Contributors	xv
Preface.....	xix
Acknowledgments.....	xxi

Chapter 1 Antimicrobials in Ruminant Production..... 1

*Saranporn Poothong, Natawadee Pinyosnit,
Chackrit Nuengjamnong, and Somboon Tanasupawat*

1.1	Introduction	1
1.1.1	Global Trend: Reducing and Substituting Antimicrobial Agents.....	1
1.1.2	Mode of Action of Antimicrobial Agents in Ruminants	2
1.1.3	List of Antibiotics Used in Ruminant Industries.....	2
1.2	Prevalence of Antimicrobial Resistance Research in Ruminants	4
1.2.1	Beef.....	4
1.2.2	Dairy Cattle.....	4
1.2.3	Sheep and Goats.....	5
1.3	Advances and Alternative Antimicrobials Use in Ruminants.....	5
1.3.1	Alternatives for Growth.....	5
1.3.2	Alternatives for Disease Treatment and Prevention	12
1.3.3	Alternatives for Disease Resistance Control.....	17
1.4	Conclusion and Future Prospects	20

Chapter 2 Role of Antibiotics in Animal Feed: Prospects and Future Challenges..... 32

*Vasantha V L, Bhoomika Prakash P, Bhavana C Yadav,
Bhagyalakshmi N Hiremath, Saptadeepa Mukherjee,
Swathi P, Rashmi Ramakrishnan, Praveen Nagella,
and Al-Khayri JM*

2.1	Introduction	32
2.2	Need for Antibiotics in Animal Feed.....	34
2.3	Classification of Antibiotics	34
2.3.1	β -Lactam.....	35
2.3.2	Amphenicols	35
2.3.3	Tetracyclines	35
2.3.4	Macrolides.....	36

2.3.5	Aminoglycosides.....	36
2.3.6	Fluoroquinolones	36
2.4	Classification of Feed for Animals.....	36
2.4.1	Concentrates.....	36
2.4.2	Forage.....	44
2.5	Antibiotic Drugs for Livestock.....	45
2.5.1	Antibiotics in Dairy Cattle Feed.....	46
2.5.2	Antibiotics in Fish Feed	47
2.5.3	Antibiotics in Poultry Feed.....	48
2.6	Effect of Antibiotics on Other Livestock.....	48
2.6.1	Antibiotics in Pork Feed	48
2.6.2	Antibiotics in Lamb Feed	49
2.7	Emergence and Persistence of Antibiotic Resistance.....	50
2.8	Human Health Concerns	54
2.9	Alternatives to Antibiotics.....	56
2.9.1	Immunomodulators.....	56
2.9.2	Probiotics	57
2.9.3	Prebiotics.....	58
2.9.4	Antimicrobial Peptide.....	58
2.9.5	Host Defense Peptide Classification	58
2.9.6	Egg Yolk Antibodies.....	58
2.9.7	Bacteriophage	59
2.9.8	Endolysins	59
2.9.9	Antibacterial Vaccine.....	59
2.9.10	Feed Enzymes.....	60
2.9.11	Virion-Associated Peptidoglycan Hydrolases.....	60
2.9.12	Quorum Sensing Inhibitors.....	60
2.10	Conclusion and Prospects.....	61

Chapter 3 Antimicrobial Resistance in Agriculture: Human and Animal Health..... 73

Amro Abd Al Fattah Amara, Mounir Mohamed Salem-Bekhit, Khairy Mohamed Abdallah Zoheir, Arti Gupta, and Mohamed Morsi Mohamed Ahmed

3.1	Introduction	73
3.2	Different Strategies to Control Antibiotic Use and Antibiotic Resistance.....	74
3.2.1	Strategy Number 1: Recall the Traditional Slow Farming Style.....	74
3.2.2	Strategy Number 2: Avoid the Use of Antibiotics with Human Interest.....	75
3.2.3	Strategy Number 3: Stop the Improper Use of Antibiotics	76
3.2.4	Strategy Number 4: Give Nature a Chance to Solve the Problems of Antibiotic Resistance	77

