

Contents

	PAGE
CHAPTER 1. HISTORY AND DEVELOPMENT OF EARLY THEORIES . . .	1
The Lens and Microscope, 2. Spontaneous Generation, 8. Fermentation, 12. Early Work in Medical Bacteriology, 16. Bacteriology of Sanitation, 22. Animal Pathology, 24. Agricultural Bacteriology, 25. Industrial and Food Micro- biology, 30.	
CHAPTER 2. SYSTEMATIC RELATIONSHIPS OF PLANT AND ANIMAL GROUPS	34
Haeckel, 34. Characteristics of Plants and Animals, 35. Biology of Plants, 40. Animal Biology, 48.	
CHAPTER 3. LIVING MATTER AND THE CELL	51
Biology, Botany, and Zoology, 51. Protoplasm, 54. Mor- phology of Cells, 57. Multiplication of Cells, 59.	
CHAPTER 4. ULTRAMICROSCOPIC FORMS OF LIFE	64
Filterable Forms of Life, 65. Bacteriophage, 65. Viruses, 68. Rickettsiae, 72.	
CHAPTER 5. MORPHOLOGY OF BACTERIA	75
Shape and Size of Bacteria, 77. Organs of Locomotion, 84. Nucleus, 88. Sporulation, 91. Reproduction, 96. Chem- ical Composition, 99.	
CHAPTER 6. VARIABILITY OF MICROORGANISMS	104
Modern Pleomorphism, 106. Genetic Variations, 110.	
CHAPTER 7. NOMENCLATURE AND CLASSIFICATION OF BACTERIA . .	111
Nomenclature, 113. Descriptive Chart and Index Number, 116. Early Classifications, 117. Migula's Classification, 118. Lehmann and Neumann's Classification, 119. Ber- gey's Classification, 121. Identification of Microorganisms, 149.	
CHAPTER 8. MOLDS	151
Structure, 151. Spores, 153. Order Mucorales, 154. Thamnidium, 158. Penicillium Molds, 158. Aspergillus	

	PAGE
Molds, 160. Botrytis, 164. Oidium, 164. Alternaria, 165. Monilia, 165. Fusarium, 166. Actinomyces, 168. Pathogenic Molds, 168.	
CHAPTER 9. THE YEASTS AND RELATED ORGANISMS	171
Shapes, 172. Structure, 174. Reproduction, 177. Hybridization, 180. Classification, 182. Industrial Yeasts, 189. Pathogenic Yeasts, 191.	
CHAPTER 10. THE PROTOZOA.	194
Morphology, 194. Reproduction, 194.	
CHAPTER 11. ACTION OF PHYSICAL AGENTS ON BACTERIA	201
Light, 201. Temperature, 205. Moisture, 220. Drying, 222. Pressure, 223. Agitation, 225. Aeration, 225. Gravity, 225. Electricity, 226. Surface Tension, 227. Sound Waves, 227.	
CHAPTER 12. RELATION OF CHEMICAL AGENTS TO BACTERIA	229
Disinfection, 229. Specificity of Disinfectants, 237. The Halogen Compounds, 238. Phenolic Group, 242. Metals and Salts of Heavy Metals, 224. Miscellaneous Compounds, 247. Standardization of Disinfectants, 253.	
CHAPTER 13. MUTUAL RELATIONSHIP — MICROBIAL ASSOCIATIONS	258
Symbiosis, 258. Antibiosis, 260. Metabiosis, 264.	
CHAPTER 14. NUTRITION AND METABOLISM OF BACTERIA	265
Plant Metabolism, 267. Animal Metabolism, 267. Bacterial Metabolism, 267. Foods, 269. Fermentation and Respiration, 270. Cycles of Elements, 273. Special Products of Metabolism, 275.	
CHAPTER 15. GROWTH OF BACTERIA	280
Growth Histories, 281. Factors Influencing Growth, 283.	
CHAPTER 16. BACTERIAL ENZYMES	287
Nature, 288. Nomenclature, 288. Changes by, 289. Structure, 292. Characteristics of, 294. Intracellular (Endoenzymes), 295. Extracellular (Exoenzymes), 295. Practical Applications, 298.	
CHAPTER 17. NITROGEN METABOLISM (CYCLE); SULFUR METABOLISM (CYCLE); CARBON METABOLISM	303
Occurrence of Nitrogen, 303. Nitrogen Cycle, 304. Chemical Methods of Fixation, 305. Biological Methods of Fixa-	

