

Contents

1 • <u>Overview and Foundations of Structural Equation Modeling</u>	1
An Overview of the Conceptual Foundations of SEM / 2	
Sources of Variance in Measurement / 5	
Characteristics of Indicators and Constructs / 10	
A Simple Taxonomy of Indicators and Their Roles / 14	
Rescaling Variables / 18	
Parceling / 21	
What Changes and How? / 33	
Some Advice for SEM Programming / 35	
Philosophical Issues and How I Approach Research / 38	
Summary / 41	
Key Terms and Concepts Introduced in This Chapter / 42	
Recommended Readings / 44	
2 • <u>Design Issues in Longitudinal Studies</u>	46
Timing of Measurements and Conceptualizing Time / 46	
Modeling Developmental Processes in Context / 63	
Summary / 67	
Key Terms and Concepts Introduced in This Chapter / 67	
Recommended Readings / 69	
3 • <u>Modern Approaches to Missing Data in Longitudinal Studies</u>	70
Planning for Missing Data / 70	
Planned Missing Data Designs in Longitudinal Research / 89	
Summary / 101	
Key Terms and Concepts Introduced in This Chapter / 101	
Recommended Readings / 103	

4 • <u>The Measurement Model</u>	104
Drawing and Labeling Conventions / 104	
Defining the Parameters of a Construct / 108	
Scale Setting / 112	
Identification / 119	
Adding Means to the Model: Scale Setting and Identification with Means / 124	
Adding a Longitudinal Component to the CFA Model / 128	
Adding Phantom/Rescaling Constructs to the CFA Model / 132	
Summary / 136	
Key Terms and Concepts Introduced in This Chapter / 137	
Recommended Readings / 138	
5 • <u>Model Fit, Sample Size, and Power</u>	140
Model Fit and Types of Fit Indices / 140	
Sample Size / 153	
Power / 161	
Summary / 168	
Key Terms and Concepts Introduced in This Chapter / 168	
Recommended Readings / 170	
6 • <u>The Longitudinal CFA Model</u>	171
Factorial Invariance / 171	
A Small (Nearly Perfect) Data Example / 178	
A Larger Example Followed by Tests of the Latent Construct Relations / 194	
An Application of a Longitudinal SEM to a Repeated-Measures Experiment / 206	
Summary / 213	
Key Terms and Concepts Introduced in This Chapter / 214	
Recommended Readings / 216	
7 • <u>Specifying and Interpreting a Longitudinal Panel Model</u>	217
Basics of a Panel Model / 218	
The Basic Simplex Change Process / 221	
Building a Panel Model / 226	
Illustrative Examples of Panel Models / 235	
Summary / 242	
Key Terms and Concepts Introduced in This Chapter / 242	
Recommended Readings / 244	
8 • <u>Multiple-Group Longitudinal Models</u>	245
A Multiple-Group SEM / 246	
A Multiple-Group Longitudinal Model for Conducting an Intervention Evaluation / 263	
A Dynamic P-Technique Multiple-Group Longitudinal Model / 267	
Summary / 283	
Key Terms and Concepts Introduced in This Chapter / 284	
Recommended Readings / 285	

-
- 9 • The Random Intercept Cross-Lagged Panel Model** 286
- Danny Osborne and Todd D. Little
- Problems with Traditional Cross-Lagged Panel Models / 286
- The Random Intercept Cross-Lagged Panel Model / 289
- Illustrative Examples of the RI-CLPM / 295
- Extensions to the RI-CLPM / 319
- Final Considerations / 329
- Summary / 334
- Key Terms and Concepts Introduced in This Chapter / 335
- Recommended Readings / 336
- 10 • Mediation and Moderation** 338
- Making the Distinction between Mediators and Moderators / 340
- Moderation / 360
- Summary / 375
- Key Terms and Concepts Introduced in This Chapter / 375
- Recommended Readings / 376
- 11 • Multilevel Growth Curves and Multilevel SEM** 378
- Longitudinal Growth Curve Model / 379
- Multivariate Growth Curve Models / 394
- Multilevel Longitudinal Model / 406
- Summary / 415
- Key Terms and Concepts Introduced in This Chapter / 415
- Recommended Readings / 417
- 12 • Longitudinal Mixture Modeling: Finding Unknown Groups** 419
- E. Whitney G. Moore and Todd D. Little
- General Background / 420
- Analysis Types / 422
- Finite Mixture Modeling Overview / 423
- Latent Class Analysis / 444
- Latent Profile Analysis / 454
- Latent Transition Analysis / 464
- Other LTA Modeling Approaches / 476
- Developments and Extensions into the Future of Finite Mixture Modeling / 498
- Summary / 499
- Key Terms and Concepts Introduced in This Chapter / 500
- Recommended Readings / 502
- 13 • Bayesian Longitudinal Structural Equation Modeling** 504
- Mauricio Garnier-Villarreal and Todd D. Little
- The Bayesian Perspective / 504
- Bayesian Inference / 505
- Advantages of a Bayesian Framework / 507

MCMC Estimation / 509	
Bayesian Structural Equation Modeling / 512	
Information Criteria / 521	
Bayes Factor / 525	
Applied Example / 526	
Summary / 536	
Key Terms and Concepts Introduced in This Chapter / 537	
Recommended Readings / 538	
14 • Jambalaya: Complex Construct Representations and Decompositions	539
Multitrait–Multimethod Models / 539	
Pseudo-MTMM Models / 548	
Bifactor and Higher-Order Factor Models / 554	
Contrasting Different Variance Decompositions / 557	
Digestif / 566	
Key Terms and Concepts Introduced in This Chapter / 568	
Recommended Readings / 569
