PREFACE.....	6
SYMBOLS USED .....	8
INTRODUCTION.....	11
CHAPTER I. SURVEY OF PREVIOUS WORK.....	14
A. Paul's Patent .....	15
B. Fibre Length and its Determination .....	16
C. Clinging Power and Friction Properties of the Fibre .....	17
D. Determination of "Drawing Stress" .....	19
E. Fibre Movement in the Draw Field .....	20
F. Study of the Fibre Strand .....	22
G. Study of the Ordinary Drafting Arrangement.....	26
H. Study of the High Draft Arrangement .....	27
I. Factors Affecting the Yarn Properties .....	28
J. Particular Influence of the Fibre Length on the Yarn Properties	30
K. Relation Between Properties of the Fibre and of the Fabric ....	34
CHAPTER II. DEFINITIONS .....	35
A. Fibre Length and its Distribution .....	35
B. Spinning Methods .....	38
C. Different Forms of Intermediate Products .....	39
D. Degree of Parallelism .....	39
CHAPTER III. STATISTICAL COMPUTATIONS ON THE FIBRE MOVEMENT .....	40
A. Basic Assumptions .....	40
B. Influence of Doubling .....	42
C. Simple Considerations of the Fibre Movement .....	42
D. Case $a = l$ .....	44
E. Case $a > l$ .....	44
F. Discussion .....	47
G. Irregularity Ratio .....	48
CHAPTER IV. SLIVER TESTING METHODS USED AND THE CON- TROL OF THEM.....	49
A. Recording of Sliver Irregularity .....	49
<i>a. The Compression Method</i> .....	50
<i>b. The Capacity Method</i> .....	52

B.	Evaluation of Irregularity from Charts .....	53
	<i>a. By Means of the Coefficient of Variation</i> .....	53
	<i>b. By Means of the Linear Deviation</i> .....	55
	<i>c. By Means of the Mean Maximum Deviation</i> .....	55
C.	Results and Discussion .....	56
	<i>a. Effect of Steaming on the Sliver Irregularity</i> .....	56
	<i>b. Relation Between Quadratic and Linear Deviation in Test Grooves of Different Widths</i> .....	57
	<i>c. Relation Between Mean Maximum and Linear Deviation</i> .....	59
CHAPTER V. DRAFTING UNDER SIMPLIFIED CONDITIONS.....		61
A.	Test Material.....	61
B.	Method .....	63
C.	Results and Discussion .....	67
	<i>a. Analysis of the Drafting Progress with Low Drafting Speed</i> .....	67
	<i>b. Analysis of the Drafting Progress with High Drafting Speed</i> .....	71
	<i>c. Influence of Sliver Thickness</i> .....	74
CHAPTER VI. INFLUENCE OF THE SETTING DISTANCE .....		76
A.	Test Material .....	76
B.	Method .....	76
	<i>a. With Low Degree of Parallelism</i> .....	76
	<i>b. With Middle Degree of Parallelism</i> .....	76
	<i>c. With High Degree of Parallelism</i> .....	76
C.	Results and Discussion .....	78
CHAPTER VII. INFLUENCE OF THE DRAFT RATIO .....		82
A.	Test Material .....	82
B.	Method .....	83
C.	Results and Discussion .....	83
CHAPTER VIII. INFLUENCE OF DRAFTING ON SLIVER THICKNESS DISTRIBUTION .....		86
A.	Test Material .....	86
B.	Method .....	86
C.	Results and Discussion .....	91
	<i>a. For B:0</i> .....	91
	<i>b. For B:0.85</i> .....	91
	<i>c. For B:0.85 after Simplified Drafting</i> .....	92
CHAPTER IX. DRAFTING UNDER INDUSTRIAL FORMS .....		93
A.	Test Material .....	93
B.	Method of Manufacturing and Testing .....	93

C.	Results and Discussion .....	99
	<i>a. Uniform Fibre Length</i> .....	99
	<i>b. Two Fibre Lengths in the Fibrogram</i> .....	100
	<i>c. Different Fibrograms but the Same Mean Fibre Length</i> .....	105

CHAPTER X. FIBRE LENGTH DISTRIBUTION AND YARN PRO-		
PERTIES .....		107
A.	Test Material .....	107
B.	Method of Producing .....	107
C.	Method of Testing .....	109
	<i>a. Yarn Count</i> .....	109
	<i>b. Breaking Strength</i> .....	109
	<i>c. Extensibility</i> .....	110
	<i>d. Breaking Length</i> .....	110
	<i>e. Irregularity</i> .....	110
	<i>f. Probable Breakage-free Length</i> .....	110
D.	Results and Discussion .....	112
	<i>a. Uniform Fibre Length</i> .....	112
	<i>b. Two Fibre Lengths in the Fibrogram</i> .....	117
	<i>c. Different Fibrograms but the Same Mean Fibre Length</i> .....	120

CHAPTER XI. FIBRE LENGTH DISTRIBUTION AND FABRIC		
PROPERTIES .....		123
A.	Test Material .....	123
B.	Method of Producing .....	124
C.	Method of Testing .....	124
	<i>a. Weight per Sq. Unit</i> .....	124
	<i>b. Breaking Strength and Length</i> .....	124
	<i>c. Extensibility</i> .....	125
	<i>d. Abrasion Strength</i> .....	125
	<i>e. Porosity</i> .....	127
D.	Results and Discussion .....	127
	<i>a. and b. Weight pr Sq. Unit. Breaking Strength and Length</i> ..	127
	<i>c. Extensibility</i> .....	129
	<i>d. Abrasion Strength</i> .....	130
	<i>e. Porosity</i> .....	132

SUMMARY .....	134
BIBLIOGRAPHY .....	139
