PREFACE.....	v

PART I. GENERAL CONSIDERATIONS

CHAPTER I.—INTRODUCTION..... 1

I. INTRODUCTION.....	1
II. THE ACCURACY OF AN ANALYSIS.....	3
III. FACTORS AND THE REPORTING OF RESULTS.....	6

CHAPTER II.—BALANCE AND WEIGHTS..... 7

I. THE BALANCE.....	7
A. <i>Chief Requisites</i>	7
B. <i>Care of Balance</i>	7
II. ANALYTICAL WEIGHTS.....	8
A. <i>Specifications for Class M Weights</i>	8
B. <i>Specifications for Class S Weights</i>	10
III. TESTING AND CARE OF WEIGHTS.....	12
IV. WEIGHING.....	12

CHAPTER III.—APPARATUS AND REAGENTS..... 16

I. APPARATUS.....	16
A. <i>Glassware and Porcelain</i>	16
B. <i>Platinum and Substitutes</i>	18
C. <i>Useful Appliances and Apparatus</i>	21
II. REAGENTS.....	31
A. <i>General Considerations</i>	31
B. <i>Special Reagents</i>	34
C. <i>Solutions</i>	38
D. <i>Gases</i>	40
E. <i>Absorbents for Carbon Dioxide</i>	41
F. <i>Desiccants</i>	43

CHAPTER IV.—COMMON OPERATIONS..... 47

I. SAMPLING.....	47
II. THE PREPARATION OF THE SAMPLE FOR WEIGHING.....	49

	PAGE
III. WEIGHING THE SAMPLE.....	49
IV. THE CHOICE OF THE METHOD OF ANALYSIS.....	50
V. THE PREPARATION OF THE SOLUTION FOR THE ANALYSIS.....	52
VI. PRECIPITATION BY THE SULPHIDE ION.....	53
A. <i>Precipitation in "Strong" Acid (pH < 1) Solution</i>	53
B. <i>Precipitation in "Dilute" Acid (pH 2-3) Solution</i>	55
C. <i>Precipitation in Nearly Neutral (pH 5-6) Solution</i>	56
D. <i>Precipitation in Alkaline Solution (pH > 7)</i>	56
E. <i>Precipitation in a Solution Containing a Complex Anion</i>	57
F. <i>Precipitation by Ammonium Sulphide</i>	59
VII. OUTLINES OF SEPARATIONS OF ELEMENTS IN THE PRECIPITATE PRODUCED BY HYDROGEN SULPHIDE IN STRONG ACID SOLUTION.....	62
A. <i>Separation of the Copper and Arsenic Groups</i>	62
B. <i>Separations within the Copper Group</i>	63
C. <i>Separations within the Arsenic Group</i>	65
VIII. PRECIPITATION BY REGULATION OF THE HYDROGEN ION CONCENTRATION OF THE SOLUTION.....	68
A. <i>Precipitation by Ammonium Hydroxide</i>	69
B. <i>Precipitation by the Basic Acetate Method</i>	70
C. <i>Precipitation by the Sodium Succinate Method</i>	74
D. <i>Precipitation by a Suspension of Carbonate or Oxide</i>	74
E. <i>Precipitation by Iodates or Bromates</i>	76
F. <i>Precipitation by Sodium Hydroxide</i>	76
IX. OUTLINES OF SEPARATIONS OF ELEMENTS IN THE PRECIPITATE PRODUCED BY AMMONIUM HYDROXIDE, SODIUM ACETATE OR SODIUM SUCCINATE.....	77
A. <i>Common Separations</i>	79
B. <i>Miscellaneous Separations</i>	83
C. <i>Extended Analysis of the Ammonia Precipitate</i>	84
X. FILTRATION.....	89
XI. THE WASHING OF PRECIPITATES.....	94
XII. THE DRYING AND IGNITING OF PRECIPITATES.....	96
CHAPTER V.—SPECIAL OPERATIONS.....	100
I. REDUCTION IN THE JONES REDUCTOR.....	100
II. REDUCTION BY MEANS OF AMALGAMS.....	103
III. ELECTROLYSIS WITH A MERCURY CATHODE.....	105
IV. EXTRACTION BY ETHER.....	106
V. PRECIPITATION BY CUPFERRON.....	109
VI. PRECIPITATION BY PHENYLHYDRAZINE.....	113
VII. PRECIPITATION BY 8-HYDROXYQUINOLINE.....	114

