# Contents

<b>1</b>	<b>The Analytic Approach: Projective Planes over a Field</b> .....	1
1.1	Affine Planes over a Field .....	2
1.2	Projective Planes over a Field .....	10
1.3	Duality Between Points and Lines .....	17
1.4	Automorphisms .....	18
1.5	Digression: Automorphisms of Affine Planes over a Field .....	28
1.6	The Theorems of Desargues and Pappus.....	34
1.7	Projectivities.....	37
1.8	Harmonic Points .....	53
<b>2</b>	<b>The Synthetic Approach: Axioms for Projective Planes</b> .....	61
2.1	Axioms for Affine and Projective Planes .....	62
2.2	The Dual Projective Plane .....	66
2.3	Projective 3-Spaces and Desargues' Theorem .....	68
2.4	Projective Planes over Division Rings and Pappus' Theorem .....	79
2.5	Coordinatization of Projective Planes .....	85
<b>3</b>	<b>Conics</b> .....	99
3.1	Polarities.....	100
3.2	Conics .....	104
3.3	The Theorems of Pascal and Bézout .....	113
3.4	Conics Through Five Given Points.....	120
3.5	Classification of Conics over $\mathbb{R}$ .....	127
	<b>Bibliography</b> .....	133
	<b>Index</b> .....	135
