

Nanoshaped and Powdered Au/TiO <sub>2</sub> Plasmonic Catalysts for Visible-light Triggered Photocatalytic Oxidation .....	13
Large-Scale Synthesis of Photocatalytic TiO <sub>2</sub> Nanotube Layers .....	14
TiO <sub>2</sub> Nanotubes for Photocatalytic Degradation of Volatile Organic Compounds .....	15
Photocatalytic Degradation of Gaseous Pollutants on TiO <sub>2</sub> Nanotubes.....	16
Interplay of Band Energetics and Photo/Electro/Chemical Activity of SnO <sub>2</sub> And TiO <sub>2</sub> Thin Films .....	17
Plasma RF Probes Used by the Deposition of Semiconductor Thin Films .....	18
Structure, Morphology and Protective Properties of Thin Al <sub>d</sub> Films .....	19
The Influence of the Synthesis Conditions onto the Properties of Plasmonic Au/TiO <sub>2</sub> Nanorod Photocatalysts .....	20
Atomic Layer Deposition of Noble Metal Nanoparticles for Catalytic Applications .....	21
Cu <sub>2</sub> O Photocathodes Prepared by Thermal Reduction of CuO and Their Stability under Applied Potential.....	22
Photoelectrochemical Properties of WO <sub>3</sub> /TiO <sub>2</sub> Photoanodes .....	23
Deposition of WO <sub>3</sub> Films by Reactive Magnetron Sputtering on Different Substrates.....	24
The Role of Cathodic Reactions in the Performance of Electrophotocatalytic Cell .....	25
Antimicrobial Activity Assessment of Photocatalytic Surfaces: Proposals for More Efficient Approach .....	26
Influence of Annealing Time onto the Properties of the "Veggie-Toast-Like" G-C <sub>3</sub> N <sub>4</sub> /TiO <sub>2</sub> Hybrid Photocatalyst .....	27
Synthesis of Doped Pseudobrookite (Fe <sub>2</sub> TiO <sub>5</sub> ) Films: Properties and Applications in Photo(electro)catalysis .....	28
Kinetics of Photocatalytic Oxygen Indicator for Food Packaging .....	29
Polarographic Analysis of Photoelectrocatalytic Cyanide Degradation Products .....	30
Advanced Inorganic Additives for Lithium-Sulfur Batteries.....	31
New Alloy Platinum-Cobalt Based Catalysts for High-Temperature Proton-Exchange Membrane Fuel Cells .....	32
More Energy Efficient Water Electrolysis with Proton Exchange Membrane through Titanium Hydride Formation on the Porous Transport Layer .....	33
Ion Solvating Membrane as Electrode Separator for Alkaline Water Electrolysis .....	34
Optimisation of Electrochemical Synthesis of 2-Iodosylbenzoic Acid in Flow Reactor .....	35
Influence of TiO <sub>2</sub> Support on the Photo/Thermal Catalytic Activity of TiO <sub>2</sub> +Pt Catalysts ....	36
Photocatalytic Removal of 4-Chlorophenol o TiO <sub>2</sub> Nanoparticles: Why Should We Study the Degradation Mechanism? .....	37
Photocatalytic Reduction of CO <sub>2</sub> Over Reduced Titanium Dioxide Materials .....	38
Interfacial Charge Transfer Complexes between Titanium Dioxide and Salicylic Acid Derivatives.....	39
Development and Characterization of Floating Photocatalytic Composites .....	40
Inactivation of Enveloped RNA Viruses on Photocatalytically Active Nanoporous and Nanotubular TiO <sub>2</sub> Surfaces: Methodology Aspects .....	41
Comparison of Hydrogen Production by Different Electrolysers and Calculation of Emission Pathway of Hydrogen.....	42