	PAGE
VIII. CONVERSION OF ALKALINE SALTS.....	117
IX. REMOVAL OF AMMONIUM SALTS.....	119
CHAPTER VI.—VOLUMETRIC ANALYSIS.....	
I. VOLUMETRIC APPARATUS.....	121
A. <i>General Specifications</i>	121
B. <i>Special Requirements</i>	122
C. <i>Special Rules for Manipulation</i>	126
D. <i>Weight Burettes</i>	127
II. ACIDIMETRY AND ALKALIMETRY.....	127
A. <i>Indicators</i>	127
B. <i>Standardization of Acids</i>	135
C. <i>Standardization of Bases</i>	139
III. OXIDATION AND REDUCTION METHODS.....	144
A. <i>Standardization of Solutions of Potassium Permanganate</i>	144
B. <i>Standardization of Solutions of Potassium Dichromate</i>	147
C. <i>Iodimetry</i>	148
IV. POTENTIOMETRIC TITRATION.....	156

PART II. THE DETERMINATION OF THE ELEMENTS

THE HYDROGEN SULPHIDE GROUP

Silver, Mercury, Lead, Bismuth, Copper, Cadmium, Arsenic, Antimony, Tin, Germanium, Molybdenum, Selenium, Tellurium, Gold, Ruthenium, Rhodium, Palladium, Osmium, Iridium, Platinum (Thallium).

I. ELEMENTS THAT YIELD SULPHIDES THAT ARE INSOLUBLE IN ACIDS AND IN SOLUTIONS OF ALKALI SULPHIDES.....	161
Silver, Mercury, Lead, Bismuth, Copper, Cadmium (and entirely or in part Ruthenium, Rhodium, Palladium, and Osmium).	
CHAPTER VII.—SILVER.....	
CHAPTER VIII.—MERCURY.....	
CHAPTER IX.—LEAD.....	
CHAPTER X.—BISMUTH.....	
CHAPTER XI.—COPPER.....	
CHAPTER XII.—CADMIUM.....	
II. ELEMENTS THAT YIELD SULPHIDES THAT ARE INSOLUBLE IN ACIDS BUT ARE SOLUBLE IN SOLUTIONS OF ALKALI SULPHIDES.....	208
Arsenic Antimony, Tin, Germanium, Molybdenum, Selenium, Tellurium (and entirely or in part Gold, Platinum, and Iridium).	
CHAPTER XIII.—ARSENIC.....	

	PAGE
CHAPTER XIV.—ANTIMONY.....	221
CHAPTER XV.—TIN.....	233
CHAPTER XVI.—GERMANIUM.....	241
CHAPTER XVII.—MOLYBDENUM.....	245
CHAPTER XVIII.—SELENIUM AND TELLURIUM.....	258
III. THE NOBLE METALS—GOLD, RUTHENIUM, RHODIUM, PALLADIUM, OSMIUM, IRIDIUM AND PLATINUM.....	268
CHAPTER XIX.—THE PLATINUM METALS AND GOLD....	268
THE AMMONIUM SULPHIDE GROUP	
Iron, Nickel, Cobalt, Zinc, Manganese, Vanadium, Uranium, Thallium, Indium, Gallium, Aluminum, Beryllium, Chromium, Thorium, Scandium, Rare Earths, Zirconium, Titanium, Columbium, and Tantalum.	
I. ELEMENTS THAT FORM SULPHIDES THAT ARE SOLUBLE IN ACIDS.....	294
Iron, Nickel, Cobalt, Zinc, Manganese, Vanadium, Uranium, Thallium, Indium (Gallium).	
CHAPTER XX.—IRON.....	294
CHAPTER XXI.—NICKEL.....	312
CHAPTER XXII.—COBALT.....	322
CHAPTER XXIII.—ZINC.....	328
CHAPTER XXIV.—MANGANESE.....	339
CHAPTER XXV.—VANADIUM.....	352
CHAPTER XXVI.—URANIUM.....	364
CHAPTER XXVII.—THALLIUM.....	373
CHAPTER XXVIII.—INDIUM.....	379
CHAPTER XXIX.—GALLIUM.....	383
II. ELEMENTS THAT FORM HYDROXIDES OR BASIC COMPOUNDS.....	389
Aluminum, Beryllium, Chromium, Thorium, Scandium, Rare Earths, Zirconium, Titanium, Columbium, and Tantalum.	
CHAPTER XXX.—ALUMINUM.....	389
CHAPTER XXXI.—BERYLLIUM.....	402
CHAPTER XXXII.—CHROMIUM.....	408
CHAPTER XXXIII.—THORIUM.....	416
CHAPTER XXXIV.—SCANDIUM.....	426
CHAPTER XXXV.—RARE EARTHS.....	430

