

CONTENTS

	<i>Page</i>
I. GENERAL COMMENTS ON THE ANALYTICAL USEFULNESS OF CHEMICAL REACTIONS	1
II. THE CHARACTERIZATION OF CHEMICAL TESTS BY SENSITIVITY, SELECTIVITY, SPECIFICITY, AND LIMITING PROPORTION. THE ROLE OF REACTION CONDITIONS	7
III. TYPES OF COMPLEX AND COORDINATION COMPOUNDS WHICH PLAY A ROLE AS REACTANTS AND PRODUCTS OF REACTION IN ANALYTICAL PROCESSES	23
Ammonia and Its Derivatives as Constituents of Complex Compounds	28
Water and Its Derivatives as Constituents of Complex Compounds	30
Acido Compounds	34
Coordination of Elements	36
Polyacids	39
Inner Complex Compounds	41
Organic Molecular Compounds	51
Complex Compounds of Undefined Stoichiometric Composition	60
IV. THE MASKING AND DEMASKING OF REACTIONS	
Masking	67
Demasking	104
V. ENHANCEMENT OF REACTIVITY OF COMPOUNDS AND REACTION SYSTEMS	109
Raising the Reactivity by Complex Formation	109
Catalyzed Reactions and Induced Reactions	122
Induced Precipitation and Induced Solution	147
VI. THE EFFECT OF CERTAIN ATOMIC GROUPINGS ON THE SPECIFIC AND SELECTIVE ACTIVITY OF COMPOUNDS IN INORGANIC ANALYSIS	167
Acidic OH Groups Bound to Carbon Atoms	173
The Specific and Selective Action of Rhodizonic Acid	174
The Selective Activity of Pyrogallol and <i>o</i> -Situating Phenolic OH Groups	177
The Germanium—Specific Action of 9-Phenyl-2,3,7-Trihydroxy-6-Fluorone	179
Analytical Behavior of 8-Hydroxyquinoline (Oxine) and Its Derivatives	181
The Selective Action of 4-Hydroxybenzothiazole	192
The Behavior of <i>o</i> -Hydroxyaldoximes	196
The Behavior of Hydroxyanthraquinones	201
The Selective Action of Dicyandiamidine (Guanyl Urea)	205
The Thallium-Specific Group —CO—CH ₂ —CO— (in the Presence of Carbon Disulfide)	208

The Behavior of the Group —CO—C(:NOH)— in Aliphatic Chains	209
The Zirconium-Specific Action of Mandelic Acid	213
Behavior of α - and <i>o</i> -Aminocarboxylic Acids	215
α -Amino- <i>n</i> -Caproic Acid	217
Anthranilic Acid (<i>o</i> -Aminobenzoic Acid)	219
Quinaldic Acid (Quinoline-2-Carboxylic Acid)	221
Quinoline-8-Carboxylic Acid	224
Other <i>o</i> -Aminocarboxylic Acids	225
Acidic SH Groups, Bound to Carbon Atoms	225
Selective Actions of 1,2-Mercaptobenzenes	226
Selective and Specific Actions of Thioglycolic Acid β -Aminonaphthalide (Thionalid)	230
The Cobalt and Nickel Salts of Thioglycolic Acid Anilide	233
Selective Precipitations with Mercaptobenzothiazol	236
The Analytical Behavior of Diphenylthiocarbazone (Dithizone)	241
The Selective Activity of Rubeanic Acid	248
Acidic NOH Groups	251
Selective Actions of Nitrosonaphthols	252
Selective Actions of Nitrosoarylhydroxylamines (Cupferron and Neocupferron)	262
The Copper-Specific Group	266
$\begin{array}{c} \diagup \text{C} - \text{C} \diagdown \\ \quad \\ \text{OH} \quad \text{NOH} \end{array}$	
The Nickel and Palladium Precipitating Group	270
$\begin{array}{c} -\text{C} - \text{C}- \\ \quad \\ \text{HON} \quad \text{NOH} \end{array}$	
Selective Actions of Organic Nitro Compounds toward Alkali Metals	280
The Palladium-Specific Action of 6-Nitroquinoline	284
Acidic Inorganic Groups in Organic Compounds	288
The Selective Activity of the SO ₂ H and SeO ₂ H Groups	289
The Zirconium-Binding Group	291
$\begin{array}{c} \text{OH} \\ \\ -\text{AS} = \text{O} \\ \\ \text{OH} \end{array}$	
The Selective Action of Bis- <i>p</i> -Chlorophenylphosphoric Acid	294
The Specific Action of the Acidic —O—OH Group	297
Selective Actions Exercised by Organic Derivatives of Ammonia	302
Organic Bases that Form Water-Insoluble Nitrates	305
Selective Behavior of <i>p</i> -Fuchsine	310
Selective Precipitations through Coordinative Binding of Benzidine	312
The Selective Action of α, α' -Dipyridyl and α, α' -Phenanthroline and Their Ferrous Compounds	319
Selective Activity of the <i>p</i> -ON—C ₆ H ₄ —N Group	326
The Silver-Binding NH—Group	328
Redox Reactions with Benzidine and Benzidine Homologues	332
Specific and Selective Effects Based on Condensation Reactions between Organic and Inorganic Compounds	337
The Methylene Blue Reaction of Hydrogen Sulfide	338

