|--|-----------|
| <b>Preface</b>   | <b>xv</b> |
| <b>1 Corrosion Fundamentals: Understanding the Science Behind the Damage</b>   | <b>1</b>  |
| <i>Kaoutar Zaidi, Walid Daoudi, Selma Lamghafri, Omar Dagdag, Abdelmalik El Aattiaoui and Abdelouahad Aouinti</i>                |           |
| 1.1 Introduction   | 2         |
| 1.2 Basic Chemistry of Corrosion   | 3         |
| 1.2.1 Electrochemical Nature of Corrosion  | 3         |
| 1.2.2 Chemical Reaction of Corrosion   | 3         |
| 1.3 Types of Corrosion   | 5         |
| 1.3.1 Uniform Corrosion  | 5         |
| 1.3.2 Pitting Corrosion  | 6         |
| 1.3.3 Crevice Corrosion  | 7         |
| 1.3.4 Intergranular Corrosion  | 7         |
| 1.3.5 Stress Corrosion   | 8         |
| 1.4 Electrochemical Corrosion Mechanisms   | 8         |
| 1.5 Corrosion-Inducing Factors   | 10        |
| 1.6 Conclusion   | 11        |
| References   | 11        |
| <b>2 Concrete Material Properties and Corrosion</b>  | <b>13</b> |
| <i>Rajae Salim, Jamila Lazrak, Elhachmia Ech-chihbi, Walid Ettahiri, Charafeddine Jama, Belkheir Hammouti and Mustapha Taleb</i> |           |
| 2.1 Introduction   | 14        |
| 2.1.1 Urban Infrastructures  | 15        |
| 2.1.2 Residential Sector   | 16        |
| 2.1.3 Commercial and Industrial Buildings  | 17        |
| 2.1.4 Agricultural Application   | 17        |
| 2.1.5 Sustainable Construction   | 18        |

|         |  |    |
|---------|--|----|
| 2.2     | Importance of Steel in Concrete                  | 18 |
| 2.2.1   | Strength Enhancement                             | 19 |
| 2.2.2   | Environmental Considerations                     | 19 |
| 2.3     | Material Properties of Concrete                  | 20 |
| 2.3.1   | Compressive Strength                             | 20 |
| 2.3.2   | Durability                                       | 22 |
| 2.3.3   | Permeability and Porosity                        | 23 |
| 2.3.4   | Workability                                      | 24 |
| 2.3.5   | Shrinkage and Creep                              | 25 |
| 2.3.6   | Tensile Strength                                 | 26 |
| 2.3.7   | Modulus of Elasticity                            | 26 |
| 2.3.8   | Thermal Properties                               | 27 |
| 2.4     | Corrosion Properties of Steel in Concrete        | 28 |
| 2.4.1   | Electrochemical Properties                       | 29 |
| 2.4.2   | Concrete Permeability                            | 30 |
| 2.4.3   | Chemical Properties                              | 31 |
| 2.4.4   | Mechanical Properties                            | 32 |
| 2.4.5   | Physical Properties                              | 32 |
| 2.5     | Causes of Concrete Corrosion                     | 33 |
| 2.5.1   | Carbonation-Induced Corrosion                    | 34 |
| 2.5.2   | Chloride-Induced Corrosion                       | 34 |
| 2.6     | Consequences of Concrete Corrosion               | 35 |
| 2.6.1   | Degradation of the Embedding Concrete            | 35 |
| 2.6.2   | Initiation of Reinforcement Corrosion            | 36 |
| 2.6.3   | Development of Corrosion                         | 36 |
| 2.6.4   | Structures Affected by Corrosion of Concrete     | 36 |
| 2.7     | Methods of Protecting Concrete against Corrosion | 37 |
| 2.7.1   | Using High-Quality Concrete Mix                  | 37 |
| 2.7.2   | Coating Techniques                               | 39 |
| 2.7.2.1 | Electrocoating                                   | 39 |
| 2.7.2.2 | Metallic Coatings                                | 39 |
| 2.7.2.3 | Organic Coatings                                 | 40 |
| 2.7.3   | Galvanization Protection                         | 41 |