	PAGE
CHAPTER XXXVI.—ZIRCONIUM.....	442
CHAPTER XXXVII.—TITANIUM.....	452
CHAPTER XXXVIII.—COLUMBIUM AND TANTALUM.....	463
THE ALKALINE EARTHS AND MAGNESIUM, CALCIUM, STRONTIUM, BARIUM, MAGNESIUM (RADIUM).....	486
CHAPTER XXXIX.—THE ALKALINE EARTHS.....	486
CHAPTER XL.—MAGNESIUM.....	506
THE ALKALIES	
Lithium, Sodium, Potassium, Rubidium, Cesium	
CHAPTER XLI.—THE ALKALIES.....	517
THE ACID-FORMING ELEMENTS	
Silicon, Tungsten, Phosphorus, Sulphur, Chlorine, Bromine, Iodine, Fluorine, Boron, Carbon, Hydrogen, and Nitrogen.	
CHAPTER XLII.—SILICON.....	536
CHAPTER XLIII.—TUNGSTEN.....	547
CHAPTER XLIV.—PHOSPHORUS.....	556
CHAPTER XLV.—SULPHUR.....	570
CHAPTER XLVI.—CHLORINE, BROMINE, AND IODINE.....	583
CHAPTER XLVII.—FLUORINE.....	594
CHAPTER XLVIII.—BORON.....	607
CHAPTER XLIX.—CARBON AND HYDROGEN.....	621
CHAPTER L.—NITROGEN.....	633

PART III. SILICATE ROCK ANALYSIS

I. INTRODUCTION.....	645
1. Importance of Complete and Thorough analyses.....	645
2. The Constituents Occurring in Silicate Rocks.....	652
3. Preliminary Qualitative Analysis.....	653
4. Summation of Analytical Results and Limits of Allowable Error.....	654
5. Statement of Analyses.....	658
6. Time Needed for Making an Analysis.....	659
II. METHODS APPLICABLE TO SILICATE ROCKS.....	660
1. Introductory Remarks.....	660
2. Specific Gravity (Porosity).....	661
General Remarks:	
A. <i>By Suspension in Water</i>	662
B. <i>Pycnometer Method</i>	666

	PAGE
3. Preparation of Sample for Analysis	669
A. <i>Quantity of Rock to Be Crushed</i>	669
B. <i>Crushing</i>	669
C. <i>Grinding</i>	672
D. <i>Abrasion of Mortar and Pestle</i>	675
E. <i>Weight of Sample</i>	676
4. Water—General Considerations	676
A. <i>The Role of Hydrogen in Minerals</i>	676
B. <i>Water Taken Up or Lost on Grinding</i>	682
C. <i>Importance of Employing Air-Dry Powder for Analysis</i>	684
D. <i>Argument in Favor of Including Hygroscopic Water in the Sum- mation</i>	684
5. Water—Methods of Determination	685
A. <i>Indirect Methods</i>	686
B. <i>Direct Methods without Absorption Tubes—Penfield's Methods</i>	690
C. <i>Direct Methods with Absorption Tubes</i>	692
6. Methods of Decomposing Rocks	698
A. <i>Decomposition by the Use of Fluxes</i>	698
B. <i>Decomposition by the Use of Acids</i>	713
7. Silicon	714
A. <i>Special Cases</i>	714
B. <i>Silicate Analysis</i>	716
8. Analysis after Separation of the Most of the Silicon	727
A. <i>Metals Precipitable by Hydrogen Sulphide</i>	728
B. <i>Joint Precipitation of Aluminum, Iron, Titanium, Zirconium, Chromium, Rare Earths, Phosphorus, and Vanadium with and without Manganese</i>	729
C. <i>Manganese, Nickel, Cobalt, Copper, and Zinc</i>	740
D. <i>Calcium, Strontium (Barium)</i>	744
E. <i>Magnesium</i>	745
9. Titanium	745
A. <i>General Considerations</i>	745
B. <i>Colorimetric Determination with Hydrogen Peroxide</i>	747
C. <i>Gravimetric Methods</i>	749
D. <i>Volumetric Methods</i>	749
10. Barium (Zirconium, Rare Earths, Total Sulphur Chromium)	750
A. <i>The General Method</i>	750
B. <i>The Method without Regard to Zirconium and Sulphur</i>	752
11. Zirconium	752
A. <i>Hillebrand's Method</i>	752
B. <i>Other Methods</i>	755
12. Rare-earth Metals Other than Zirconium	755
A. <i>Usual Method</i>	756
B. <i>Alternative Method</i>	756
13. Phosphorus	757
A. <i>Preliminary Remarks</i>	757
B. <i>Procedure when Material is Ample</i>	757
C. <i>Procedure when Material is Scanty</i>	758