Condensation of Formaldehyde with Ammonia or Alkali Bisulfite	339
Condensation of Aromatic Aldehydes with Hydrazine	342
Condensation Reactions of Diacetylmonoxime and Salicylaldehyde with Hydroxylamine	343
Selective Condensation Reactions of Salicylaldehyde by Formation of Inner Complex Salts	345
Condensation Reactions of 2,4-Diamino-6-Hydroxypyrimidine and Chrysean with Nitrous Acid	350
Condensation of 1,8-Diaminonaphthalene with Nitrous Acid or Selenious Acid	351
Oxidative Condensation of 8-Hydroxyquinoline with Hydroxylamine	353
Condensation Reactions of Organic Hydroxy Compounds with Boric Acid	354
Condensation Reactions of Pyrocatechol with Hydroxides of Metals and Nonmetals	361
The Formation of Thioketone with Free Sulfur	366
VII. EFFECT OF CERTAIN ATOMIC GROUPINGS ON THE SPECIFIC AND SELECTIVE ACTIVITY OF COMPOUNDS IN ORGANIC ANALYSIS	369
Preliminary Tests Based on Group Actions	371
Direct Examination for Certain Atomic Groups by Reactions with Inorganic and Organic Reagents	373
1,2-anti-Dioximes $R-C-C-R$	374
$\begin{array}{c} \text{HON} \parallel \quad \parallel \text{NOH} \\ R-CH-C-R \\ \quad \parallel \\ \text{OH} \quad \text{NOH} \end{array}$	
Acylloximes	375
Aromatic <i>o</i> -Hydroxyaldoximes 	375
1,2-Isonitrosoketones $R-CO-(\text{:NOH})-R$	375
α, α' -Dipyridyls 	375
Sulfinic Acids $R-SO_2H$	376
Arsonic Acids $R-AsO(OH)_2$	376
Mercaptans and Thioketones $R-SH$ and >C=S	376
Phenols and Polyphenols	376
Nitroso Compounds, Primary Aromatic Amines, and Aliphatic or Aromatic Hydrazines	377
Organic Compounds with Reactive CH_2 and NH_2 Groups	377
Conversion of Organic Compounds into Products with Characteristic Atomic Groups	378
Conversion of Nitro to Nitroso Compounds	379
Conversion of 1,2-Diketones into anti-Dioximes	379
Conversion of Ketomethylene Compounds into anti-Dioximes	379
Conversion of Aromatic Sulfonic Acids into Phenolates	380
Conversion of Primary and Secondary Alcohols into Alkali Xanthates	380
Conversion of Carboxylic Acids (and Their Derivatives) into Hy-	

droxamic Acids	380
Conversion of Amines into Rhodanine Dyes	381
VIII. REGULARITIES AND ANOMALIES IN THE SOLUTION OF MATERIALS IN INDIFFERENT SOLVENTS	383
IX. THE INFLUENCE OF SIZE—AND WEIGHTING—EFFECTS ON SOLUBILITY AND SALT-FORMING ABILITY	411
X. SURFACE EFFECTS IN ANALYTICAL CHEMISTRY	433
Color, Solubility, and Suspendibility of Solids as a Function of Particle Size	433
Colloidal Range, Colloidalness, Changes of State in Colloid Systems	444
Mutual Actions of Inorganic Materials in the Colloidal Range	464
Protective Colloid and Peptization Action, Colloid Masking and Sensitization by Organic Compounds	477
Adsorption as a General Phenomenon of the Accumulation of Materials on Surfaces	492
Modification of the Reactivity of Materials by Adsorption	521
The Adsorption of Dyes	530
Adsorption Compounds	547
Isolation and Separation of Materials by Adsorption (Adsorption Analysis)	567
Capillary Analysis and Capillary Effects in Spot Test Analysis	569
Chromatography	589
Foaming Analysis	610
XI. GENETIC FORMATION OF MATERIALS AND TOPOCHEMICAL REACTIONS	613
XII. THE ANALYTICAL USE OF FLUORESCENCE EFFECTS AND PHOTOCHEMICAL REACTIONS	671
AUTHOR INDEX	695
SUBJECT INDEX	710
