|---|------------|
| <i>List of contributors</i> | vii |
| <i>Preface</i> | xi |
| Part I Approaches to the study of paleoclimates | 1 |
| 1 Warm climate forcing mechanisms <i>Paul J. Valdes</i> | 3 |
| 2 Recent advances in paleoclimate modeling: toward better simulations of warm paleoclimates <i>Robert M. DeConto, Starley L. Thompson, and Dave Pollard</i> | 21 |
| 3 Comparison of zonal temperature profiles for past warm time periods <i>Thomas J. Crowley and James C. Zachos</i> | 50 |
| Part II Case studies: latest Paleocene–early Eocene | 77 |
| 4 Comparison of early Eocene isotopic paleotemperatures and the three-dimensional OGCM temperature field: the potential for use of model-derived surface water $\delta^{18}\text{O}$ <i>Karen L. Bice, Lisa C. Sloan, and Eric J. Barron</i> | 79 |
| 5 Deep-sea environments on a warm earth: latest Paleocene–early Eocene <i>Ellen Thomas, James C. Zachos, and Timothy J. Bralower</i> | 132 |
| 6 Mountains and Eocene climate <i>Richard D. Norris, Richard M. Corfield, and Karen Hayes-Baker</i> | 161 |
| 7 An early Eocene cool period? Evidence for continental cooling during the warmest part of the Cenozoic <i>Scott L. Wing, Huiming Bao, and Paul L. Koch</i> | 197 |
| Part III Case studies: Mesozoic | 239 |
| 8 Paleontological and geochemical constraints on the deep ocean during the Cretaceous greenhouse interval <i>Kenneth G. MacLeod, Brian T. Huber, and My Le Ducharme</i> | 241 |

| | | |
|----------------|---|------------|
| 9 | Late Cretaceous climate, vegetation, and ocean interactions <i>Robert M. DeConto, Esther C. Brady, Jon Bergengren, and William W. Hay</i> | 275 |
| 10 | Jurassic phytogeography and climates: new data and model comparisons <i>Peter McA. Rees, Alfred M. Ziegler, and Paul J. Valdes</i> | 297 |
| Part IV | Case studies: Paleozoic | 319 |
| 11 | Permian and Triassic high latitude paleoclimates: evidence from fossil biotas <i>Edith L. Taylor, Thomas N. Taylor, and N. Rubén Cúneo</i> | 321 |
| 12 | Organic carbon burial and faunal dynamics in the Appalachian Basin during the Devonian (Givetian–Famennian) greenhouse: an integrated paleoecological and biogeochemical approach <i>Adam E. Murphy, Bradley B. Sageman, Charles A. Ver Straeten, and David J. Hollander</i> | 351 |
| 13 | Glaciation in the early Paleozoic ‘greenhouse’: the roles of paleogeography and atmospheric CO ₂ <i>Mark T. Gibbs, Karen L. Bice, Eric J. Barron, and Lee R. Kump</i> | 386 |
| Part V | Overview: climate across tectonic timescales | 423 |
| 14 | Carbon dioxide and Phanerozoic climate <i>Thomas J. Crowley</i> | 425 |
| | <i>Index</i> | 445 |