| 2.7.3.1 | Sacrificial Anodes                               | 41 |
| 2.7.3.2 | Impressed Current Cathodic Protection (ICCP)     | 42 |
| 2.7.3.3 | Hybrid Cathodic Protection                       | 43 |
| 2.7.4   | Surface Treatments                               | 43 |
| 2.7.4.1 | Sealants and Coatings                            | 43 |
| 2.7.4.2 | Waterproof Membranes                             | 44 |

|          |   |           |
|----------|---|-----------|
| 2.7.5    | Use of Corrosion Inhibitors   | 45        |
| 2.7.6    | Electrochemical Chloride Extraction (ECE)   | 45        |
| 2.7.7    | Design and Construction Practices   | 46        |
| 2.7.7.1  | Adequate Concrete Cover   | 46        |
| 2.7.7.2  | Good Drainage Design  | 47        |
| 2.8      | Techniques for Assessing Corrosion Concrete   | 48        |
| 2.9      | Future Perspectives and Research Directions   | 52        |
| 2.10     | Conclusion  | 52        |
|          | References  | 53        |
| <b>3</b> | <b>Fundamentals and Understanding of Corrosion-Prone Environments in Concrete Corrosion</b>                   | <b>59</b> |
|          | <i>Demian I. Njoku, Annuncieta C. Njoku, Paul C. Uzoma, Ini-Ibehe Nabuk Etim and Inime I. Udoh</i>            |           |
| 3.1      | Introduction  | 60        |
| 3.2      | Factors That Contribute to Concrete Corrosion   | 61        |
| 3.3      | Concrete Corrosion-Prone Environments   | 63        |
| 3.3.1    | Moisture and Availability of Oxygen   | 63        |
| 3.3.2    | Marine Environment  | 64        |
| 3.3.3    | Industrial Environments   | 65        |
| 3.3.4    | De-Icing Salt Environments  | 66        |
| 3.3.5    | Underground Environments  | 67        |
| 3.3.6    | Agricultural Environments   | 67        |
| 3.3.7    | Coastal Environments  | 68        |
| 3.4      | Distinctive Analysis of the Process of Concrete Corrosion   | 68        |
| 3.4.1    | Mechanism Associated with the Acceleration of Concrete Corrosion  | 68        |
| 3.4.2    | Reduction of Concrete Lifespan  | 70        |
| 3.5      | Current Practices Used to Minimize Corrosion in Different Environments  | 71        |
| 3.5.1    | Surface and Environmental Modification  | 71        |
| 3.5.2    | Trends and Best Design Practices for Improvement in the Field of Concrete Corrosion Prevention and Mitigation | 73        |
| 3.6      | Cases of Failures due to Corrosion of Concrete Structures in Different Environments and the Mitigations       | 74        |
| 3.7      | Conclusions   | 76        |
|          | Acknowledgment  | 77        |
|          | References  | 77        |

|          |   |           |
|----------|---|-----------|
| <b>4</b> | <b>Corrosion Assessment and Inspection in Concrete Corrosion</b>  | <b>85</b> |
|          | <i>Ichraq Bouhouche, Khalid Bouiti, Nabil Lahrache,<br/>Najoua Labjar, Hamid Nasrellah, Said Laasri, Ayoub Cherrat<br/>and Souad El Hajjaji</i> |           |
| 4.1      | Introduction to Corrosion Assessment and Inspection   | 86        |
| 4.1.1    | Overview of Corrosion in Concrete Structures  | 86        |
| 4.1.2    | Significance of Early Detection   | 87        |
| 4.1.3    | Challenges in Corrosion Assessment  | 87        |
| 4.2      | Forms of Corrosion in Concrete  | 88        |
| 4.2.1    | Carbonation-Induced Corrosion   | 88        |
| 4.2.2    | Chloride-Induced Corrosion  | 89        |
| 4.2.3    | Sulfate Attack  | 90        |
| 4.3      | Visual Assessment Methods   | 90        |
| 4.3.1    | Surface Damage and Deterioration  | 90        |
| 4.3.2    | Signs of Corrosion in Concrete Structures   | 92        |