3.2.5	Strategy Number 5: Conceptualize Our Counterattack.....	77
3.2.6	Strategy Number 6: Reduce the Used Amount of Antibiotics in Agriculture.....	78
3.2.7	Strategy Number 7: Conduct National and International Studies.....	79
3.2.8	Strategy Number 8: Build a Surveillance and Management System.....	80
3.2.9	Strategy Number 9: Develop Institutional and Governmental Regulations.....	80
3.2.10	Strategy Number 10: Use Other Antimicrobial Agents.....	81
3.3	Some Alternatives to Antibiotics.....	82
3.3.1	Plant Products.....	82
3.3.2	Vaccines.....	82
3.3.3	Related to Microbes' Antagonism and Their Products.....	83
3.3.4	Other Antimicrobial Agents.....	84
3.3.5	Related to Protein and Its Derived Structures.....	85
3.4	Conclusion.....	86
3.5	Acknowledgment.....	87

Chapter 4 Role of β -Lactams, β -Lactamases Inhibitors, and Efflux Pump Inhibitors in the Battle Against Antibiotic Resistance..... 95

Kiran R Marathe, Sunil H Koli, Atharva S Patil, and Satish V Patil

4.1	Introduction.....	95
4.2	β -Lactam Resistance in Animal Origin Bacterial Pathogens.....	99
4.3	Bacterial Pathogens in Animals and Emergence of β -Lactamases.....	100
4.3.1	Gram-Positive Bacteria and β -Lactamases.....	100
4.3.2	Gram-Negative Bacteria and β -Lactamases.....	101
4.4	β -Lactamase Inhibitors.....	103
4.5	Role of Efflux Pumps in Antibiotic Resistance and Its Inhibitors.....	108
4.6	Conclusion.....	114
4.7	Acknowledgment.....	114

Chapter 5 An Open Traditional Poultry Production: Toward Healthier Animals..... 124

Amro Abd Al Fattah Amara and Arti Gupta

5.1	Introduction.....	124
5.2	The Problems and the Birds' Conditions.....	126

5.2.1	Environmental Impacts.....	126
5.2.2	Welfare of Animals.....	127
5.3	Early Response against the Modern Poultry Chicken.....	131
5.4	Egyptian Traditional Slow Farming Style for Growing Poultry	131
5.4.1	Forty-Year-Old Successful Open Slow-Growing Poultry Farming.....	132
5.4.2	The Egyptian Old Model Resists Changes (A Family's Experiences).....	133
5.4.3	Building a Model for the Slow-Open Style of Poultry Farming.....	134
5.5	Other Factors That Could Affect the Process	136
5.6	Bird Welfare in Original Traditional Egyptians' Slow Farming Model for Poultry Production.....	136
5.7	Proposed Model and Proposed Name: 110 Chicken (Capacity)/90 Days (Output/Month).....	137
5.8	Conclusions.....	139
Chapter 6	Perspectives of Antimicrobials: Poultry and Fiber Production.....	148
	<i>K.R. Preethy, M. Chamundeeswari, K. I. Leroy, and S. Sharmila</i>	
6.1	Introduction	148
6.1.1	Antimicrobials	148
6.1.2	Antimicrobials in Poultry	148
6.1.3	Poultry Pathogens	148
6.1.4	Types of Antimicrobials in Poultry	149
6.2	Enhancement of Poultry Production	152
6.3	Use of Antibiotics in Poultry	152
6.4	Impacts	153
6.4.1	Impact on Chicken Growth, Digestive Tract, and Immune System.....	153
6.4.2	Impact on Meat Quality and Eggs	154
6.5	Antibiotic and Bacterial Resistance	155
6.6	Perspectives	156
6.7	Alternatives.....	157
6.7.1	Herbal Alternatives	157
6.7.2	Essential Oils	157
6.8	Antimicrobials in Fiber Production.....	157
6.8.1	Quaternary Ammonium Compounds	158
6.8.2	Triclosan.....	158
6.8.3	Metals and Metallic Salts	159
6.8.4	Chitosan	159
6.8.5	Natural-Based Antimicrobial Agents	159
6.8.6	Poly(Hexamethylene Biguanide).....	160
6.9	Environmental and Health Impact of Antimicrobial Agents.....	160