	PAGE
14. Chromium.....	759
A. <i>Gravimetric Methods</i>	760
B. <i>Colorimetric Method</i>	761
C. <i>Comparative Data</i>	762
15. Vanadium (Chromium) and Molybdenum.....	763
A. <i>Distribution of Vanadium and Molybdenum</i>	763
B. <i>Condition of Vanadium in Rocks</i>	763
C. <i>Hillebrand's Method</i>	764
16. Iron.....	769
A. <i>Ferrous Iron</i>	769
B. <i>Ferric Iron</i>	785
17. Alkalies.....	786
A. <i>General Considerations</i>	786
B. <i>The J. Lawrence Smith Method of Attack for Insoluble Silicates and Collection of the Alkalies as Chlorides</i>	788
C. <i>The Berzelius Method of Attack and Collection of the Alkalies as Chlorides</i>	792
D. <i>Separation of the Alkalies from One Another and Their Determi- nation</i>	795
18. Carbon dioxide, Carbon.....	795
A. <i>Qualitative Test for Carbon Dioxide</i>	795
B. <i>Quantitative Test for Carbon Dioxide</i>	796
C. <i>Carbon</i>	797
19. Chlorine.....	798
A. <i>Condition in Rocks</i>	798
B. <i>Determination of Water-Soluble Chlorine</i>	798
C. <i>Determination of Acid-Soluble Chlorine</i>	799
D. <i>Determination of Chlorine by Alkali Fusion</i>	799
20. Fluorine (Silica in Presence of Fluorine).....	800
A. <i>General Remarks</i>	800
B. <i>Direct Quantitative Determination of Fluorine</i>	800
C. <i>Indirect Quantitative Determination of Fluorine</i>	807
21. Sulphur.....	810
A. <i>Determination of the Condition of Sulphur in Rocks</i>	810
B. <i>Quantitative Determination in Rocks</i>	811
22. Boron.....	813
A. <i>General Remarks</i>	813
B. <i>Qualitative Tests for Boron</i>	814
23. Certain Constituents in Minute Traces.....	815
24. The Gases and Vapors Expelled by Heat.....	816
25. Special Operations.....	818
A. <i>Detection of Nepheline in Presence of Olivine</i>	818
B. <i>Determination of "Soluble" Silica</i>	818