| 4.4      | Electrochemical Assessment Methods  | 93        |
| 4.4.1    | Half-Cell Potential Measurements  | 94        |
| 4.4.2    | Linear Polarization Resistance (LPR)  | 94        |
| 4.4.3    | Electrochemical Impedance Spectroscopy (EIS)  | 95        |
| 4.5      | Non-Destructive Testing (NDT) Techniques  | 98        |
| 4.5.1    | Ultrasonic Testing (UT)   | 98        |
| 4.5.2    | Radiography   | 98        |
| 4.5.3    | Ground Penetrating Radar (GPR)  | 99        |
| 4.6      | Advanced Technologies in Corrosion Inspection   | 100       |
| 4.6.1    | Remote Sensing Techniques   | 100       |
| 4.6.2    | Digital Imaging and Analysis  | 101       |
| 4.6.3    | Integration of IoT and Data Analytics in<br>Corrosion Monitoring  | 101       |
| 4.7      | Case Studies in Corrosion Assessment  | 101       |
| 4.7.1    | Case Study 1: Assessment in Marine Structures   | 102       |
| 4.7.2    | Case Study 2: Inspection of Bridges and Overpasses  | 102       |
| 4.7.3    | Case Study 3: Industrial Infrastructure   | 103       |
| 4.8      | Discussion on Assessment and Inspection Results   | 104       |
| 4.8.1    | Interpretation of Data  | 104       |
| 4.8.2    | Correlation Between Inspection Techniques and<br>Structural Health  | 105       |
| 4.9      | Conclusion  | 105       |
| 4.9.1    | Recommendations for Practitioners   | 106       |

|          |   |            |
|----------|---|------------|
| 4.9.2    | Future Directions in Corrosion Assessment<br>and Inspection   | 107        |
|          | Bibliography  | 107        |
| <b>5</b> | <b>Impact of Concrete Corrosion on Environmental Sustainability</b>   | <b>119</b> |
|          | <i>Abhinay Thakur, Valentine C. Anadebe, Elyor Berdimurodov,<br/>Abdelkader Zarrouk, Omar Dagdag and Ashish Kumar</i> |            |
| 5.1      | Introduction  | 120        |
| 5.2      | Types of Concrete Corrosion   | 123        |
| 5.2.1    | Carbonation-Induced Corrosion   | 123        |
| 5.2.2    | Chloride-Induced Corrosion  | 123        |
| 5.2.3    | Other Corrosion Mechanisms  | 124        |
| 5.3      | Impact on Structural Integrity and Concrete Durability  | 125        |
| 5.4      | Environmental Consequences  | 129        |
| 5.4.1    | Resource Consumption and Waste Generation   | 129        |
| 5.4.2    | Release of Harmful Substances   | 130        |
| 5.4.3    | Impact on Soil and Water Quality  | 131        |
| 5.5      | Sustainability Challenges   | 133        |
| 5.5.1    | Lifecycle of Concrete Structures  | 133        |
| 5.5.2    | Resource Depletion and Energy Use   | 134        |
| 5.6      | Mitigation Strategies and Recent Advancements   | 136        |
| 5.7      | Challenges and Future Directions  | 146        |
| 5.8      | Conclusion  | 149        |
|          | References  | 150        |
| <b>6</b> | <b>Role of Anti-Corrosion Coatings and Sealants in Preventing<br/>Concrete Corrosion</b>                              | <b>163</b> |
|          | <i>Humira Assad, Richika Ganjoo, Shveta Sharma,<br/>Praveen Kumar Sharma, Femiana Gapsari and Ashish Kumar</i>        |            |
| 6.1      | Introduction  | 164        |
| 6.2      | Concrete Corrosion  | 166        |
| 6.3      | Overview of Anti-Corrosion Coatings and Sealant Systems   | 168        |
| 6.3.1    | Types   | 169        |
| 6.3.2    | Criteria for Selecting Coatings and Sealants  | 171        |
| 6.3.3    | Installation and Performance of Anti-Corrosion<br>Coatings and Sealant Systems  | 172        |
| 6.4      | Role of Anti-Corrosion Coatings and Sealants in<br>Concrete Corrosion   | 177        |
| 6.5      | Conclusion  | 180        |
|          | References  | 181        |