6.10	Conclusion	163
6.11	Acknowledgment.....	164
Chapter 7	Bovine Mastitis: Rethinking Antibiotics and Emerging Alternatives	167
	<i>Satish V Patil, Sunil H Koli, Vikas S Patil, Jitendra D Salunkhe, Kiran R Marathe, and Bhavana V Mohite</i>	
7.1	Introduction	167
7.2	Types of Mastitis	169
7.2.1	Environmental Mastitis.....	170
7.2.2	Contagious Mastitis	170
7.2.3	Subclinical Mastitis.....	170
7.2.4	Clinical Mastitis.....	171
7.3	Mode of Actions of Mastitis-Causing Pathogens and Consequences	171
7.4	Diagnosis of Mastitis.....	171
7.4.1	Clinical Examination.....	172
7.4.2	Somatic Cell Count in Milk.....	172
7.4.3	Identification of Mastitis Pathogens.....	173
7.4.4	Detection of Markers of Inflammation	173
7.4.5	Mastitis Detection at Cow-Side	174
7.4.6	California Mastitis Test.....	174
7.4.7	Mammary Ultrasound	174
7.4.8	Other Diagnostic Tools	174
7.5	Major Treatments and Drawbacks.....	175
7.5.1	Antimicrobials	175
7.5.2	Antibiotic Resistance	179
7.6	Need for Alternative Treatment to Antibiotic Therapy	179
7.7	Alternative Treatment for Prevention of Bovine Mastitis.....	184
7.7.1	Phage Therapy	184
7.7.2	Bacteriocins and Probiotics	185
7.7.3	Herbal Treatment	187
7.8	Conclusion	187
7.9	Acknowledgment.....	187
Chapter 8	Natural Defenses: Exploring Alternatives to Antimicrobials in Animal Husbandry.....	201
	<i>Charu Gupta</i>	
8.1	Introduction	201
8.2	The Rise of Antimicrobial Resistance	203
8.3	Alternatives to Antimicrobials	203
8.4	Immunomodulatory Strategies: Antibacterial Vaccines	204
8.5	Other Immunomodulators	205

8.6	Phage Therapy: Bacteriophages and Their Lysins	206
8.7	Endolysins.....	207
8.8	Virion-Associated Peptidoglycan Hydrolases	208
8.9	Antimicrobial Peptides	208
8.10	Pro-, Pre-, and Synbiotics – Probiotics or ‘Direct-Fed Microbials’	210
8.11	Prebiotics	212
8.12	Synbiotics	213
8.13	Plant Extracts.....	213
8.14	Inhibitors Targeting Pathogenicity – Quorum Sensing Inhibitors	215
8.15	Bacterial Virulence Inhibitors.....	216
8.16	Feed Enzymes	217
8.17	Exogenous Proteins – Antimicrobial Growth Performance Promoters	217
8.18	Organic Acids.....	219
8.19	Plant-Derived Compounds – Herbs and Etheric Oils.....	220
8.20	Improved Management Practices	221
8.21	Recent Advances and Challenges.....	221
8.22	Perceptions.....	221
8.23	Conclusion	222

Chapter 9 Comprehensive Review of Recent Advancements and Future Perspectives of Antimicrobials in Animal Husbandry 228

Surendra Kumar Gautam

9.1	Introduction	228
9.1.1	Importance of Antimicrobials in Animal Husbandry.....	228
9.1.2	Historical Background and Traditional Application.....	228
9.1.3	Current Challenges: Antimicrobial Resistance	229
9.1.4	One Health Approach	229
9.2	Objectives of the Review	229
9.3	Antimicrobials and Their Mechanisms.....	229
9.3.1	Classes of Antimicrobials and Recent Advances.....	230
9.3.2	New Mechanisms and Strategies	231
9.3.3	Challenges and Future Perspectives on Overcoming Antimicrobial Resistance.....	232
9.3.4	Sustainable Use.....	233
9.4	Technological Advances in Animal Husbandry Antimicrobials.....	233
9.4.1	Diagnostic Tools	233
9.4.2	Biosensors	234
9.4.3	Drug Delivery Systems.....	234