	PAGE
tion, 305. Nitrification, 316. Denitrification, 317. Putrefaction, 319. Sulfur Cycle, 323. Carbon Cycle, 328.	
CHAPTER 18. MICROORGANISMS IN AIR	335
Dust and Microorganisms, 338. Cleaning of Air, 340.	
CHAPTER 19. WATER BACTERIOLOGY	343
Transmission of Diseases, 344. Evidences of Pollution, 345. Methods of Water Examination, 346. Purification of Public Water Supplies, 351. Home Water Supplies, 355. Disin- fection of Small Quantities of Water, 358. Bottled and Mineral Waters, 361. Bacteriology of Ice, 362.	
CHAPTER 20. SEWAGE TREATMENT AND BACTERIOLOGY	364
General Principles of Sewage Treatment, 365. Stream Pollu- tion, 369. Swimming Pools, 372.	
CHAPTER 21. BACTERIOLOGY OF MILK AND MILK PRODUCTS	375
Bacteria in Milk, 375. Improving Milk Quality, 378. Pas- teurization, 381. Diseases Spread by Milk, 383. Butter, 386. Cheese, 387. Ice Cream, 388. Fermented Milk, 389. Concentrated Milk, 391.	
CHAPTER 22. INDUSTRIAL FERMENTATIONS	394
Yeast Fermentations, 394. Alcoholic Beverages, 397. Bread Yeast, 398. Bacterial Fermentations, 400. Vinegar Fer- mentation, 401. Mold Fermentations, 405. Miscellaneous Fermentations, 407. Textile Fibers, 409. Beverages, 412. Bread, 413. By-Products from Industrial Fermentations, 415.	
CHAPTER 23. FOOD PRESERVATION	418
Food and Drug Acts, 420. Drying, 421. Low Temper- ature, 422. High Temperatures, 424. Canning, 427. Satisfactory Canned Foods, 436. Canning Powders, 438. Preservation by Chemicals, 439. Salting and Pickling, 440. Spices, 443. Smoking, 443.	
CHAPTER 24. FOOD INFECTION AND FOOD POISONING	446
Food-Borne Infections, 447. Food-Borne Intoxications, 450. Botulism, 450. Salmonella Food Poisoning, 454. Staphylo- coccus Food Poisoning, 455. Ptomaines, 456. Storage of Food in Open Cans, 458. Foods Containing Metallic Salts, 459. Allergic Reactions, 460. Trichinosis, 461.	
CHAPTER 25. RELATION OF BACTERIA TO DISEASE	463
Theories of Disease, 464. Types of Disease, 465. Specific Bacterial Infections, 468.	

	PAGE
CHAPTER 26. TRANSMISSION OF INFECTING AGENTS	478
Carriers, 479. Fomites, 480. Public Drinking Fountains, 485. Air-Borne Infections, 486. Contact Infection, 487. Insect-Borne Diseases, 489. Animal-Borne Diseases, 492. Preventing Spread of Disease, 495. Quarantine Methods, 496. Epidemiology, 500.	
CHAPTER 27. FACTORS INFLUENCING INFECTION	502
Resistance of Host, 502. Malnutrition, 505. External Defenses, 507. Infecting Agent, 509.	
CHAPTER 28. MODES OF BACTERIAL ACTION	512
Bacterial Toxins, 513. Bacterial Leucocidins, 519.	
CHAPTER 29. PROTECTIVE SUBSTANCES—IMMUNE BODIES, ANTIBODIES	520
Theories of Immunity, 520. Antitoxins (Antitoxic Sera), 524. Agglutinins, 536. Precipitins, 540. Opsonins, 545. Lysins, 546.	
CHAPTER 30. VARIETIES OF IMMUNITY	550
Natural Immunity, 550. Methods of Producing Artificial Immunity, 553. Methods of Passive Immunity, 557.	
CHAPTER 31. BACTERIA IN PLANT DISEASES	569
Blights, 572. Leaf Spots, 575. Rots, 577. Wilts, 579. Galls, 580.	
APPENDIX	587
Bacteriological Literature, 587. Glossary, 579.	
INDEX	611
