

6	Quantitative GC-MS analysis of drugs	561
6.1	Introduction	561
6.2	Metformin	563
6.3	Acetazolamide	574
6.4	Ibuprofen	582
6.5	Paracetamol (acetaminophen)	590
6.6	Acetylsalicylic acid (aspirin)	600
6.7	Paroxetine	608
6.8	Quantitative GC-MS in pharmacology and toxicology teaching	613
6.9	GC-MS instruments and columns used in the chapter	621
	References	621
	Further reading	627
7	Biomedical applications of GC-MS and GC-MS/MS in human studies	635
7.1	Introduction	635
7.2	Pediatrics studies	636
7.3	Pregnancy	640
7.4	Kidney disease and kidney transplantation	641
7.5	Liver disease and liver transplantation	642
7.6	Erectile dysfunction	643
7.7	Effects of drugs	643
7.8	Miscellaneous	644
	References	644
	Further reading	652
8	Perspectives of gas chromatography–mass spectrometry in the life sciences	657
	References	670
	Further reading	671
	Abbreviations	673
	Abbreviations	685
	Index	687