9.4.4	Sustained-Release Implants	235
9.4.5	Genetic Modifications.....	235
9.4.6	Microbiome Engineering	235
9.4.7	Alternative Therapies.....	236
9.4.8	Antimicrobial Peptides	236
9.4.9	Precision Farming Techniques.....	236
9.4.10	Smart Drug Delivery Systems	237
9.4.11	Challenges and Future Directions	237
9.4.12	Economic and Logistic Challenges	237
9.4.13	Research and Development.....	238
9.4.14	Genetic Engineering	238
9.4.15	Microbiome Engineering	239
9.4.16	Alternative Therapies.....	239
9.4.17	Antimicrobial Peptides	239
9.4.18	Precision Farming Technologies.....	240
9.4.19	Smart Drug Delivery Systems	240
9.4.20	Challenges and Future Directions	240
9.4.21	Economic and Logistic Issues.....	241
9.4.22	Research and Development.....	241
9.5	Global Regulatory and Policy Changes.....	242
9.5.1	United States	242
9.5.2	European Union	242
9.5.3	China.....	242
9.5.4	Regulatory and Policy Changes in India	242
9.5.5	Recent Additions and Initiatives	242
9.5.6	Issues and Future Scope.....	243
9.5.7	Role of Regulatory and Policy Changes toward Reducing Consequences of the Use of Antibiotics in Animal Husbandry on Global Health.....	243
9.6	Impact of Antimicrobials on Animal Health and Production.....	243
9.6.1	Use of Antimicrobials for Disease Prevention and Control.....	243
9.6.2	Economic Implications for Farmers	244
9.6.3	Challenges and Opportunities.....	244
9.6.4	Challenges and Lessons Learned	245
9.6.5	Regulatory and Policy Environment.....	245
9.6.6	Future Horizons and Recommendations	245
9.7	Future Perspectives in Antimicrobials for Animal Husbandry	246
9.7.1	Research Deficits and Prospects	246
9.7.2	Emerging Technologies and Interventions.....	247
9.7.3	Stakeholder Partnerships	248
9.8	Conclusion	248
9.8.1	Balancing Antimicrobial Use and Resistance Management.....	249

9.8.2	Sustainable Practices: Long-Term Strategies for Responsible Use.....	249
9.8.3	Future Vision: Innovation and Collaboration into the Future.....	249
9.8.4	Sustainable Antimicrobial Use in the Future.....	250
Chapter 10	Novel Approaches to Combat Microbial Infections in Animal Husbandry.....	255
	<i>P. Prakash, V. Ambikapathy, S. Babu, K. Vijayalakshmi, M. Ratha, N. Ganesh, and A. Panneerselvam</i>	
10.1	Introduction.....	255
10.2	The Rise of Antimicrobial Resistance.....	256
10.3	One Health Initiative.....	256
10.4	Novel Antibiotics from Natural Products.....	258
10.4.1	Plant-Derived Compounds.....	258
10.4.2	Animal-Derived Peptides.....	258
10.4.3	Microbial-Derived Metabolites.....	259
10.5	Alternative Approaches.....	259
10.5.1	Probiotics and Prebiotics to Modulate the Gut Microbiome.....	259
10.5.2	Vaccines and Immunotherapies to Enhance Animal Immunity.....	260
10.5.3	Biosecurity Measures and Good Agricultural Practices to Prevent Disease Transmission.....	260
10.6	Materials and Methods.....	261
10.6.1	Plant-Derived Compounds.....	261
10.6.2	Animal-Derived Peptides.....	262
10.6.3	Microbial-Derived Metabolites.....	263
10.6.4	Probiotics and Prebiotics to Modulate the Gut Microbiome.....	264
10.6.5	Vaccines and Immunotherapies to Enhance Animal Immunity.....	265
10.6.6	Biosecurity Measures and Good Agricultural Practices to Prevent Disease Transmission.....	266
10.7	Expected Outcome.....	268
10.8	Conclusion.....	268
Index.....		271
