking and Tools for its Development	49
2.4 Summary	58
3 Web and Mobile Applications in the Teaching of Algorithmization and Programming	60
3.1 Analysis of Selected Web and Mobile Applications	61
3.1.1 Methods of Teaching Algorithmization and Programming	62
3.1.2 SoloLearn	65
3.1.3 Codecademy and Codecademy GO	68
3.1.4 The Odin Project	73
3.1.5 freeCodeCamp	76
3.1.6 edX	81
3.1.7 Coursera	84

3.1.8 W3Schools	87
3.1.9 Mimo	92
3.2 Summary	94
4 Current Awareness of Web and Mobile Applications Among High School Students	99
4.1 Research Objectives	99
4.2 Methods Used	100
4.2.1 Data Collection	100
4.2.2 Data Evaluation	100
4.2.3 Description of the Research Sample	101
4.3 Data Analysis and Interpretation	102
4.4 Research Conclusions	127
5 Principles, Foundations and Focus of the New Teaching Content	131
5.1 Basic Programming Constructs	131
5.1.1 Variables	132
5.1.2 Control Structures	133
5.1.3 Data Structures	135
5.1.4 Syntax	136
5.1.5 Semantics	138
5.2 Methods of Teaching Algorithmization and Programming	140
5.3 Basic Approaches to Teaching Algorithmization and Programming	140
5.3.1 Approaches to Teaching Algorithmization and Programming Used in Testing Experimental Teaching Content	144
5.4 Teaching Programming in Practice	145
5.4.1 Summary	148
5.5 New Teaching Content	148
5.5.1 Basic Concepts	149
5.5.2 Strings and Variables	151
5.5.3 Control Structures	153
5.6 Diagram of the Application of New Educational Content in The Context of the Experiment	156
6 Experimental Teaching of Programming in Python Through the Online Application SoloLearn	158
6.1 Research Objectives	158
6.2 Description of the Research Sample	159
6.3 Experiment Design	160
6.3.1 Experiment Parameters	160

6.4	Assumptions and Hypotheses	163
6.4.1	Data Evaluation	165
6.4.2	Graphical Interpretation of the Results Obtained by Normality Tests	166
6.4.3	Parametric Statistical Methods for Comparing the Average Scores Between Two Selected Groups	167
6.4.4	Non-parametric Statistical Methods	169
6.5	Data Analysis and Interpretation	170
6.5.1	Category "Basic Concepts"	170
6.5.2	Category "Strings and Variables"	174
6.5.3	Category "Control Structures"	176
6.6	Overall Interpretation	180
6.7	Observation of Students During the Experiment and Other Notes	182
6.8	Normality Tests	184
6.9	Two-sample Student's T-test for Entry Tests	189
6.10	Two-sample Student's T-test for Final Tests	192
6.11	Paired Student's T-test for the Control Group	195
6.12	Paired T-test for the Experimental Group	196
6.13	Conclusions of the Research	197
6.14	Discussion	199
7	Level of Teachers' Preparedness for Teaching Algorithms and Programming	201
7.1	Research Objectives	201
7.2	Methods Used	202
7.2.1	Data Evaluation	203
7.2.2	Description of the Research Sample	203
7.3	Data Analysis and Interpretation	204
7.4	Research Conclusions	238
	Conclusions	240
	List of References	245
	Annotation	262
