Section I: Planning and Conducting Multiple Clinical Studies

1. Choosing a Project or Drug for Evaluation	3
2. Establishing Project Strategies and Goals	23
3. Designing the Overall Project	34
4. Recording, Coding, Processing, and Analyzing Data from Multiple Studies	63
5. Integrating Efficacy Data from Multiple Studies	81
6. Integrating Safety Data from Multiple Studies	94
7. Potential Ethical Issues in Single and Multiple Studies	107

Section II: Considerations for Planning Special Types of Clinical Studies

8. Planning Surgical Studies	127
9. Planning Studies to Evaluate Medical Devices	141
10. Developing Orphan Drugs for Rare Diseases	149
11. Conducting Studies in Special Patient Populations	162
12. Planning Pharmacokinetic Studies	166
13. Developing Drugs Worldwide	175
14. Comparing Different Dosage Forms or Treatment Modalities	200
15. Planning Combination Drug Studies	202

Section III: Management of Multiple Clinical Studies

16.	Management Styles, Staff, and Systems	213
17.	Prioritization and Allocation of Resources	227
18.	Coordination of Multiple Projects	233
19.	Use of Meetings, Documents, and Computers to Assist in Planning and Managing Drug Studies	251
20.	Monitoring of Multiple Clinical Studies	276
21.	Interactions of Regulatory Departments, Regulatory Agencies, and Medical Departments	296
22.	Interactions of Marketing and Research and Development Departments	324
23.	Managing Costs of Projects, Clinical Studies, and Drug Development	338
24.	Terminating a Project	357
