

Contents

Introduction	vii
I Foundations	1
1 This Tomb Holds Diophantus	3
2 The Irrational and the Transcendental	13
3 Centuries of Progress	35
II Computable Numbers	55
4 The Education of Alan Turing	57
5 Machines at Work	79
6 Addition and Multiplication	97
7 Also Known as Subroutines	111
8 Everything Is a Number	127
9 The Universal Machine	143
10 Computers and Computability	163
11 Of Machines and Men	189
III Das Entscheidungsproblem	199
12 Logic and Computability	201
13 Computable Functions	231

14	The Major Proof	259
15	The Lambda Calculus	281
16	Conceiving the Continuum	299

IV And Beyond 323

17	Is Everything a Turing Machine?	325
18	The Long Sleep of Diophantus	351
	Selected Bibliography	361
	Index	366
