

# Contents

Preface .....	xv
1. Introduction .....	1
<i>K. J. Gregory and D. E. Walling</i>	
1.1 A century of milestones .....	2
1.2 A decade of papers .....	3
1.3 A decade of readings .....	6
1.4 Emphasis upon processes .....	7
1.5 A book for processes .....	9
 Part I ATMOSPHERE  	
Introduction	
<i>K. J. Gregory and D. E. Walling</i>	
2. The Radiation Balance .....	15
<i>D. Greenland</i>	
2.1 Introduction .....	15
2.2 Radiation laws and the radiation balance .....	16
2.3 Natural alteration of the radiation balance .....	20
2.4 Human influence on the radiation balance .....	21
(a) The local scale .....	21
(b) The regional scale .....	22
(c) The global scale .....	25
2.5 The future .....	28
3. Precipitation .....	31
<i>B. W. Atkinson</i>	
3.1 Introduction .....	31
3.2 Precipitation mechanisms .....	31

3.3	Conscious modification of precipitation .....	33
	(a) Increasing rainfall and snowfall .....	33
	(b) Hail suppression .....	36
	(c) Non-meteorological effects of cloud seeding .....	37
3.4	Unconscious modification of precipitation .....	38
	(a) Acid rain .....	38
	(b) Urban influence on precipitation amounts .....	41
3.5	Conclusion .....	47

## Part II HYDROSPHERE

	Introduction .....	51
	<i>D. E. Walling and K. J. Gregory</i>	
4.	Hydrological Processes .....	53
	<i>D. E. Walling</i>	
4.1	Introduction .....	53
4.2	Hydrological processes and their modification .....	55
4.3	Water resource exploitation .....	60
4.4	Catchment studies and experiments .....	66
	(a) Land clearance .....	69
	(b) Land drainage .....	71
	(c) Strip mining .....	71
	(d) Conservation measures .....	72
	(e) Urbanization .....	72
4.5	Quality as well as quantity .....	74
	(a) Vegetation removal .....	75
	(b) Soil disturbance .....	77
	(c) Irrigation .....	79
	(d) Non-point pollution .....	79
4.6	Problems and prospects .....	81
5.	Coastal Processes .....	87
	<i>E. C. F. Bird</i>	
5.1	Introduction .....	87
5.2	Direct and indirect effects .....	88
5.3	Effects of sea walls .....	90
5.4	Effects of breakwaters .....	96
5.5	Effects of dredging and dumping .....	104
5.6	Effects of subsidence .....	105

5.7	Effects of sedimentological changes .....	105
5.8	Effects of vegetation .....	110
5.9	Conclusions .....	115
6.	Ocean Processes .....	117
	<i>C. A. M. King</i>	
6.1	Introduction .....	117
6.2	Man and the Oceans .....	126
	(a) Exploration .....	126
	(b) Research .....	126
	(c) Exploitation .....	128
	(d) Strategy .....	136
	(e) Recreation .....	137
	(f) Transport .....	137
6.3	Conclusions—problems and opportunities of the oceans .....	138
7.	Disturbance of Lacustrine Systems .....	145
	<i>P. G. Sly</i>	
7.1	Lakes in relation to surface water supply .....	145
7.2	General characteristics of lakes .....	147
	(a) Origins and forms .....	147
	(b) Physical characteristics .....	147
	(c) Chemical and biological characteristics .....	151
7.3	Evidence of change .....	152
	(a) Deep and shallow basin examples of geological timescales .....	152
	(b) Examples of recent climatic and cultural impacts .....	154
7.4	Contaminant levels .....	156
	(a) Enrichment .....	156
	(b) Contaminant availability and biological accumulation ...	160
	(c) Effects of remedial measures .....	162
7.5	Special problems .....	165
	(a) An example of mercury point-source contamination ...	165
	(b) Mercury in reservoirs .....	167
	(c) Acidification: diffuse source inputs .....	168
	(d) Mass balance and the importance of atmospheric loads .....	172
7.6	Lake levels .....	172
	(a) Examples of shore erosion problems .....	173
	(b) Example of wetland problems .....	174
7.7	Perspective .....	177

## Part III GEOSPHERE

Introduction .....	181
<i>K. J. Gregory and D. E. Walling</i>	
8. Slopes and Weathering .....	183
<i>M. J. Selby</i>	
8.1 Introduction .....	183
8.2 Factors controlling erosion .....	184
(a) Erosivity .....	185
(b) Erodibility .....	188
8.3 Landsliding .....	188
(a) Shallow translational landslides .....	188
(b) Effects of vegetation upon slope stability .....	191
(c) Effects of landsliding on valley floors .....	193
8.4 Periodicity of extreme events on slopes .....	196
8.5 Slopes in urban areas and along routeways .....	199
8.6 Denudation and land use planning .....	202
9. River Channels .....	207
<i>K. J. Gregory</i>	
9.1 Introduction .....	207
9.2 Down the river .....	209
(a) Direct modifications of processes .....	209
(b) Indirect modifications of channel processes .....	211
9.3 River channel reaction .....	213
(a) Adjustments of river channel cross-sections .....	217
(b) Changes of river channel planform .....	222
(c) Drainage network adjustments .....	224
9.4 Restraining Rivers .....	226
(a) Consequences of channelization .....	229
(b) Integrated approaches .....	229
9.5 Prospects for rivers and human activity .....	231
10 Permafrost and Ground Ice .....	237
<i>H. M. French</i>	
10.1 Introduction .....	237
10.2 Moisture in permafrost .....	239
10.3 Permafrost-related problems .....	240

