

# CONTENTS

	PAGE
PREFACE	v
<b>CHAPTER I</b>	
PHYSICAL STATE	1
Allotropy. Allotropy in Compounds. The Passive State. The Colloidal State. The Preparation of Colloids. Dialysis. Adsorption—Coagulation and Protection of Colloids. Gels. Chemical Reactions in Gels. Colloidal Membranes.	
<b>CHAPTER II</b>	
ISOLATION OF THE ELEMENTS	19
Reduction by Hydrogen. Reduction by Carbon and Carbon Monoxide. Reduction by Heat Decomposition. Reduction by other Metals. Reduction in Solution. Electrolytic Reduction.	
<b>CHAPTER III</b>	
BINARY COMPOUNDS	32
Hydrides. Oxides. Peroxides. Sulphides. Persulphides. Halides. Polyhalides. Nitrides.	
<b>CHAPTER IV</b>	
ACIDS, BASES AND SALTS	62
Halogen Hydracids and Oxyacids. Bases. Normal Salts. Acid Salts. Basic Salts. Double Salts. Halogeno-Acids. Polyacids. Thioacids and Salts. Peracids and Salts. Acid Chlorides.	
<b>CHAPTER V</b>	
COMPLEX SALTS	100
Cobaltammines. Isomerism in Co-ordinated Compounds. Internally Complex Compounds.	
<b>CHAPTER VI</b>	
COMPOUNDS OF SOME RARER ELEMENTS	117
Selenium. Beryllium. Titanium. Extraction of the Rare Earths and Thorium from Monazite. Molybdenum. Tungsten. Uranium.	
<b>CHAPTER VII</b>	
REACTIONS WHICH FORM THE BASIS OF SOME INDUSTRIAL PROCESSES	141
Metallurgical Processes. Acids and Alkalis. Miscellaneous Industrial Reactions. Colloid Industries.
