
Contents

1. **Human Platelet-Derived Growth Factor and the *sis*-PDGF-2 Gene** 1
by Harry N. Antoniades, Panayotis Pantazis, and Albert J. Owen
2. **The Epidermal Growth Factor Receptor Gene** 41
by John D. Haley, David Kinchington, Nigel Whittle, Axel Ullrich, and Michael D. Waterfield
3. **Epidermal Growth Factor Genes: From Molecular Biology to Clinical Therapeutics** 77
by Philip J. Barr and Pablo Valenzuela
4. **Structure and Expression of the Nerve Growth Factor Gene** 103
by John E. Pintar
5. **Structure of Transforming Growth Factors- α and - β and Their Precursors** 133
by Rik Derynck
6. **The Genes for Granulocyte-Macrophage Colony-Stimulating Factor and Multi-Colony-Stimulating Factor (IL-3)** 165
by Nicholas M. Gough and Antony W. Burgess
7. **The Erythropoietin Gene** 199
by Paul L. Huang, Philip L. Huang, and Sylvia Lee-Huang
8. **The Interleukin-2 Gene** 223
by Nikki J. Holbrook

xii Contents

- 9. Molecular and Cellular Biology of the Interleukin-2 Receptor** **241**
by Judith S. Greengard and Gerald R. Crabtree

- X **10. The Transferrin Gene** **277**
by Axel Kahn, Mario M. Zakin, Mariano J. Levin, and Bertrand Bloch

- X **11. The Transferrin Receptor Gene** **311**
by Alan McClelland and Frank H. Ruddle

- 12. The Interactions of Peptide Growth Factors and Oncogenes** **331**
by Hugo A. Armelin and Mari C.S. Armelin

- Index** **375**