PART IV. CARBONATE ROCK ANALYSIS

	PAGE
I. INTRODUCTION.....	819
1. Qualitative Comparison of Carbonate and Silicate Rocks.....	819
2. Mineral Composition of Carbonate Rocks.....	821
3. Behavior toward Different Reagents as a Means of Distinguishing Different Carbonates.....	823
A. <i>Differing Solubility in Tartaric Acid, Citric Acids and in Acid Potassium Sulphate</i>	824
B. <i>Distinguishing Calcite from Aragonite</i>	824
C. <i>Distinguishing between Calcite and Dolomite</i>	824
II. REFINED METHODS FOR THE ANALYSIS OF CARBONATE ROCKS.....	826
1. Silicon, Its Separation from Aluminum, etc.....	826
A. <i>Methods of Decomposing the Rock</i>	826
B. <i>Separation of Silica</i>	828
2. Aluminum, Total Iron, Titanium (Silica, Manganese); Precipitation in Company with Phosphorus.....	830
A. <i>Precipitation of Aluminum, Iron, etc.</i>	830
B. <i>Treatment of the Filtrates from the Alumina, etc.</i>	832
C. <i>Solutions and Separation of the Oxides Obtained in A and B</i>	832
3. Manganese.....	833
A. <i>In the Filtrates from 2B</i>	833
B. <i>Separate Determination of Manganese</i>	834
4. Copper, Nickel, Cobalt, Lead, Zinc, Rare Earths, Chromium, Vanadium, Molybdenum.....	834
5. Calcium, Strontium, Barium, Magnesium (Manganese).....	835
A. <i>Ordinary Procedures</i>	835
B. <i>Separation of Little Calcium from Much Magnesium—Magnesite Analysis</i>	836
6. Phosphorus.....	836
7. Ferrous Iron.....	837
A. <i>In the Absence of Carbonaceous Matter</i>	837
B. <i>In the Presence of Insoluble Carbonaceous Matter</i>	838
8. Alkalies.....	838
9. Carbon Dioxide, Carbon (Water).....	839
A. <i>Determination of Carbon Dioxide</i>	839
B. <i>Determination of Carbon and Hydrogen of Carbonaceous Matter</i>	839
C. <i>Simultaneous Determination of Water and of Total Carbon</i>	840
10. Chlorine.....	840
11. Fluorine.....	841
12. Sulphur.....	841
A. <i>Tests as to Condition; Determination of Sulphate Sulphur</i>	841
B. <i>Determination of Total Sulphur</i>	841
13. Water.....	842
A. <i>Hygroscopic Water</i>	842
B. <i>Firmly Held Water</i>	843

	PAGE
III. CONDENSED ANALYSIS.....	843
1. Decomposition and Solution.....	843
2. Silicon.....	844
3. Aluminum, Iron, etc.....	845
4. Manganese.....	846
5. Calcium.....	846
6. Magnesium.....	847
7. Alkalies.....	848
8. Carbon Dioxide.....	848
9. Sulphur.....	848
10. Water.....	848
11. Ignition Loss.....	848
12. Analytical Data.....	849

PART V. MISCELLANEOUS METHODS OF ANALYSIS

I. SODA-LIME GLASS.....	851
1. Silica.....	851
2. Total Iron as Ferric Oxide, Titania, Zirconia and Alumina.....	852
A. <i>Total Iron as Ferric Oxide</i>	853
B. <i>Titania</i>	854
C. <i>Zirconia</i>	854
D. <i>Alumina</i>	854
3. Lime.....	854
4. Magnesia.....	855
5. Sodium Oxide.....	855
6. Potassium Oxide.....	857
7. Total Iron as Ferric Oxide, Titania and Zirconia.....	857
A. <i>Total Iron as Ferric Oxide</i>	857
B. <i>Titania</i>	858
C. <i>Zirconia</i>	859
8. Sulphur Trioxide.....	859
9. Total, Quinquevalent and Trivalent Arsenic.....	859
A. <i>Total Arsenic</i>	859
B. <i>Quinquevalent Arsenic</i>	860
C. <i>Trivalent Arsenic</i>	860
10. Chlorine.....	860
11. Analytical Data.....	861
II. BAUXITE OR REFRACTORIES OF HIGH ALUMINA CONTENT.....	862
1. Refined Method of Analysis.....	862
A. <i>Drying</i>	862
B. <i>Solution of the Sample</i>	862
C. <i>Determination of Silica</i>	862
D. <i>Determination of Mixed Oxides</i>	863
E. <i>Recovery of Silica</i>	864

	PAGE
F. <i>Determination of P₂O₅, Cr₂O₃ and V₂O₅.....</i>	864
G. <i>Determination of Fe₂O₃, TiO₂, and ZrO₂ (HfO₂).....</i>	866
H. <i>Determination of Lime and Magnesia.....</i>	867
I. <i>Determination of Alkalies.....</i>	868
2. Rapid method of Analysis for the Determination of Alumina in Bauxite or Refractories of High Alumina Content.....	868
A. <i>Precipitation by Ammonium Hydroxide.....</i>	869
B. <i>Precipitation by Cupferron.....</i>	869
C. <i>Determination of P₂O₅.....</i>	870
D. <i>Analytical Data.....</i>	871
INDEX OF AUTHORS.....	889
INDEX OF SUBJECTS.....	901