10.4	Ground ice and thermokarst .....	242
10.5	Terrain disturbances .....	245
10.6	Engineering and construction problems .....	254
10.7	Hydrologic problems .....	262
10.8	Conclusions .....	266

11.	Subsurface Impacts .....	271
-----	--------------------------	-----

*D. R. Coates*

11.1	Introduction .....	271
11.2	Loading effects .....	272
	(a) Dams and reservoirs .....	272
	(b) Irrigation .....	273
	(c) Water injection .....	274
	(d) Buildings and structures .....	275
11.3	Withdrawal effects .....	276
	(a) Groundwater mining .....	276
	(b) Sinkholes formed from groundwater pumping .....	281
	(c) Oil and gas production .....	286
	(d) Underground coal mining .....	289
	(e) Salt mining .....	290
	(f) Other disturbances from mining operations .....	293
11.4	Surface excavation effects .....	295
	(a) Construction for roads, buildings, resources and services .....	297
	(b) Reclamation .....	300
11.5	Other man-induced changes .....	301
11.6	Conclusion .....	302

Part IV PEDOSPHERE

	Introduction .....	305
--	--------------------	-----

*D. E. Walling and K. J. Gregory*

12.	Soil Profile Processes .....	307
-----	------------------------------	-----

*S. T. Trudgill*

12.1	Introduction .....	307
12.2	Soil profile processes .....	308
12.3	Man and soil profile processes .....	318
	(a) The main effects .....	318
	(b) Vegetation removal .....	319

(c) Cultivation and management .....	320
(d) Acidification .....	324
12.4 The conservation ethic .....	326
13. Soil Erosion and Conservation .....	329
<i>A. C. Imeson</i>	
13.1 Introduction .....	329
13.2 Water erosion .....	330
13.3 Gully erosion .....	333
13.4 Wind erosion .....	334
13.5 The response of erosional systems to human impact .....	337
13.6 Assessing the erosion hazard .....	341
13.7 Conservation practices .....	343
(a) Erosion by water .....	343
(b) Wind erosion .....	345
13.8 Conclusions .....	346
<b>Part V BIOSPHERE</b>	
Introduction .....	351
<i>K. J. Gregory and D. E. Walling</i>	
14. Man's Impact on Vegetation: The African Experience .....	353
<i>R. Whitlow</i>	
14.1 Introduction .....	353
14.2 Impact of fire .....	355
14.3 Impact of deforestation .....	358
14.4 Impact of cultivation .....	363
14.5 Impact of livestock .....	366
14.6 Impact of wild animals .....	370
14.7 Conclusion .....	373
15. Human Activity and Species Response .....	381
<i>C. M. Harrison</i>	
15.1 Introduction .....	381
15.2 Natural variation and natural selection .....	382
15.3 Environmental change .....	384
(a) Palaeoecological studies of forest history .....	385
(b) Modern studies of forest ecology .....	387

15.4 Bionomic strategies ..... 390

15.5 Species response to urbanization ..... 392

    (a) Response to the development cycle ..... 392

    (b) Response to a reduction in habitat ..... 395

    (c) Response to atmospheric pollution ..... 396

    (d) Response to recreation pressure ..... 397

15.6 Conclusion ..... 398

16. The Conservation of Plants, Animals and Ecosystems ..... 403

*I. G. Simmons*

16.1 A mosaic of ecological systems ..... 403

16.2 Anti-conservation trends ..... 407

    (a) Intensification of agriculture ..... 407

    (b) Urbanization and industrialization ..... 409

    (c) War ..... 409

    (d) Species extinction ..... 410

    (e) Response to fluctuations ..... 411

16.3 Conservation trends ..... 411

    (a) Protected landscapes and ecosystems ..... 411

    (b) Outdoor recreation ..... 413

    (c) Conservation of genetic variety ..... 414

    (d) Low-impact technology ..... 415

    (e) Soft energy paths ..... 416

16.4 Alternative futures ..... 417

    (a) Introduction ..... 417

    (b) A technological future ..... 417

    (c) An equilibrium future ..... 419

16.5 Final words ..... 419

Part VI CONCLUSION

Introduction ..... 423

*D. E. Walling and K. J. Gregory*

17. Desertification ..... 425

*A. Rapp*

17.1 Introduction ..... 425

17.2 Definition and distribution of desertification ..... 426

17.3 Overgrazing ..... 428

17.4	Overcultivation and erosion .....	430
17.5	Excessive wood collection .....	433
17.6	Salinization and other problems of land degradation in Egypt .....	436
17.7	Dust storms and desertification .....	438
17.8	Climatic anomalies and desertification .....	439
17.9	Conclusions .....	441
18.	A Perspective .....	445
	<i>D. E. Walling and K. J. Gregory</i>	
18.1	Introduction .....	445
18.2	International awareness .....	445
18.3	Monitoring activity and programmes .....	448
18.4	Environmental impact assessment .....	449
18.5	Prediction and modelling strategies .....	454
18.6	The prospect .....	458
Index	.....	461
