<i>Contributors</i>	<i>ix</i>
<i>Preface</i>	<i>xi</i>
1. SPW feedstock characterization	1
Angelo Ferrando and Mirco Nodari	
1. Introduction	2
2. SPW feedstock	4
3. Composition by infrared spectroscopy	5
4. Composition by thermal analysis	9
5. Composition by elemental analysis	11
6. Water content	14
7. Inert content by ash determination	14
8. Determination of metal residual	15
9. Determination of chlorine and bromine	17
10. Conclusions	19
References	19
2. Chemical kinetics of catalytic/non-catalytic pyrolysis and gasification of solid plastic wastes	21
Andrea Locaspi, Matteo Ferri, Francesco Serse, Matteo Maestri, and Matteo Pelucchi	
1. Introduction	22
2. Non-catalytic thermochemical conversion	23
3. Catalytic thermochemical conversion	48
4. Conclusions and outlooks	67
References	68
Further reading	76
3. Kinetic experiments for pyrolytic recycling of solid plastic waste	77
Ankush Jain and Ravikrishnan Vinu	
1. Introduction	78
2. Transport and kinetic regimes for common plastics	81
3. Analytical pyrolysis systems to perform kinetic experiments	85
4. Conclusions	108
Acknowledgments	109
References	110

4. Catalytic conversion of SPW and products upgrading	117
Ozge Deniz Bozkurt, Sean Timothy Okonsky, Konstantinos Alexopoulos, and Hilal Ezgi Toraman	
1. Introduction	118
2. Catalytic conversion and product upgrading processes of SPW	124
3. Outlook and future directions	157
Acknowledgments	159
References	159
5. Characterization of SPW pyrolysis oils: Products spectra and opportunities	169
Barbara Alejandra Perez, Varaha Jayarama Krishna Jonnalagedda, and Hilal Ezgi Toraman	
1. Introduction	170
2. Physicochemical analysis techniques	172
3. Composition analysis techniques	188
4. Conclusions	208
Acknowledgments	209
References	209
6. PET recycling: Review of the current available technologies and industrial perspectives	215
Lorenzo Brivio and Flavio Tollini	
1. Introduction	216
2. PET mechanical recycling	230
3. PET chemical recycling	237
References	259
Further reading	267
7. Poly(methyl methacrylate): Market trends and recycling	269
Mattia Sponchioni and Sibel Altinok	
1. Introduction	270
2. PMMA: History and market	271
3. PMMA recycling processes	274
4. Reactor configuration for the PMMA thermal recycling	280
5. Conclusions	283
References	284

8. Systemic approaches to model plastics circularity	289
Meltem Urgan-Demirtas, Pahola Thathiana Benavides, Ulises R. Gracida-Alvarez, and Sean Riggio	
1. Introduction	290
2. Life cycle analysis of recycling plastic wastes	291
3. Material flow analysis of recycling plastics wastes: A case study focuses on lubricant production	293
4. An integrated approach for supporting transitions to a circular economy	299
5. Conclusions	301
Acknowledgments	302
References	303
Further reading	304
