

CONTENTS

PART I PERFUMERY SYNTHETICS

	<i>page</i>		<i>page</i>	
Chapter 1	Hydrocarbons	1	8 Ethers	141
2	Alcohols and Phenols	13	9 Ether-Esters	156
3	Aldehydes	35	10 Lactones	162
4	Acetals	62	11 Nitrogenous Compounds	190
5	Ketones	79	12 Acids, Acyloins, Halides and Sulphur Compounds	198
6	Ketals	114		
7	Esters	120		
Chapter 13	Properties of Perfumery Materials			202

PART II OLFACTORY RESEARCH

	<i>page</i>	
Chapter 1	Future Developments	211
2	The Message to the Brain	216
3	The Number of Fundamental Odours	223
4	The Stimulus; Wave or Particle?	232
5	Is Chemical Unsaturation Necessary for Odour?	242
6	Odour and Molecular Architecture	250
7	Is there a Relation between Odorants and Carcinogens?	257

PART III ESSAYS ON OLFACTION

	<i>page</i>	
Chapter 1	How Odorous Particles Produce the Sense of Smell	269
2	Can Smell be Detected other than by the Nose?	274
3	A New Animal Fixative may Appear	281
4	The Biological Derivation of Civetone and Muscone	287
5	Musings on Olfaction	291
6	The Aphrodisiac Basis of Perfumes	294
7	The Synthesis of Irone	298
8	A New Synthesis of Muscone	306
9	Modern Developments in the Chemistry of Perfumery	310
10	Research in the Perfumery and Cosmetics Industry	317
11	A Minister for Research	321