PART II. MISCELLANEOUS METHODS OF ANALYSIS

I. <i>Soil Analysis.....</i>	131
A. <i>Preparation of Soil.....</i>	131
B. <i>Total Acid as Free Oxide.....</i>	132
C. <i>Total Acid as Acid.....</i>	133
D. <i>Total Acid as Phosphate.....</i>	134
E. <i>Total Acid as Sulfate.....</i>	135
F. <i>Total Acid as Chloride.....</i>	136
G. <i>Total Acid as Nitrate.....</i>	137
H. <i>Total Acid as Oxide.....</i>	138
I. <i>Total Acid as Sulfate.....</i>	139
J. <i>Total Acid as Chloride.....</i>	140
K. <i>Total Acid as Nitrate.....</i>	141
L. <i>Total Acid as Oxide.....</i>	142
M. <i>Total Acid as Sulfate.....</i>	143
N. <i>Total Acid as Chloride.....</i>	144
O. <i>Total Acid as Nitrate.....</i>	145
P. <i>Total Acid as Oxide.....</i>	146
Q. <i>Total Acid as Sulfate.....</i>	147
R. <i>Total Acid as Chloride.....</i>	148
S. <i>Total Acid as Nitrate.....</i>	149
T. <i>Total Acid as Oxide.....</i>	150
U. <i>Total Acid as Sulfate.....</i>	151
V. <i>Total Acid as Chloride.....</i>	152
W. <i>Total Acid as Nitrate.....</i>	153
X. <i>Total Acid as Oxide.....</i>	154
Y. <i>Total Acid as Sulfate.....</i>	155
Z. <i>Total Acid as Chloride.....</i>	156
AA. <i>Total Acid as Nitrate.....</i>	157
AB. <i>Total Acid as Oxide.....</i>	158
AC. <i>Total Acid as Sulfate.....</i>	159
AD. <i>Total Acid as Chloride.....</i>	160
AE. <i>Total Acid as Nitrate.....</i>	161
AF. <i>Total Acid as Oxide.....</i>	162
AG. <i>Total Acid as Sulfate.....</i>	163
AH. <i>Total Acid as Chloride.....</i>	164
AI. <i>Total Acid as Nitrate.....</i>	165
AJ. <i>Total Acid as Oxide.....</i>	166
AK. <i>Total Acid as Sulfate.....</i>	167
AL. <i>Total Acid as Chloride.....</i>	168
AM. <i>Total Acid as Nitrate.....</i>	169
AN. <i>Total Acid as Oxide.....</i>	170
AO. <i>Total Acid as Sulfate.....</i>	171
AP. <i>Total Acid as Chloride.....</i>	172
AQ. <i>Total Acid as Nitrate.....</i>	173
AR. <i>Total Acid as Oxide.....</i>	174
AS. <i>Total Acid as Sulfate.....</i>	175
AT. <i>Total Acid as Chloride.....</i>	176
AU. <i>Total Acid as Nitrate.....</i>	177
AV. <i>Total Acid as Oxide.....</i>	178
AW. <i>Total Acid as Sulfate.....</i>	179
AX. <i>Total Acid as Chloride.....</i>	180
AY. <i>Total Acid as Nitrate.....</i>	181
AZ. <i>Total Acid as Oxide.....</i>	182
BA. <i>Total Acid as Sulfate.....</i>	183
BB. <i>Total Acid as Chloride.....</i>	184
BC. <i>Total Acid as Nitrate.....</i>	185
BD. <i>Total Acid as Oxide.....</i>	186
BE. <i>Total Acid as Sulfate.....</i>	187
BF. <i>Total Acid as Chloride.....</i>	188
BG. <i>Total Acid as Nitrate.....</i>	189
BH. <i>Total Acid as Oxide.....</i>	190
BI. <i>Total Acid as Sulfate.....</i>	191
BJ. <i>Total Acid as Chloride.....</i>	192
BK. <i>Total Acid as Nitrate.....</i>	193
BL. <i>Total Acid as Oxide.....</i>	194
BM. <i>Total Acid as Sulfate.....</i>	195
BN. <i>Total Acid as Chloride.....</i>	196
